MALAGASY FINALISES SALE OF MOLO GRAPHITE PROJECT

Sale of remaining 25% Interest to Joint Venture Partner Energizer Resources Inc.

The Board of Malagasy Minerals Limited ("Malagasy") is pleased to announce it has finalized the sale of the company's 25% interest in the Molo Graphite Project to joint venture partner Energizer Resources Inc. ("Energizer" or "EGZ").

This transaction crystallises significant value for Malagasy and allows the company to focus on gaining further exposure to high quality graphite deposits on the company's highly prospective 100% owned tenements at the Maniry Project. In addition to this 100% owned graphite opportunity, Malagasy will continue to advance its core focus of exploring for world-class nickel-copper-PGM deposits across the wider project area.

The core components of the Sale and Purchase Agreement ("SAP") between the companies are:

- On execution of the Sale and Purchase Agreement Energizer will;
  - Pay Malagasy the sum of C$400,000 cash;
  - Issue 2,500,000 EGZ shares (held in escrow for 12 months); and
  - Issue 3,500,000 EGZ warrants (based on a 5 day VWAP prior to date of signing).

- On completion of a Bankable Feasibility Study ("BFS") Energizer will:
  - Pay Malagasy the sum of C$700,000 cash; and
  - Issue 1,000,000 EGZ shares.

- On the commencement of commercial production Energizer will:
  - Pay Malagasy the sum of C$1,000,000 cash; and
  - Commence payment of a 1.5% Net Smelter Return ("NSR") on all production.

- Malagasy will include an additional tenement previously not part of the Molo Joint Venture.

- The transaction is limited to industrial mineral rights only, which include graphite.

The Board of Malagasy believes this transaction delivers a low-risk immediate return to Malagasy in the form of the initial cash payment and the issue of shares. In the medium to long term it provides no-risk exposure to the future development of the project through a combination of additional shares, warrants and a significant royalty. In addition this agreement enhances the potential funding and development pathway of the project with Energizer now being able to seek funding support on a 100% basis.

Importantly, the development of the Molo Graphite Project would also see a substantial injection of key infrastructure into this area of southern Madagascar that would significantly enhance Malagasy's exploration and any future development activities across the region.

In a parallel but separate transaction still being finalised, Energizer has agreed to:

- Transfer to Malagasy a 75% interest in the non-industrial mineral rights of the adjacent Green Giant Project (Figure 1) for nil consideration;

- The formation of the joint venture was conditional on the companies completing the Molo Project SPA; and

- Energizer's 25% interest will be free-carried to a decision to mine.

Gaining access to the Green Giant Project consolidates Malagasy's position over the major nickel-copper-PGM trend identified through the Ampanihy Project.

Figure (1) – Project Location Plan

Explanation:

- Pink tenements – Malagasy 100% all commodities.
- Green outline with sub-blocks tenements
  - Malagasy 100% of base and precious metals rights.
  - Energizer 100% of industrial minerals.
- Red tenements – Green Giant Project;
  - Base and precious metals rights - Malagasy 75% / Energizer 25% free carried to a decision to mine.
  - Energizer 100% of industrial minerals.
- Green tenements – New tenements;
  - Malagasy 100% of base and precious metals rights
  - Energizer 100% of industrial minerals.

For and on behalf of the Board
