ASX RELEASE

Order from European Ministry of Defence

DroneShield Ltd (ASX:DRO) ("DroneShield" or the "Company") is pleased to announce an order for the Company's RadarZero™ portable counterdrone system, powered by the DroneShieldComplete™ Command-and-Control ("C2") system, from a significant European military.

At \$100,000 in sales proceeds, this is an order for an evaluation, expected to lead to additional deployments with this Ministry of Defence customer.

RadarZero™ is a revolutionary ruggedised (IP68, -40C to +75C) metamaterials based radar, weighting only 1.25kg, enabling effective detection and tracking of nefarious drones. DroneShieldComplete™ C2 enables an intuitive user interface and a rich reporting functionality of drone threats.

Oleg Vornik, DroneShield's CEO, has commented, "The importance of this sale is several-fold. First, this is our first order from this European military. Secondly, this is the first sale of a radar-only fixed site system powered by DroneShieldComplete™, demonstrating the modularity of our offering. DroneShield is both a sensor manufacturer and an integrator, with the customer having ability to add further sensor loads to the acquired system, which DroneShieldComplete™ supports."

The sale is subject to pending relevant export approvals.
