ASX RELEASE

DroneShield's DroneGun Successfully Passes the French Military DREP Standards

- DroneShield's DroneGun has successfully passed the French Military's Dangers des Rayonnements Electromagnétiques sur les Personnels ("DREP") test, which measures electromagnetic emission levels on human users.
- The certification is a requirement for deploying DroneGun with the French military.
- The certification is valid for other European countries.

DroneShield Ltd (ASX:DRO) ("DroneShield" or the "Company") is pleased to announce its DroneGun product has been certified as compliant under the French military's Dangers des Rayonnements Electromagnétiques sur les Personnels ("DREP") test, which measures electromagnetic emission levels on human users.

The test is part of the French defence procurement processes. It is also accepted by other European countries.

A video on DroneGun, shot on location of a military demonstration can be viewed at www.droneshield.com/videos.

DroneShield has been actively trialling DroneGun with a number of militaries globally over the recent months, as drone deployments in armed conflicts continue to rise rapidly.

The Company is presently in a number of government sector procurement processes internationally. Status updates on these processes will be provided as they become available.
