NASHVILLE POLICE FORCE EXPANDS CONNECTED IO PRODUCT ROLL OUT

The Board of G8 Communications Limited (“G8C” or “Company”) is pleased to advise further purchase orders have been received and product has been shipped to Nashville police force.

As announced on 6 April 2016 and further to the market updates of 1 August and 20 September 2016, G8C’s wireless modems are being installed by Nashville Police to assist with wireless communication and monitoring of existing pole top security cameras, as well as an energy management module controlling lighting.

This further order demonstrates a successful pilot program and G8C anticipates further and continued purchase orders from Nashville police force as they begin to meet a potential domestic demand of up to 20,000 units in the greater Nashville area creating an addressable market of more than USD\$5m.

The Company believes this continued success with the Nashville police force will enhance opportunities through out the USA to penetrate other domestic police forces and first responder sectors.

About G8 Communications

G8 Communications Limited has its operations based in Silicon Valley, in the US. Its business is a wireless technology innovator and manufacturer operating in the multi-trillion-dollar “IoT” (Internet of Things) sector. G8 Specializes in machine to machine (“M2M”) connectivity, providing hardware and software solutions to some of the world’s largest companies – including Coca Cola, Verizon and AT&T. G8’s software solutions also include a customised cloud management interface and a variety of support services. Cisco predicts there will be 50 billion connected devices by 2020.
