19 September 2018

New Chief Financial Officer and Company Secretary Appointed

- Experienced industry finance professional, Rebecca Prince, joins Carbonxt as Chief Financial Officer and Company Secretary
- Previous CFO, Adrian Figueroa, to take on an operational role managing the Company's logistics and manufacturing requirements
- Ms Prince brings over 15 years' experience and an extensive background working within the water treatment and industrial chemicals sectors

Carbonxt Group Ltd (ASX:CG1) is pleased to announce the appointment of Rebecca Prince to Chief Financial Officer and joint Company Secretary.

Prior to joining Carbonxt, Ms Prince was the CFO at leading US distributor AllChem Industries, which specialises in the fields of water treatment and industrial chemicals. Having previously spent nearly ten years with the distributor, based in Gainesville, Florida, USA she brings extensive knowledge and background within the water treatment and industrial chemical sectors.

Before working in the industry, she worked within management consulting firm, Protiviti, and at professional services and accounting firm, Ernst & Young in Australia. She is pursuing an MBA from the University of Illinois at Urbana-Champaign and has a BA and LLB from the University of New South Wales, Sydney, Australia.

Warren Murphy, Managing Director of Carbonxt commented: "I am delighted to welcome Rebecca to the team. Her background and expertise in the industrials and water sectors plus an extensive professional accounting background make her the perfect strategic fit for the Company and she will no doubt prove to be an instrumental member of the team.

About Carbonxt

Carbonxt's core business is the development and sale of specialised and advanced Activated Carbon (AC) products, including Powdered Activated Carbon and Activated Carbon pellets for the removal of pollutants and toxins in industrial processes. Its products are used in industrial air purification, waste water treatment and other liquid and gas phase markets, primarily for the capture of mercury and sulphur in order to reduce harmful emissions into the atmosphere, as required by global regulations. Carbonxt's products are non-brominated, providing a key competitive advantage by eliminating the corrosion and damage caused to plant equipment when using brominated products.
