TSHIMPALA PROJECT – RC DRILLING UPDATE

Figure 1: Georoc Pty Limited's RC Drilling Rig at the Tshimpala Project in Malawi

Force Commodities Limited (**Force** or the **Company**) (**ASX Code: 4CE**) advises that the Company's maiden reverse circulation (**RC**) drilling program at the high-grade lead and silver Tshimpala Project located in the Dowa District of the Republic of Malawi (**Tshimpala Project**) remains on track for completion later this quarter.

In August 2019, the Company announced (refer ASX Announcement dated 21 August 2019) that it had entered into an agreement with South African based drilling and exploration specialists Georoc Pty Limited (**Georoc**), for the completion of an approx. 150 hole drilling program that will comprise an initial 2,000m of reverse circulation (**RC**) drilling of 140mm width holes. The RC drilling program is targeted fence drilling along the strike of the targeted mineralization.

A further 500m of RC drilling is planned to immediately follow based on the initial results.

The current drilling program predominantly comprises holes to depths of up to 25m depths.

A number of additional deeper holes have also now been incorporated into the drilling program to test potential extensions to mineralisation at depths of up to 75m.

Figures 2 and 3: RC drilling at the Tshimpala Project's Small Canyon Prospect

The RC drilling program is on schedule to be completed in the current quarter and follows the upgrade of road and the bridge infrastructure that the Company's contractors commenced in October 2019.

Drill pads and minor drill access roads have also been completed under the Company's civil engineering and construction contract with Malawian based, Shire Construction Limited.

The RC drilling program is currently focused on Exclusive Prospecting License EPL 0479 – and at the Grand Canyon, Small Canyon and Riverside Prospects.

The program is targeting interpreted multiple zones of parallel, shallow mineralisation at these three defined prospects and where individual strike lengths of up to 500m.

The Company's ongoing drilling, exploration and site construction activities are being completed with the full support of the local communities, tribal authority and Dowa district council.

In parallel with the ongoing RC drilling program, the Company is also completing trenching, pitting and pre-stripping at the Grand Canyon and Small Canyon Prospects.

Samples from the RC drilling program and from the trenching and pitting will be despatched to South Africa for assaying at SGS South Africa Pty Ltd's facilities later this quarter and in early January. Assaying of previous grab samples have already been completed by SGS Australia Pty Ltd (refer ASX Announcement dated 8 October 2019) and it is proposed that the same testwork will be undertaken on the RC drilling samples.

The Company continues to maintain a dialogue with SGS representatives in Malawi, South Africa and Australia to ensure that the assay results will be received in the next quarter.

The Company will continue to update shareholders on the progress of its RC drilling and status of the sample assaying at the Tshimpala Project, as well as its other major exploration trenching work and planned pre-stripping of material at both the Small Canyon and Grand Canyon Prospects.

END

Forward looking statements

Information included in this release constitutes forward-looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as "may", "will", "expect", "intend", "plan", "estimate", "anticipate", "continue", and "guidance", or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.

Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company's actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licences and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.

Forward looking statements are based on the Company and its management's good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company's business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company's business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company's control.

Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the company does not undertake any obligation to publicly update or revise any of the forward looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.
