

Transformational acquisition of WA copper assets

November 2025

BOA Resources

The image is an aerial photograph of a mining or exploration site in a dry, arid landscape. The terrain is covered with sparse, low-lying vegetation and scattered trees. A dirt road or track winds through the area. In the foreground, several pieces of heavy machinery and vehicles are visible. On the left, there is a white truck with a yellow trailer. In the center, a red drilling rig is positioned next to a white truck. To the right, a large white container or trailer is parked, and further right, another white truck with a blue logo is visible. The overall scene depicts an active industrial site in a remote, natural environment.

BOA expands critical minerals portfolio with entry into Murchison Copper Belt, WA

- BOA acquires 49% interest in **13 exploration tenements at the Neds Creek Project**, with exclusive option to acquire remaining 51%
- Strategically located near Sandfire's **De Grussa and Monty copper-gold mines** and Thaduna and Green Dragon copper deposits in WA's Murchison region
- Potential for a significant copper province with expansive running room across underexplored ground
- **Nine high-priority targets** identified for drill testing
- **Ricci Lee target** advanced and **ready for immediate resource definition drilling**
- Multiple other prospects with **ore grade intersections**
- Extensive drill and geophysical data as input to machine learning driven targeting and prospect ranking exercise
- BOA plans to commence drilling H1 2026

BOA tenements in Murchison Copper Belt, WA

Neds Creek exploration: Drill-ready targets identified

Multiple prospects

Targeting sediment hosted structurally controlled epigenetic copper mineralisation, drill ready targets

Extensive pipeline

Prospects at various exploration stages

Ricci Lee prospect^{F7}

- Advanced exploration target
- Hosted in Thaduna Formation
- Priority for immediate resource definition drilling

Enigma discovery^{F7}

- Earlier exploration stage
- Large-scale mineralisation footprint
- Hosted in Johnson Cairn Formation
- High priority for exploration drilling

Multiple additional targets – all with ore grade intersections^{F7}

Rooneys, East Green Dragon, Limestone Bore and Copper Mine Road

Thaduna Formation: Ricci Lee Prospect

Cu

- Historic small-scale copper oxide mine
- Analogue to the Thaduna Copper Deposit (5.5Mt at 2.2% Cu for 119kt Cu and 829koz Ag^{F1}), sub-parallel and 2km to the southwest, hosted in the same stratigraphy
- Copper mineralisation with **500m strike and 200m** depth defined by broad RC and RAB drilling – **mineralisation open laterally and at depth**
- **Priority for resource definition drilling in 2026** and exploration for repetitions along strike

Ricci Lee Prospect vs Thaduna Deposit

- Comparison of Ricci Lee drilling results and Thaduna Resource^{F2} in cross section and at equal scale
- Ricci Lee 2kms SW of Thaduna
- Thaduna mineralisation and scale used as model for mineralisation and scale at Ricci Lee
- Ricci Lee mineralisation intersected up to 200m vertically, open at depth
- Initial focus of drilling for 2026

Legend

- >3% Cu
- 1.25% – 3% Cu
- <1.25% Cu

Ricci Lee long section with copper intercepts

Cu

Thaduna Formation: Ricci Lee Prospect

Cu

- Mineralisation identified from RAB drill testing of historic workings 2007
- Significant high-grade mineralisation defined by 8 RC holes 2010 – 2013^{F3}
- No follow up drilling undertaken
- Up dip and down dip potential to be tested with RC drill program
- Planning AC drilling along strike to test for repetitions

Thaduna Formation: Other prospects

- **Multiple targets** identified for drilling
- **Analogous to Thaduna and Green Dragon** – sediment hosted, fault controlled epigenetic copper mineralisation
- Along strike from Thaduna and Green Dragon deposits within **copper mineralised structural corridors**
- Priority prospects identified for initial drill testing
- **Extensive drill and geophysical datasets** being integrated into machine learning models to assist with target generation and ranking
- **Ongoing exploration to expand pipeline for look-alike copper targets**

