ASX / Media Release

## **EXOMA Opens Brisbane Office to support exploration activities**

#### HIGHLIGHTS

- **Brisbane Office opens to support Galilee Basin exploration activities.**
- **Key staff appointments made in exploration, operations and administration.**

**Exoma Energy Limited (ASX:EXE)** has opened an office in Brisbane as it prepares to gear up for the first phase of an extensive drilling program on its 100% held Galilee Basin Coal Seam Gas and Shale Gas ATP's in Central Queensland, in the area surrounding Longreach.

Longreach's five ATP's, comprising 26,840 km<sup>2</sup> of contiguous ground, are the largest permit holding in the Galilee Basin and will be developed for Coal Seam Gas (CSG) and Shale Gas (refer to the attached map).

Dr Josh Whitcombe has joined the Company as Operations Manager, Mr. Paul Lipski as Exploration Manager and Ms Libby Lincoln has been appointed Administration Manager.

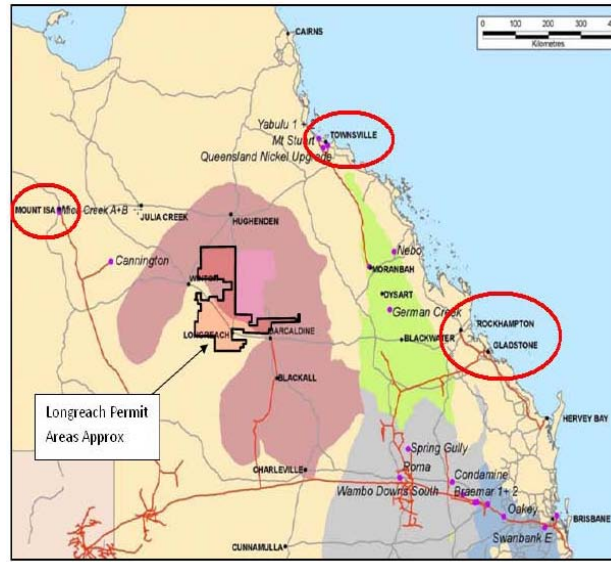

Dr Whitcombe has extensive drilling and completions experience in Australia and internationally having previously worked with Westside Corporation, Santos and Shell International. After returning to Australia from a period with Shell E & P in the UK, he has worked exclusively on coal seam gas projects in Queensland's Bowen and Surat basins.

Mr. Paul Lipski has previously worked in similar capacities for Bow Energy, Avery Resources, Beau Canada and Magellan Petroleum.

Ms Lincoln has a strong background in administration having worked for Arrow Energy for some years and BMA where she has developed, implemented and managed systems and processes for the administration of exploration activities.

Exoma is building its team to accelerate exploration over the 26,000 Km<sup>2</sup> of coal seam gas and shale gas acreage it holds in the Galilee Basin. (Map 1)
