Cooper Metals Limited

Australian focused copper and
gold explorer

Exploration Update July 2022

Managing Director: Ian Warland

Disclaimer

This presentation has been prepared by Cooper Metals Limited (Cooper Metals)

This document contains background information about Cooper Metals 's current situation at the date of this presentation. The presentation is in summary form and does not purport to be all inclusive or complete. Recipients should conduct their own investigations and perform their own analysis in order to satisfy themselves as to the accuracy and completeness of the information, statements and opinions contained in this presentation. This presentation is for information purposes only. Neither this presentation nor the information contained in it constitutes an offer, invitation, solicitation or recommendation in relation to the purchase or sales of shares or other securities in any jurisdiction. This presentation is not a prospectus, product disclosure statement or other offering document under Australian law (and will not be lodged with the Australian Securities and Investments Commission (ASIC)) or any other law.

This presentation does not constitute investment or financial product advice (nor tax, accounting or legal advice) and has been prepared without taking into account the recipient's investment objectives, financial circumstances or particular needs and the opinions and recommendations in this presentation are not intended to represent recommendations of particular investments to particular persons. Recipients should seek professional advice when deciding if an investment is appropriate. All securities involve risks which include (among others) the risk of adverse or unanticipated market, financial or political developments. Details regarding the risks associated with an investment in the Company will be set out in the Prospectus.

To the fullest extent permitted by law, Cooper Metals , its officers, employees, agents and advisors do not make any representation or warranty, express or implied, as to the currency, accuracy, reliability or completeness of any information, statements, opinions, estimates, forecasts or other representations contained in this presentation. No responsibility for any errors or omissions from this presentation arising out of negligence or otherwise are accepted.

This presentation may include forward-looking statements. Forward-looking statements are only predictions and are subject to risks, uncertainties and assumptions which are outside the control of Cooper Metals . Actual values, results or events may be materially different to those expressed or implied in this presentation. Given these uncertainties, recipients are cautioned not to place reliance on forward looking statements. No representation is made that, in relation to the tenements the subject of this presentation, Cooper Metals has now or will at any time the future develop resources or reserves within the meaning of the Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves

Any forward-looking statements in this presentation speak only at the date of issue of this presentation. Subject to any continuing obligations under applicable law, Cooper Metals does not undertake any obligation to update or revise any information or any of the forward-looking statements in this presentation or any changes in events, conditions, or circumstances on which any such forward looking statement is based.

Due care and attention has been taken in the preparation of this presentation. However, the information contained in this presentation (other than as specifically stated) has not been independently verified nor has it been audited Accordingly, Cooper Metals does not warrant or represent that the information contained in this presentation is accurate or complete. To the fullest extent permitted by law, no liability, however arising, will be accepted by Cooper Metals or its directors, officers or advisers, for the fairness, accuracy or completeness of the information contained in this presentation

Corporate Snapshot

Project Summary

Three Project areas – Qld & WA

MT Isa East Cu-Au Project - Qld

- World class Mt Isa Inlier
- Large tenement package close to infrastructure
- highly prospective for IOCG, ISCG and shear hosted Cu-Au

Yamarna Gold Project - WA

- Along strike from Gold Road JV Resources **6.16 Moz Gruyere gold deposit**¹

Gooroo Cu-Au Project - WA

- 20km from Silver Lake's Deflector Mine (**1.28m oz Au @ 13.2 g/t**)²
- 26km of unexplored greenstone belt

Mt Isa East Copper Gold Project- Qld

World Class copper gold provence

The Project straddles the boundary of the Western Fold Belt, the Kalkadoon-Leichhardt Belt and Eastern Fold Belt

Several small to medium, high-grade Cu +/- Au deposits in the area i.e., Duchess, Tick Hill, Leichardt & Barbara (4.7mt @ 1.6% Cu & 0.15 g/t Au)¹

Carnaby Resources (ASX:CNB) recent success at Nil Desperandum and Lady Fanny highlight the potential of the region especially the Mary Kathleen Domain

Cooper's ground has many significant Cu occurrences that have had **no follow-up drilling** since the mid 1990's

Cooper's recent drilling at King Solomon has intersected significant shallow copper and gold mineralisation, open in all directions

King Solomon 1

Significant shallow copper & gold mineralisation intersected

Eight RC drill holes intersected shallow copper mineralisation over an exceptional 380m strike length, with mineralisation open along strike and at depth

22MERC016 intersected an excellent result of **17m @ 2.2% Cu from 84m including 8m @ 4.3% Cu from 84m** with gold assays still pending

IP chargeability anomalies indicates significant additional targets, down dip, adjacent to, and along strike from known Cu-Au mineralisation at King Solomon 1, 2 and 3, suggesting a much larger mineralised system than previously indicated.