Johnson-Cairn Formation: Enigma Prospect

- Part of the Neds Creek Project, drilled and copper discovered by Sipa Resources 2012-2014^{F7}
- Initial drilling defined a large-scale copper mineralisation footprint characterised as a shallow, **laterally extensive copper oxide blanket** over an area roughly **4km x 1.5km**^{F4}
- Notable intercepts include:
 - **THD012^{F5}: 63 m @ 1.1% Cu** (from 90m), along with;
 - 741 ppm Ni (maximum 2,740 ppm), 578 Co ppm (max.2,260), 1.7 ppm Ag (max. 5.9) & 2,133 ppm Zn (max. 9,300)
 - **THD013^{F6}: 29m @ 1.1% Cu** (from 82m), **11m @ 0.2% Cu** (from 120m), **8m @ 0.3% Cu** (from 135m) & **6m @ 0.4% Cu** (from 146m)
 - **THD014^{F6}: 18m @ 0.8% Cu** (from 55m), including **5m @ 1.9% Cu**
- 10 km corridor of Enigma host rocks, with the mineralization largely interpreted as supergene enrichment
- Different mineralisation style and metal association (Cu, Ag, Au, Co, Mn, Ni) to Thaduna, Ricci Lee (Cu, Ag).
- No obvious structural controls, potentially stratigraphic
- Controls to mineralisation are poorly understood – next step: integration of extensive geological and geophysical database to be undertaken with target generation using machine learning tools
- **Priority target to test for primary copper mineralisation**

Legend

- 5 – 30.6% Cu
- 1 – 5% Cu
- 0.5 – 1% Cu
- 0.2 – 0.5% Cu
- 0.1 – 0.2% Cu
- Johnson Cairn formation
- Thaduna formation

BOA: Building a copper resource and growth for 2026

- BOA expanding its critical minerals focus to include **high potential copper projects** in WA
- 13 Exploration tenements¹ covering 1,140km²
- **Nine high-priority targets identified**, including the **advanced Ricci Lee prospect**
- **Ricci Lee** designated as the **first drilling focus for rapid resource growth**
- **Comprehensive data collation and machine learning target generation and ranking** to commence **immediately**
- **Drilling programs planned for 2026** to define and establish **copper resource and test advanced targets**

**Planning for
success in
2026**

Transaction summary

BOA acquires 49% interest in 13 exploration tenements through purchase of shares in Stanifer Pty Ltd.

BOA to issue 14% scrip as consideration and carry Stanifer through next \$500K of expenditure. BOA has option to purchase remaining shares in Stanifer.

BOA has the experience in Board and management to expand critical minerals strategy into Cu in WA.

BOA will immediately commence planning for resource definition drilling at the Ricci Lee prospect. Prospect mapping and ranking undertaken before drilling other targets.

BOA will raise \$3.75M via a placement to increase cash reserves to \$4.4M and fund the forward exploration program.

Drilling to drive resource definition and newsflow

Leadership team with discovery and development experience

Board and team with extensive experience in capital markets, resource exploration and discovery and growing shareholder value.

Cath Norman

Chair, Managing Director

- Geophysicist with 35 years' industry experience.
- Former MD of FAR Limited, leading a major oil discovery in Senegal in 2014.
- Extensive capital markets experience.

Graeme Purcell

Director

- Geologist with 30 years' experience with majors and juniors inc. Plutonic Resources, Homestake Mining, Barrick Gold.
- Involved in discoveries in Australia, PNG, Africa and USA.

Mark Tomlinson

Director

- Mining Engineer with +40 years' experience in finance and mining at Patersons Securities, Bankers Trust, JP Morgan, BHP and Rio Tinto.
- Chair of gold-antimony developer Larvotto Resources (ASX: LRV).

David Reid

Exploration Manager

- Geologist with +35 years' experience in exploration and mining across Australia, Asia and Africa.
- Led the Thaduna-Green Dragon exploration team at Ventnor Resources for extensive drilling and discovery.

