Financial statements approval

The Board is pleased to present the financial statements for B2B Rocket LLC for the period ended 31 December 2023.

Nicholas Lissette (Director)

31 October 2025

Approval date

Independent auditor's report to the shareholders of B2B Rocket LLC

Report on the audit of the financial statements

Our opinion on the financial statements

In our opinion, the accompanying financial statements of B2B Rocket LLC (the Company), present fairly, in all material respects:

- the financial position of the Company as at 31 December 2023, and
- its financial performance and its cash flows for the period then ended

in accordance with New Zealand equivalents to International Financial Reporting Standards Reduced Disclosure Regime (NZ IFRS RDR).

What was audited?

We have audited the financial statements of the Company, which comprise:

- the statement of financial position as at 31 December 2023,
- the statement of comprehensive income for the period inception ended 31 December 2023,
- the statement of changes in equity for the period from inception ended 31 December 2023,
- the statement of cash flows for the period inception ended 31 December 2023, and
- notes to the financial statements, including material accounting policy information.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (New Zealand) (ISAs (NZ)). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the financial statements* section of our report.

We are independent of the Company in accordance with Professional and Ethical Standard 1 *International Code of Ethics for Assurance Practitioners (including International Independence Standards)* (New Zealand) issued by the New Zealand Auditing and Assurance Standards Board, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other than in our capacity as auditor we have no relationship with, or interests in, the Company.

Material uncertainty related to going concern

We draw attention to Note 18 in the financial statements, which indicates that the Company incurred a net loss of \$520,488 during the period ended 31 December 2023 and, as of that date, the Company's current liabilities exceeded its current assets by \$192,820. As stated in Note 18, these events or conditions, along with other matters as set forth in Note 18, indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern. Our opinion is not modified in respect of this matter.

Directors' responsibilities for the financial statements

The directors are responsible on behalf of the Company for the preparation and fair presentation of the financial statements in accordance with NZ IFRS RDR, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible on behalf of the Company for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditor's responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (NZ) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

A further description of our responsibilities for the audit of the financial statements is located at the External Reporting Board's website: [Audit Report 8 » XRB](#) This description forms part of our auditor's report.

Restriction on distribution and use

This independent auditor's report is made solely to the shareholders, as a body. Our audit work has been undertaken so that we might state to the shareholders those matters which we are required to state to them in the independent auditor's report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the shareholders, as a body, for our audit work, this independent auditor's report, or for the opinions we have formed.

B2B Rocket LLC

Notes to the financial statements

For the period ended 31 December 2023

1 Reporting entity

B2B Rocket LLC (the 'Company') is a limited liability company under the Delaware Limited Liability Company Act and is domiciled and operates from Delaware, United States of America. These financial statements have been prepared as part of its controlling entity's, Black Pearl Group Limited's, direct listing requirements with the Australian Securities Exchange ('ASX'). The Company is a for-profit entity, in the business of developing Artificial Intelligence ('AI') tools and providing Software-as-a-Service ('SaaS') solutions.

2 Basis of preparation

These financial statements comprise the results and financial position of the Company for the period from 23 February 2023 to 31 December 2023. The Company was established on 23 February 2023 therefore there is no comparative information.

Statement of compliance

These financial statements have been prepared in accordance with New Zealand Generally Accepted Accounting Practice ('NZ GAAP'). The Company has elected to prepare these financial statements under Tier 2 New Zealand equivalents to International Financial Reporting Standards Reduced Disclosure Regime ('NZ IFRS RDR'), other applicable Financial Reporting Standards and authoritative notices as appropriate for for-profit entities.

These financial statements are the first set of general purpose financial statements the Company has prepared. The financial statements have been prepared on a going concern basis - see note 18.

Basis of measurement

The financial statements have been prepared on a historical cost basis.

Functional and presentational currency

The Company's functional and presentational currency is the US dollar ('USD').

3 Critical accounting estimates, assumptions and judgements

In preparing these financial statements, management has made estimates and assumptions about future events and conditions. While these estimates are based on historical experience and other relevant factors considered reasonable under the circumstances, actual outcomes may differ from those estimates. Estimates and assumptions are reviewed regularly.

