

ASX Announcement

Clara Fault Drilling

D'Aguilar Gold has received initial results for the shallow drilling program on the Clara Fault zone on its wholly owned Tableland mining lease near Kilkivan, southeast Queensland. The results indicate a broad, persistent and mineralised structure with extensive gold anomalism up to 3 metres at 1.56 grams per tonne in drill hole DP15 (Tablelands West Prospect). The broader zones of mineralisation include 12 metres at .45 grams per tonne gold in DP11 (Commercial Prospect), between 30 and 42 metres and a zone of 15 metres at 0.55 grams per tonne including 3 metres at 1.56 grams per tonne between 12 and 27 metres depth in DP15. Table 1 sets out the detailed results. A total of 1,500 metres were drilled in 18 reverse circulation percussion drill holes.

The results substantiate the prospectivity of the Clara Fault and the Company intends to test deeper targets indicated at 150 to 200 meters below the Tablelands Pit, on the prognosed intersection of the Tablelands and Tablelands West ore bodies. Sampling of existing trenches on the New Zealand prospect, located on the Clara Fault identified a broad zone of anomalous gold mineralisation and a core zone of 6 metres @ 1.7 g/t gold.

Mineralised zones were characterised by anomalous silver copper and bismuth, indicating an intrusive related source for the mineralisation. Mineralised zones are generally blind at surface and are largely devoid of quartz veins. The host is a sheared arsenopyritic serpentinite between the Black Snake Porphyry to the east and Devonian metabasalts to the west.

D'Aguilar is continuing to assess numerous drilling targets and prospects in the D'Aguilar Gold Project over an area 2,000 square kilometres for follow up drilling over the next year.

The Company is currently negotiating drilling contracts for a further 5,000 meters of reverse circulation and diamond core drilling.

This announcement has been prepared by Nicholas Mather BSc Hons Geol, a person with over five years experience in the area reported on. Further information on the Company maybe reviewed on the company website www.daguilar.com.au or by calling Mr Nicholas Mather, Managing Director or Mr Duncan Cornish, Secretary on +61 7 3839 5113.

Yours Faithfully

D'Aguilar Gold Ltd
 D P Cornish, Company Secretary