Key transaction metrics

Capital structure	Shares	Options	Cash ²
Shares on issue before transaction	123,352,847	27,033,723	\$565,000
Consideration shares	17,269,399	-	-
Placement ¹	150,000,000	5,000,000	\$3,750,000
Total³	290,622,246	32,033,723	\$4,315,000

1. The Company proposes, subject to receiving Shareholder approval, to raise \$3,750,000 through a placement of 150,000,000 shares to sophisticated and professional investors (Placement). The Shares issued under the Placement will have an issue price of \$0.025 representing a discount to the 15-day VWAP of BOA shares of 16.67%.
Options exercisable at \$0.06 per share with a 3-year expiry to be issued to BW Equities and are subject to shareholder approval.
2. BOA Unaudited estimate of cash at end of September (refer BOA ASX September quarterly report)
3. Estimated BOA cash on completion of transaction excluding costs of the Placement of approximately \$255,000

● CVA
 ● Placement
 ● Existing BOA

Planned BOA projects expenditure

Item	Cost
Drilling	\$1,500,000
Heritage surveys	\$80,000
Exploration studies/geophysics	\$200,000
Tenement costs	\$150,000
Geological support	\$260,000
Total	\$2,190,000

Focus on resource definition drilling

Use of funds

Item	Cost
Projects expenditure	\$2,190,000
Corporate administration	\$805,000
Estimated cost of transaction ¹	\$255,000
Working capital / upside drilling	\$1,065,000
Total	\$4,315,000

73% of budget spent in ground

1. Estimated costs of the transaction including legal costs, registry and settlement fees and costs related to the Placement

Timetable

Event	Date
ASX announcement of the Proposed Transactions	27 November 2025
Send Notice of Meeting	1 December 2025
Shareholder meeting	12 January 2026
Completion of Proposed Transaction	14 January 2026

**Building Australia’s next
significant copper resource**

Forward Looking Statements

This presentation is not an offer for financial products in any jurisdiction or a financial product recommendation. The information in this presentation is an overview and does not contain all information necessary for investment decisions. In making investment decisions in connection with any acquisition of financial products, investors should rely on their own examination of BOA Resources Ltd ("BOA" or the "Company") and consult with their own legal, tax, business and/or financial advisers.

The information contained in this presentation has been prepared in good faith by the Company. However, no representation or warranty expressed or implied is made as to the accuracy, correctness, completeness or adequacy of any statements, estimates, opinions or other information contained in this presentation. To the maximum extent permitted by law, BOA, its directors, officers, employees and agents disclaim liability for any loss or damage which may be suffered by any person through the use or reliance on anything contained in or omitted in this presentation.

Certain information in this presentation refers to the intentions of BOA, but these are not intended to be forecasts, forward looking statements or statements about future matters for the purposes of the Corporations Act or any other applicable law. The occurrence of events in the future are subject to risks, uncertainties and other factors that may cause the Company's actual results, performance or achievements to differ from those referred to in this presentation. Accordingly, BOA, its directors, officers, employees and agents do not give any assurance or guarantee that the occurrence of the events referred to in this presentation will occur as contemplated.

Competent Person's Statement

The information in this presentation that relates to Exploration Results for the Western Australian based projects was compiled by Mr Graeme Purcell. Mr Purcell is a member of the Australian Institute of Geoscientists and is a part time consultant and non-executive director to BOA. Mr Purcell has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Minerals Resources and Ore Reserves'. Mr Purcell consents to the inclusion in this presentation of the matters based on the information in the form and context in which it appears.

JORC Compliance Statement

Footnotes:

- F1 As reported to the ASX by Sandfire Resources Ltd (ASX:SFR), "Sandfire Group JORC Mineral Resource and Ore Reserve Statement", 19 October 2017
- F2 As reported to the ASX by Ventnor Resources Ltd (ASX:VRX), Quarterly Activity Report dated 29 January 2014
- F3 As reported to the ASX by Sipa Resources Ltd (ASX:SRI), "Significant Primary Sulphide Copper Intersections at Thaduna", 6 June 2013