The areas where such estimates and assumptions carry a significant risk of resulting in material adjustments to the carrying amounts of assets and liabilities within the next financial year include:

- Estimated useful life of capitalised software development costs - note 12
- Fair value of shares on grant date - see note 14

4 Material accounting policies

Material accounting policies are included in the notes to which they relate. Material accounting policies that do not relate to a specific note are outlined below.

Adoption of NZ IFRS

These are the first set of general purpose financial statements prepared for the Company. These were prepared in September 2025 and adopted all effective NZ IFRS and other financial reporting standards applicable for for-profit entities issued by the New Zealand External Reporting Board.

Statement of cash flows

The cash flow statement is prepared inclusive of sales tax, which is consistent with the method used in the statement of profit or loss and comprehensive income. Definitions of the terms used in the cash flow statement are outlined below:

- Operating activities are the principal revenue-producing activities of the Company and include all transactions and other events that are not investing or financing activities.

B2B Rocket LLC

Notes to the financial statements

For the period ended 31 December 2023

4 Material accounting policies (continued)

- Investing activities are those activities relating to the acquisition and disposal of long-term assets and other investments not included in cash equivalents.
- Financing activities are those activities relating to changes in the size and composition of the contributed equity of the Company.

5 Subscription revenue

The Company primarily generates revenue from SaaS subscriptions ('subscription revenue') to its B2B platform offering. Subscription revenue consists of recurring monthly, quarterly and annual subscription periods and are paid for by customers at the start of the subscription period - most customers are on monthly recurring subscriptions. A receivable is recognised once unconditional payment is due from the customer and is typically when the customer signs up to the subscription or when a subscription period is renewed. Revenue is recognised on a straight-line basis over the subscription, and cash received in advance is deferred as contract liabilities and recognised as revenue across the term of the subscription. The Company offers refunds under certain conditions. Based on historical experience and reasonable estimates, a provision for expected refunds is recognised as a refund liability at the time revenue is recognised.

As of 31 December 2023, the Company had no receivables outstanding from customers for subscription revenue. The Company had a total of \$157,018 of contract liabilities balance in relation to deferred revenue from upfront payments for subscriptions and a refund liability of \$22,296.

6 Personnel expenses

Personnel expenses are recognised as an expense as the Company receives the services. Personnel expenses include costs related to both employees and contractors who perform roles equivalent to employees. The Company's contractor workforce, managed as if they were employees, are included in personnel expenses as well.

	2023 \$
Employee salaries	114,390
Contractor workforce	562,297
Employee share-based payments - see note 14	34,769
Total personnel expenses	711,456

7 Operating expenses

Operating expenses are recognised on an accrual basis, as or when the goods or services are received.

	2023 \$
Advertising and marketing	282,906
IT service costs	57,708
Merchant bank fees	19,488
Total operating expenses	360,102

8 Administrative expenses

Administrative expenses are recognised on an accrual basis, as or when the goods or services are received.

	2023 \$
Legal fees	2,493
Other expenses	17,248
Total administrative expenses	19,741

B2B Rocket LLC

Notes to the financial statements

For the period ended 31 December 2023

9 Income tax and deferred tax

Tax expense comprises current and deferred tax. Income tax is recognised in the statement of comprehensive income except when it relates to items recognised directly in equity (in which case the income tax is recognised in equity). Income tax is based on tax rates and regulation enacted in the jurisdiction the Company operates in.

Deferred tax is recognised in respect of temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. The amount of deferred tax is based on the expected manner of realisation of the carrying amount of assets and liabilities, using tax rates enacted or substantially enacted at the end of the reporting period. A deferred tax asset is recognised only to the extent that it is probable that future taxable profits will be available against which the asset can be utilised.

Deferred tax assets on deductible temporary differences are recognised to the extent taxable temporary differences exist in the same tax jurisdiction. No deferred tax asset is recognised in excess of the available taxable temporary differences, due to the uncertainty of when the asset can be utilised.

