BSA secures a role in the delivery of the prestigious New Royal Adelaide Hospital Project

Sydney: 1st February 2012: BSA Limited (ASX:BSA) is pleased to announce that it has signed a \$93 million contract with the Hansen Yuncken Leighton Contractors Joint Venture (HYLC JV) for the installation of Heating Ventilation and Air Conditioning Services (HVAC) for the New Royal Adelaide Hospital Project.

The 800 bed New Royal Adelaide Hospital will be Australia's most advanced hospital, and the single largest infrastructure project in South Australian history. Construction on the project commenced in 2011 and is expected to be completed in 2016.

BSA Limited Managing Director, Steve Nash, said "BSA made a strategic decision in 2007 to increase our focus in the Health, Medical Research and Institutional Buildings Markets. The award of this contract recognises the depth of experience BSA has gained in this market sector and validates the investment we have made in technologies such as Building Information Modelling (BIM) systems.

BSA looks forward to contributing to the delivery of this state-of-the-art healthcare facility for the benefit of the South Australian public.

Contracted work in hand for BSA's Technical Design and Construction Projects business unit is now the highest in the Company's history at \$306 million and provides greater certainty for FY14 and beyond."
