16,000M DRILLING CONTRACT SIGNED FOR KITOTOLO LITHIUM PROJECT

- *Force signs drilling contract for maiden AirCore-RC and diamond drilling program to proceed at the Kitotolo Lithium Project.*
- *Program to comprise an initial approx. 150-hole, 15,000m AirCore-RC program to be followed with a 1,000m diamond drilling program.*
- *Drilling program to be completed by Equity Drilling, who were appointed by the Company on 28 March 2018 to complete at the Company's 51% owned Kanuka Lithium Production Project and who are already well established and operating in the Manono region.*
- *Drilling follows up on the high-grade lithium mineralisation results at the Kitotolo Lithium Project confirmed from the Company's Phase 1 trenching and test pitting exploration programs and assay results undertaken in the December 2017 quarter.*
- *The initial drilling program will target unweathered pegmatite zones that have been identified by the Phase 1 exploration programs and to confirm the extent of near surface lithium mineralization that has already been defined over a +1km strike length.*
- *The 1,000m HQ diamond drilling program planned will further test the immediate on-strike extensions of the +1km long mineralised pegmatite at the Kitotolo Lithium Project and target down dip extensions.*
- *Drilling program is in addition to the 3,000m AirCore-RC and diamond drilling program at the Kanuka Lithium Production Project that was announced on 28 March 2018.*
- *Drilling to commence immediately upon completion of the 50-hole AirCore-RC drilling that Equity Drilling are completing at the Company's Kanuka Lithium Production Project.*
- *Force has now committed to a combined 20,000m of AirCore-RC and diamond drilling across its Kitotolo and Kanuka Lithium Projects to be completed over the next 6 months.*

Force Commodities Ltd (**Force** or the **Company**) (ASX Code: **4CE**) is pleased to confirm that it has entered into an agreement with Equity Drilling Limited to complete the first AirCore-RC and diamond drilling program at its Kitotolo Lithium Project, located in in Tanganyika Province in the south east of the Democratic Republic of Congo (**DRC**).

The drilling program will comprise an initial 150 holes for approx. 15 000m of AC-RC drilling designed to test the fresh in-situ geochemistry and to follow up on the high-grade lithium mineralisation results from the test-pitting and trenching work completed at the Kitotolo Lithium Project by the Company's geological team during its Phase 1 exploration work completed between September 2017 and December 2017.

Figure 1, 2 and 3: Pegmatite hosting spodumene mineralisation identified on site at the Kitotolo Lithium Project

Figure 4: Katamba Pit with historical artisanal mining activity and where +1km of pegmatite exposures have been mapped

The drilling program at the Kitotolo Lithium Project will be completed by Equity Drilling.

Equity Drilling was appointed on 28 March 2018 to undertake the maiden 3,000m AirCore-RC and diamond drilling at its Kanuka Lithium Production Project, following execution by the Company of the formal joint venture agreement and associated documentation with its joint venture partner Kanuka Mining Company SARL and Mining Mineral Resources SPRL on 27 March 2018.

Equity Drilling are currently operating in the Manono region, in addition to the drilling program at the Kanuka Lithium Production Project, they have four diamond drill rigs completing diamond drilling on AVZ Mineral's (ASX: AVZ) Manono Lithium Project, approx. 40km north west of the Kitotolo Lithium Project.

Upon completion of the initial 3,000m AirCore-RC drilling program at the Company's Kanuka Lithium Production Project, Equity Drilling will relocate the dedicate AirCore-RC drill rig to commence the maiden drilling program at the Kitotolo Lithium Project. The AirCore-RC drilling program at the Kitotolo Lithium Project will initially be focused on the Katamba Pit where historical artisanal workings have allowed the Company to map over 1km of mineralised pegmatite.

The initial AirCore-RC drilling at the Kitotolo Lithium Project is expected to be completed by the second-half of the September 2018 quarter.

Following completion of the initial AC-RC drill program, the Company will complete a 1,000m HQ diamond drilling program that is planned to target down dip extensions as well as testing the immediate on-strike extensions of the pegmatites identified during the Phase 1 and the maiden AirCore-RC drilling program. This will also assist in characterising any mineralised zones as well as structural information and further exploration targets.

In addition to the planned drilling programs at the Kanuka and Kitotolo Lithium Projects, the Company is also pleased to confirm that field camp construction activities at the Kanuka Lithium Project are advancing to allow its geological team to maximise on-site activities efforts in completing further detailed mapping and regional geochemistry sampling programs.

END

Force Commodities Limited

Competent Person Statement

The information in this release that relates to sampling techniques and data, exploration results, geological interpretation and Exploration Targets, Mineral Resources or Ore Reserves has been compiled by Mr James Sullivan is a member of the Australian Institute of Geoscientists. Mr Sullivan is engaged by Force Commodities as a consultant geologist.

Mr Sullivan has sufficient experience of relevance to the styles of mineralisation and the types of deposits under consideration, and to the activities undertaken, to qualify as a Competent Person as defined in the 2012 Edition of the Joint Ore Reserves Committee (JORC) Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Sullivan consents to the inclusion in this report of the matters based on information in the form and context in which it appears.

Forward looking statements

Information included in this release constitutes forward-looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as “may”, “will”, “expect”, “intend”, “plan”, “estimate”, “anticipate”, “continue”, and “guidance”, or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward looking statements are based on the Company and its management’s good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company’s business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company’s business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company’s control.

Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the company does not undertake any obligation to publicly update or revise any of the forward looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.