As of 31 December 2023, the Company had federal tax losses of \$438,532, which are available to be carried forward for use against future taxable profits. No deferred tax asset has been recognised for tax losses as the Company has assessed there is not a probability of utilising these losses in the near future due to the current loss position.

As of the date these financial statements were issued, 30 October 2025, the Company has yet to file its state tax returns in Delaware. As the Company was in a loss position for the period ended 31 December 2023, the only consequence is a maximum penalty of \$3,000 for late or non-filing of its state tax returns.

10 Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and balances held in bank accounts that are readily available for use in the Company's operations. These amounts are subject to an insignificant risk of changes in value and are held to meet short-term cash commitments. The Company does not hold any other instruments classified as cash equivalents.

	2023 \$
Bank accounts	6,163
WISE accounts	66,965
Total cash and cash equivalents	73,128

11 Receivables

Short-term receivables are measured at the amount due, less an allowance for expected credit losses ('ECL'). The Company applies the simplified ECL model under NZ IFRS 9, grouping receivables by shared credit risk characteristics and assessing them based on days past due.

Receivables are written off when there is no reasonable expectation of recovery, which may include instances where the debtor is in liquidation or the receivable is more than one year past due.

The Company utilises third-party payment processors e.g. Stripe, to facilitate customer payments. These processors collect and temporarily hold funds which are then transferred to the Company's bank account and as such, are classified as receivables.

	2023 \$
Clearing accounts	57,443
Total trade and other receivables	57,443

12 Intangible assets

Internally generated intangible assets are recognised only if all criteria under NZ IAS 38 are met, including the demonstration of technical feasibility, intention and ability to complete the asset, and the ability to use or sell it. Costs incurred during the research phase are expensed as incurred. Development costs are capitalised only when the project has progressed beyond the research stage and meets the recognition criteria.

B2B Rocket LLC

Notes to the financial statements

For the period ended 31 December 2023

12 Intangible assets (continued)

The initial cost of internally generated intangible assets is recognised as the total of directly attributable expenditures incurred from the point at which the asset meets the recognition criteria above. These costs include those necessary to design, develop, and prepare the software for its intended use. If the recognition criteria are not met, development costs are expensed in the period they are incurred.

Internally generated intangible assets are measured at cost less accumulated amortisation and impairment losses. Amortisation is recorded on a straight-line basis over the asset's estimated useful life, commencing when the asset is available for use. The useful life and amortisation method are reviewed annually. Internally generated intangible assets are subject to annual impairment testing or more frequently if indicators of impairment exist.

The Company amortises intangible assets with a limited useful life using the straight-line method

Significant accounting estimate - amortisation of capitalised software development

The Company amortises its capitalised software development using an estimated useful life of five years. The capitalised software development costs relate to the development of the Company's B2B SaaS offering. The useful life estimate is a matter of judgement, having considered the industry average and high rate of technological change in the generative AI area. The Company will continuously assess this estimate and refine as required.

<i>Capitalised Development Costs</i>	2023
	\$
Cost	
Additions	214,145
Closing balance	214,145
Amortisation and impairment losses	
Amortisation for the period	9,148
Closing balance	9,148
Carrying amount	204,997

13 Payables

Trade and other payables are classified as financial liabilities and measured at amortised cost.

	2023
	\$
Credit cards	73,102
Accrued expenses	31,970
Accrued salaries	50,497
Payables	155,569

14 Share-based payment reserve

The Company entered one equity-settled share based compensation ('SBP') arrangement with an employee. The employee was awarded rights to receive 250,000 ordinary shares which vest after specified service periods. The grant date fair value of the share rights is expensed over the defined service periods, and taken directly through the Company's share-based payments equity reserve. The grant date fair value of the share rights is based on market transactions of the Company.

Once the shares are issued after the vesting conditions are met, the amounts recognised in the reserve are transferred to share capital. The Company estimates, at reporting date, whether the employee will meet the vesting conditions and if otherwise, amounts expensed during the reporting period are reversed and amounts expensed in previous reporting periods are transferred into retained earnings.

