ASX Announcement

Commencement of RC Drilling Program at Mt Venn Gold Project

Highlights:

- A 30 hole 3000m, Reverse Circulation (RC) drilling program has commenced at the Mt Venn Gold Project, located 30km from Gold Road Resources' 6Moz, Gruyere gold mine in Western Australia.
- The drilling program targets the undrilled, high-grade Chapman's Reward gold prospect where rock chip sampling has returned values up to 201g/t Au.
- Assay results from the RC drilling program are expected in February 2021.

Further to its update on the 24th of November 2020, Woomera Mining Limited (ASX:WML) (**Woomera** or **the Company**) is pleased to announce that it has commenced RC drilling at its 80% owned (20% Cazaly Resources Limited ASX:CAZ) Mt Venn Gold Project (**Mt Venn**) in the Eastern Goldfields of Western Australia (**Figure 1**).

The maiden RC drilling program targets the Chapman's Reward prospect, where extensive, historic workings are coincident with a sheared contact between ultramafic rocks and a granitic intrusion. Historically, the target has been underexplored due to the remote nature of the region and a lack of supporting infrastructure.

This ASX announcement has been approved by Woomera Mining's Board of Directors and authorised for release by:

Ian Gordon
Non-Executive Chairman
Woomera Mining Limited

The information in this announcement that relates to Exploration Results for the Mt Venn Project is extracted from the ASX announcement “Amalgamation of expired prospecting licences at Mt Venn” released on 30th July 2019 which is available on www.woomeramining.com.au.

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcement.

About Woomera Mining Limited

Woomera Mining Limited (Woomera) is an ASX listed exploration company based in Adelaide, South Australia with its primary focus being the Mt Venn Greenstone Belt in Western Australia (Mt Venn Gold Project) where it has identified a number of high-priority, drill-ready gold and nickel targets. The Company also has tenements in the Musgrave Province and Gawler Craton of South Australia which are considered prospective for IOCGU deposits, Cu-Ni-Co deposits, Rare Earth and Precious Metals.

FORWARD LOOKING STATEMENTS

Certain statements in this document are or maybe “forward-looking statements” and represent Woomera’s intentions, projections, expectations or beliefs concerning among other things, future exploration activities. The projections, estimates and beliefs contained in such forward looking statements necessarily involve known and unknown risks, uncertainties and other factors, many of which are beyond the control of Woomera, and which may cause Woomera’s actual performance in future periods to differ materially from any express or implied estimates or projections. Nothing in this document is a promise or representation as to the future. Statements or assumptions in this document as to future matters may prove to be incorrect and differences may be material. Woomera does not make any representation or warranty as to the accuracy of such statements or assumptions.
