ASX ANNOUNCEMENT

JUNE 2018 - QUARTERLY ACTIVITIES REPORT

The Company is continuing to review the short term commercialisation of its Oakdale Graphite Project located on the Eyre Peninsula in South Australia. The Company however is continuing to explore off-take and other strategic agreements for its graphite and is seeking to identify and commence discussions with potential users for its graphite products.

As previously announced Mineral Resource calculations have been completed for the Oakdale Project and the Oakdale East prospect contains 6.3 million tonnes at a grade of 6.3% TGC. The metallurgical test work carried out to date has indicated that a +90% graphite float concentrate could be achieved with 84% recovery of the contained graphite.

The African Mineral Sands project has been terminated as agreement could not be reached on the pathway forward. The 7,500,000 shares issued to nominees of Africa Mineral Sands will be bought back for nil consideration, subject to shareholder approval and will be cancelled.

For further information please contact John Lynch on (07) 3624 8188