B2B Rocket LLC

Notes to the financial statements

For the period ended 31 December 2023

14 Share-based payment reserve (continued)

Significant accounting estimate - grant date fair value of shares

These financial statements were prepared in September 2025 and as of that date, the Company had no company valuation or prior share purchases on market terms. To approximate the grant date fair value of the award to the employee, the Company estimated the value based on its inception capital contributions. The Company was created toward the end of February 2023 and the award was granted at the start of March 2023. The estimated grant date fair value per share is \$0.498 per share.

No other share rights were granted during the financial year and there were no forfeitures. The following summarises the movements in the reserve during the year:

	2023
	\$
Opening balance	-
Progress towards share rights	34,769
Closing balance	34,769

15 Financial instruments

	2023
	\$
<i>Financial assets at amortised cost</i>	
Cash and cash equivalents	73,128
Receivables	57,443
Total	130,571
<i>Financial liabilities at amortised cost</i>	
Payables	155,569
Total	155,569

16 Related party transactions

<i>Key management personnel compensation</i>	2023
	\$
Short-term employee benefits	164,390
Share-based payments expense	34,769
Total key management personnel compensation	199,159

Amounts included above are the amounts recognised as an expense during the period they relate. Key management personnel are defined as having authority and responsibility for planning, directing and controlling the activities of the Company, directly or indirectly, including Directors. No amounts arising from transactions with related parties have been written off or foregone during the year.

During the year ended 31 December 2023, one member of key management personnel received a nominal salary of \$1. This amount is not considered to be at market rate for the services provided. The individual has voluntarily elected to receive minimal compensation. The Company acknowledges that this compensation is not reflective of market remuneration for similar roles and responsibilities. No other benefits or remuneration were provided to this individual during the reporting period.

As of 31 December 2023, short-term employee benefits of \$50,497 were payable to key management personnel.

Issue of share capital and capital contributions

A related party of the Company via its CEO is the Loul Equity Trust, which owned 100% of the Company during the period ended 31 December 2023. During the period, the Loul Equity Trust provided all of the Company's share capital and capital contributions during the period - see *statement of changes in equity*.

There were no other material related party transactions during the period.

B2B Rocket LLC

Notes to the financial statements

For the period ended 31 December 2023

17 Commitments and contingencies

There were no commitments or contingencies at balance date.

18 Going concern

As at 31 December 2023, the Company incurred a net loss of \$520,488, and had net current liabilities of \$192,820. These conditions indicate the existence of a material uncertainty that may cast significant doubt on the Company's ability to continue as a going concern.

To support its going concern assumption, the Company obtained a letter of financial support from Black Pearl Group Limited, confirming its intention and ability to provide financial support sufficient to enable the Company to meet its obligations as and when they fall due for a period of at least 12 months from the date these financial statements were approved for issue.

Based on this support, governance and management of the Company believe that the preparation of these financial statements on a going concern basis is appropriate.

19 Subsequent events after reporting date

The following are non-adjusting subsequent events from reporting date until the date these financial statements were approved and issued on 30 October 2025:

- Conversion to a Corporation - In April 2024, the Company converted from being a Delaware Limited Liability Company, into a Delaware Corporation.
- Legal dispute and settlement - During the 2024 financial year, the Company and another party entered a legal dispute. This involved both a claim from the Company, as well as a counterclaim against the Company. This matter was ultimately settled in May 2025, with the Company agreeing to pay the other party \$140,000. The amount was fully paid by the end of August 2025.
- Sale of the Company to Black Pearl Group Limited - 100% of the Company's shares were acquired by Black Pearl Group Limited. The transaction was settled on 21 August 2025.
- SAFE deposit - In 2025, the Company received \$150,000 funding from an investor through a "simple agreement for future equity" i.e. a SAFE. This required the Company to either issue ordinary shares to the investor, or repay the amount received, depending on events outlined in the agreement. The SAFE was settled in August 2025.

There were no other material subsequent events after reporting date.
