Oil Business – Production and Oil Developments

SW Queensland

ATP 1189P Naccowlah Block and Associated PL's - Bounty 2%; Watkins North 10%

Location: Surrounding Jackson, Naccowlah and Watson Oilfields

Background – Summary

The Naccowlah Block comprises 1,804 km² approximately 6% of which is covered by ATP 1189 (N) and 1 Potential Commercial Area (PCA) application and the remainder in 23 petroleum production leases (PL's).

Activities during the Quarter

Principal activities during the quarter were continued oil production at a steady 20-21 bopd net to Bounty. The Company is working with Santos and the Joint Venture partners to settle outstanding cash calls via a formal agreement which is anticipated to be finalised in the next quarter.

The operator, Santos Limited has identified several locations for appraisal and NFE wells in the Jackson and Watson/Watkins areas which are subject to future drilling.

Significant Activities Next Quarter

Bounty anticipates 4 NFE and appraisal wells for Naccowlah Block during the remainder of 2026. This is expected to supplement Bounty's sales volume and reserves.

In addition, the operator will optimise oil production from the tied in Watkins North discoveries and commence program to extend production in the Jackson Field by continuing completing as yet undeveloped reserves in the Westbourne Formation

Oil Business – Development

Southern Surat Basin Onshore Queensland

PL 2 Alton Oilfield and PL 1182 (PL46) Fairymount Oilfield Bounty - 100%;

Location: 70 km northeast of St. George and 440 km west of Brisbane, SE Queensland.

Background

The location of Bounty group Southern Surat Basin interests is shown in the adjacent map. Alton has had historical production of over 2 million barrels from the early Jurassic age Evergreen Formation and Fairymount 1.17 million barrels from the Showgrounds Formation.

Bounty's oil resources in the Southern Surat Basin are light oils (high API) derived from Permian coals (Cooper Basin equivalent). There are 154,000 bbls of 2P and 2C (Contingent) reserves within proven pools for development and potentially another 100,000 bbls in immediate proved closures in the Evergreen Formation.

Activities during the Quarter and Next Quarter

Much of the work this quarter was in finalizing compliance matters. A replacement tenure application allocated as PL1152 to replace PL46 Fairymount is pending and is anticipated to be issued in due course. Emphasis was on Well Integrity, environmental monitoring and upgrading Environmental

Management Systems. Bounty's Southern Surat Basin projects are 100% owned and operated by Bounty with planning for new production in 2026.

2025/2026 Alton Area Plans

Bounty is assessing the merits of future development or divestment of all Surat assets as it looks to secure shareholder approvals at an upcoming General Meeting to recapitalise the Company. A Board and independent review are currently being undertaken as part of this process.

Major Growth Projects:

Gas Growth Projects:

PEP 11 - Offshore Sydney Basin, New South Wales – Bounty 15%

Background

- Reported at 100% project equity unless specifically stated as net to Bounty

The estimated quantities of petroleum that may potentially be recovered by the application of a future development project relate to undiscovered accumulations. These estimates have both an associated risk of discovery and a risk of development.
