Drilling Recommences at Halls Peak Project

Critical Resources Limited (ASX: **CRR**) ("**Critical Resources**" or the "**Company**"), is pleased to announce that drilling has recommenced at its Halls Peak project in New South Wales.

Of the planned ~2,500m drilling program at the Gibsons prospect, five holes totalling ~650m have already been completed.

Visual Massive Sulphide intervals and disseminated sulphide mineralisation has been intersected in the first, second, third and fourth drill holes (see ASX announcements: 03 December 2021, 07 December 2021, 15 December 2021 and 21 December 2021).

Critical Resources Managing Director Alex Biggs said: "We are pleased to recommence drilling at Halls Peak. The drill campaign has so far provided excellent results and we continue to gain an increased understanding of the deposit. We look forward to completing the outstanding drill holes and updating the market with further results in due course."

Halls Peak Project Description

The 100% owned Halls Peak project is located in New South Wales approximately 45km South-East of Armidale in the New England Fold Belt, an area well known for its mineral endowment and production. The Halls Peak massive sulphide deposits were discovered in 1896 where near surface mining extracted high-grade Zinc, Lead, Copper and Silver. More recent near surface exploration has been conducted by Precious Metal Resources Limited, Sovereign Gold Company Limited (now Critical Resources Limited) and Force Commodities Limited (now Critical Resources Limited) yielding high-grade intercepts to a depth of approximately 150m at the Gibsons prospect. Some near surface historic mining has occurred around the Sunnyside prospect. Previous drilling results includes:

Halls Peak is considered to have potential to contain world class deposits similar to those already being mined in north Australia. The project area comprises multiple historic mines and prospects including Gibsons, Sunnyside, Firefly, Faints, Khans Creek, Keys and Mickey Mouse. All current exploration activities are focused on exploration licence EL 4474 with primary targets being the Gibsons and Sunnyside prospects. A summary of the project location is shown in Figure 1.
