

## IM Medical Limited (IMI)

### COMPANY ANNOUNCEMENT

#### **INTELLIHEART TESTING COMMENCES AT METABOLIC MEDICINE IN PERTH, WESTERN AUSTRALIA**

22 February 2005

IM Medical Ltd ( ASX : IMI ) is pleased to confirm a lease agreement and service contract in Western Australia for its Intelliheart cardiovascular diagnostic testing system.

Metabolic Medicine, a specialist, internal medicine and obesity centre located in Perth and directed by specialist physician Dr Anish Singh, plans to utilise the system across a range of applications including the management of obesity and cardiovascular disease.

"We are excited by the potential of the Intelliheart system in the early detection of cardiovascular disease and in taking the guesswork out of identifying personal cardiovascular disease risk factors. It also provides patients with real markers of improvements in their cardiovascular fitness as they progress through our treatment programs." says Dr Singh

The Intelliheart System will be integrated with other state-of-the art screening packages offered by Metabolic Medicine, to provide the latest in diagnostic testing capabilities. Data from the Intelliheart cardiovascular tests will be forwarded electronically to IM Medical for interpretation and analysis, and a comprehensive patient report will be generated to guide management by the Metabolic Medicine team. Patient progress is overseen by doctors and a team of exercise physiologists through regular and detailed monitoring of cardiovascular function.

The decision to adopt the Intelliheart system at Metabolic Medicine was made following Dr Singh's attendance at a recent training seminar in Melbourne conducted by IM Medical. "I was impressed by the scope of the Intelliheart assessment and it's ability to integrate cardiovascular performance data with risk factors such as family history. It struck me as a significant step forward in how we manage our patients", explained Dr Singh.

The location of Intelliheart technology within a specialist medical assessment centre is a preferred model for delivery of cardiovascular screening and early detection throughout Australia. IM Medical is now developing a strategic plan for the wider adoption of its technology at key screening and early disease management clinics and health services nationally.

The system has the potential to save lives and to become an important tool in the management of cardiovascular disease, which kills over 50,000 Australians each year.

Metabolic Medicine is located at Suite 2, 12 Parliament Place, Perth, Western Australia.

"The signing of this agreement represents a major milestone for the company and the first of many such arrangements planned for calendar 2005 as the rollout of the Intelliheart technology gathers momentum" commented Mr Andrew Batty, CEO of IM Medical.

Yours sincerely,
