Contract Award

DTI to Provide CCTV Surveillance Systems to London Underground Central Line

DTI Group Ltd (ASX: DTI) (DTI) is pleased to announce that it has been contracted to supply a CCTV surveillance solution for the prestigious Central Line fleet maintained and operated by Transport for London on the London Underground through UK integrator Delatim Limited.

The order involves the supply and installation of 680 digital video recorders (DVR) covering the entire Central Line fleet of vehicles. Each rail car will also be equipped with high-definition five-megapixel cameras providing a 360-degree panoramic view of the passenger area.

With an expected project value of approximately £2.0 million (A\$3.6 million), deliveries for the systems are expected to commence in the current financial year and will be supplied over a period of four years as the trains undergo refurbishment.

This award complements other project wins in the UK, in particular the London Underground Northern Line trains, and reinforces DTI's growing position in the global rail sector. DTI solutions will now be installed on two of the London Underground lines.

For further information please contact Peter Tazewell, Chief Executive Officer on +61 8 9373 2905 or email peter.tazewell@dti.com.au

About DTI Group

DTI provides sophisticated surveillance systems, solutions and services to the mobile security industry worldwide. DTI's clients are transit agencies, transit operators, freight operators, law enforcement authorities and taxi organisations which utilise a range of professional products and services that encompass on-board recording equipment, fleet management systems, back-end mass storage and retrieval facilities and end-to-end managed services. DTI is a recognised supplier to the mass transit surveillance market. Core technology development and system design activities are undertaken from the Company's headquarters in Perth Australia.

About Delatim

Based in London, Delatim Limited has become one of the leading Design, Build and Maintenance companies in the South East of England. Delatim has a wealth of experience in delivering projects, ranging from general works packages to the design and build of major systems projects.

About the Central Line

The Central Line is part of the London Underground rail network. It has 260 million passenger journeys per annum and rates as the busiest and most intensely used line on the Underground.
