

ASX ANNOUNCEMENT

20 May 2022

Chief Operating Officer Joins ChemX Materials Team

- **ChemX continues its growth strategy with the appointment of Peter Lee as Chief Operating Officer (COO)**
- **Mr Lee has over 20 years of experience as a Chemical Engineer covering operations, corporate and consulting roles**
- **This is a key step in the execution of ChemX's energy transition and decarbonisation focused projects**

ChemX Materials (ASX:CMX) (ChemX or the Company), a materials technology company focused on providing critical materials required for electrification and decarbonisation, is pleased to announce the appointment of Peter Lee as Chief Operating Officer. Mr Lee is a high calibre addition to the team and will significantly enhance the Company's capacity to execute its strategy.

Peter Lee

Mr Lee is a Chemical Engineer, who has more than 20 years' experience working in a number of large mining companies, across Australia and Canada. Having commenced his career with Mount Isa Mines (MIM), then Rio Tinto (Queensland Alumina Ltd and Gove Alumina), his last role was Executive Process-Mechanical, with WSP Golder. In this role, Mr Lee led multi-disciplinary teams in domestic and international Mining, Metals and Chemical Industry related Process Design, Evaluation and Optimisation studies.

Mr Lee received Honours in a Bachelor of Chemical Engineering (UNSW) and has completed a Master of Business Administration (CQU). Along with the technical experience and qualifications, Mr Lee also brings strong leadership and management skills with significant knowledge and networks within the mining industry.

ChemX Managing Director, David Leavy, commented:

"ChemX is very pleased to have secured the services of someone of the calibre of Peter as our Chief Operating Officer. We are looking forward to harnessing his knowledge and working alongside him to maximise the opportunities from our projects, including the High Purity Alumina microplant being commissioned in Perth and the kaolin and manganese opportunities on the Eyre Peninsula.

"Peter's appointment is a critical step in ChemX achieving its primary focus of becoming a producer of critical materials required for electrification and decarbonisation."

Principal Administrative Office

ChemX Materials (ASX:CMX) wishes to advise in accordance with ASX Listing Rule 3.14 that its Principal Place of Business address has been changed to Level 34, Central Park Tower, 152 St Georges Terrace, Perth WA 6000.

This Announcement has been authorised for release by the Board.

About ChemX Materials (ASX: CMX)

ChemX is a materials technology company focused on providing critical materials required for electrification and decarbonisation. The Company's vision is to support the energy transition with materials and technology that provide real solutions to lowering carbon emissions.

Developed in-house, ChemX's HiPurA™ Process is a unique technology that is capable of producing high purity alumina (HPA) and high purity aluminium cathode precursor salts for lithium-ion batteries. Initial testwork has indicated that the process is low cost and low in energy consumption, compared to alternative technologies. A key competitive advantage is that the HiPurA™ process is not tied to mine production, with the feedstock being a widely available chemical.

The Company is developing its HiPurA HPA Project in Perth, Western Australia.

The South Australian Eyre Peninsula projects include the Kimba Kaolin-Halloysite Project and the Jamieson Tank Manganese Project.
