ClearVue Executes Binding Canva HQ Subcontract

Formal subcontract agreement converts previously announced Letter of Intent into a binding commercial contract for the Canva headquarters project.

30 July 2026 – **Perth, Australia** – Smart building materials company **ClearVue Technologies Limited (ASX: CPV | OTCQX:CVUEF) (ClearVue** or **the Company)** is pleased to announce it has executed a formal subcontract agreement from Infinity Constructions Group for the supply and installation of its building-integrated photovoltaic (BIPV) products for the Canva headquarters development in Surry Hills, Sydney.

The executed subcontract formalises the Letter of Intent announced by the Company on 28 May 2026 and establishes the commercial terms for delivery of the project.

Under the agreement, ClearVue will supply and install approximately 660m² of integrated solar products across the development, including Solar Skylights, Solar Balustrades and a rooftop solar array.

Based on the current project design, the installed systems are expected to provide approximately 75kW of installed generation capacity and generate around 88,000kWh of electricity annually. The integrated energy generation will contribute to the building's targeted NABERS Energy rating.

The products have been specifically engineered to meet the project's architectural and technical requirements, including:

- Custom Solar Balustrades incorporating ClearVue's latest Thermal Management Junction Box, designed with concealed wiring and a waterproof framing system suitable for landscaped environments.
- Trafficable Solar Skylights featuring advanced solar control coatings to reduce heat transmission and glare while maintaining a comfortable internal environment.
- A rooftop solar array integrated within the building's planter box system, together with a bespoke cable management solution designed to meet the project's waterproofing requirements.

The contract value is expected to be approximately **A$600,000**, with project delivery anticipated within approximately **180 days** of commencement.

Chief Executive Officer & Managing Director Doug Hunt said:

"Execution of this subcontract marks the transition of the Canva headquarters project from the previously announced Letter of Intent to a binding commercial agreement. The project demonstrates ClearVue's ability to deliver customised building-integrated photovoltaic solutions that meet the architectural and technical requirements of major commercial developments. We look forward to working with Infinity Constructions Group to successfully deliver the project."

ABOUT CLEARVUE TECHNOLOGIES LIMITED

ClearVue Technologies Limited (ASX: CPV; OTCX: CVUEF) is an Australian technology company that integrates solar technology into building façade and rooftop surfaces to provide renewable energy generation and offset the operational carbon footprint of buildings. The Company's advanced, patented glass technology preserves glass transparency maintaining building aesthetics while generating energy.

ClearVue has extended solar energy-generation to vision glass, cladding, spandrel, balustrade, and skylight solutions. These solutions can offset operational energy requirements significantly contributing to the net zero building.

ClearVue's integrated solar façade is revolutionizing the way buildings are designed, constructed, and renovated. Experience how building façades will become a major contributing factor to reducing operational carbon by visiting ClearVue at www.clearvuepv.com.
