Company Announcements Platform

Inclusion in ASX Equity Research Scheme

OFG is pleased to announce that it has been included in the inaugural ASX Equity Research Scheme. Inclusion in this program will see analyst coverage initiated on the company by two well regarded research houses. This program has been designed by the ASX to build higher levels of both retail and institutional investor awareness of the companies included in the program with the aim of delivering higher levels of stock liquidity in companies taking part in the program.

The company plans to release its results for the year ending 30 June 2007 in the last week of August and expects the initial research to be published soon thereafter.