New IP chargeability anomalies at King Solomon 1 outline **around 250m of additional strike length** to drill test

King Solomon 2 & 3

IP survey identifies significant new targets

RC drilling assay results indicate significant potential of new IP chargeability anomalies identified subsequent to the maiden drilling program in May

Over **500m combined strike length of IP chargeability** anomalies identified at King Solomon 2 and 3

A strong NNW trending chargeability anomaly extending for over **250m along strike that is untested by the current drilling**

A chargeability anomaly trending in a NNE strike direction for over 250m, partially intercepted by hole 22MERC011 originally testing under mineralised outcrop intersected **18m @ 1.4% Cu and 0.04g/t Au from 42m including 7m @ 2.1% Cu from 43m and 3m @ 2.4% Cu from 56m**

Drilling to commence at King Solomon late July, testing new targets and along strike and downdip of known mineralisation

Mt Isa East - Qld

Rapidly building a pipeline of Cu-Au targets

Multiple high-priority VTEM conductors identified, with several conductors coincident with significant structures and favourable lithologies for hosting iron-sulphide-copper-gold (ISCG) mineralisation

VTEM survey doubles the length of the Python conductor to around 700m long and identifies a new subparallel conductor 250m to the northeast

First ever detailed airborne electromagnetic survey over the Company's tenure in the prospective Mary Kathleen Domain

Ground truthing of the VTEM conductors is already underway to determine the possible source of the anomaly and prioritise follow-up ground geophysics ahead of potential drill testing

Mt Isa East – southwestern prospects

Significant historical workings untested by drilling or modern geophysics

Significant historical workings at Wonder Mine, Big Hill, and Blue Mantle prospects

Big Hill Mine ~140m long open-pit development, with **2.23% Cu in rock chips (MER034)** taken from spoil material

The Wonder Mine comprises three vertical shafts approximately 90m apart with a shallow open cut between the shafts

- rock chips up to **15.75% Cu, 0.25g/t Au and Ag 8.4g/t Ag (MER028)**
- fresh copper sulphides in stockpiles with rock chip results up to 7.33% Cu (MER031)
- mineralisation is developed on significant regional north-south shear zone open to the north

Wonder Mine shaft

Gooroo Cu-Au Project - WA

Extensive unexplored Greenstone Belt

Cooper is targeting Orogenic gold and copper-gold in the Gullewa Greenstone Belt

20km south of Silver Lakes Deflector mine (**1.2* Moz Au @ 13.5 g/t & 3Mt @ 0.8% Cu**)¹ and nearby to Recharge Metals Ltd (ASX: REC) Brandy Hill South prospect

Several historical gold deposits associated with northeasterly trending structures

Recent regional soil geochemistry by Cooper has identified gold anomalism associated with favourable structural trap sites interpreted from aeromagnetic data

Infill soil geochemistry completed, with assay results pending, and potential drill testing to find the source of the gold anomalies in 2022

Location of the Gooroo Project on simplified geology (GSWA 2020)

Soil sampling at Gooroo Project - March 2022

Yamarna Gold Project - WA

Along strike from Gold Road Resources (ASX: GOR) 6.16 Moz Gruyere gold deposit¹

~140 km north-east of Laverton in Yamarna Terrane WA

Yamarna Terrane- newly discovered gold region, remains underexplored

Cooper have two tenements totaling ~ 171sqkm hosting prospective greenstones

E38/3551 along strike from Gold Road's (ASX:GOR) 6.16 Moz Gruyere gold deposit¹ on Dorothy Hills Greenstone Belt

E38/3580 is on the Yamarna Greenstone Belt, which is to host to multiple Au deposits along the Yamarna Shear Zone

Cooper Metals - Key Takeaways

RC drilling intersects significant shallow Cu-Au mineralisation at King Solomon

IP chargeability anomalies indicates exciting additional targets, down dip, adjacent to and along strike from known Cu-Au mineralisation at King Solomon 1, 2 and 3, suggesting a much larger mineralised system than previously indicated

Large detailed VTEM survey has rapidly generated new EM anomalies and is building a strong pipeline of early-stage targets to follow up

RC drilling to commence in late July at King Solomon Cu-Au prospect

Well funded and year-round news flow from three Projects

Cooper Metals Ltd

ACN: 647 594 956

This announcement has been approved and authorised to be given to the ASX by the Board of Cooper Metals Limited.

References & Competent Person Statement

References (For more details including and Table 1 Information refer to the following ASX announcements below)

Cooper Minerals Ltd Prospectus September 20, 2021

ASX: CPM: 1 December 2021: Early field work programs at Mt Isa East return rock chip assays up to 35.3% Cu and 7.96 g/t Au

ASX: CPM: 9 December 2021: Further strong assay results from Mt Isa East Cu-Au Project

ASX: CPM: 31 January 2022: December 2021 Quarterly Activities Report

ASX: CPM: 7 February 2022: Follow-up rock chip sampling continues to demonstrate wide-spread Cu and Au mineralisation at Mount Isa East

ASX: CPM: 23 March 2022: Binding agreement signed to acquire a strategic tenement at the Mt Isa East Project

ASX: CPM: 2 March 2022: High powered ground geophysics identifies robust conductor at Mt Isa East Cu-Au Project

ASX: CPM: 23 June 2022: Significant shallow copper mineralisation discovered at King Solomon

ASX: CPM: 30 June 2022: Multiple VTEM conductors identified at Mt Isa East Cu-Au Project

ASX: CPM: 12 July 2022: IP identifies new targets at King Solomon Cu-Au prospect

Competent Person Statement

The information in this report that relates to Geological Interpretation and Exploration Results is based on information compiled by Ian Warland, a Competent Person who is a Member of The Australasian Institute of Mining and Metallurgy. Mr Warland is a Director of Cooper Metals. Mr Warland has sufficient experience that is relevant to the style of mineralisation and type of deposit under consideration and to the activity being undertaken to qualify as a Competent Person as defined in the 2012 Edition of the 'Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves'. Mr Warland consents to the inclusion in the report of the matters based on his information and the form and context in which it appears.
