UK's Network Rail (High Speed) Ltd is the latest infrastructure company to undertake workplace safety assessments with ViSafe

Melbourne, Australia: dorsaVi Ltd (ASX: DVL) has today announced that the UK's Network Rail (High Speed) Ltd will use dorsaVi's ViSafe to better understand movement associated with the work undertaken by its overhead contact system and track maintenance teams.

Network Rail (High Speed) Ltd are contracted to maintain and manage the track, infrastructure and three main stations along the route from the Channel Tunnel to St Pancras and place great focus on the safety and welfare of its workforce. To that end, they have moved to introduce ViSafe technology to objectively measure the stress and strain undertaken by its track and overhead contact system teams.

This is the second major rail network to use ViSafe in the UK with Transport for London, the operator of the London Underground rail network, undertaking multiple assessments to identify manual handling tasks that are contributing to increased risk of musculoskeletal injury. dorsaVi and Transport for London won the Design Innovation Award at the UK Rail Industry Awards last year for its ground breaking work to address workplace injury.

About dorsaVi

dorsaVi (ASX: DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in elite sports, occupational health and safety and clinical applications. dorsaVi believes its wearable sensor technology enables – for the first time – many aspects of detailed human movement and position to be accurately captured, quantified and assessed outside a biomechanics lab, in both real-time and real situations for up to 24 hours.

Our technology has applications across three sectors:

- **Clinical:** ViMove is transforming the management of patients by providing objective assessment, monitoring outside the clinic and immediate biofeedback. ViMove is currently used by medical and physiotherapy practices in Australia, the United Kingdom, and the United States.
- **Elite Sports:** ViPerform is allowing coaches and medical teams managing elite athletes and teams to screen athletes and provide objective evidence for decisions on return to play, measure biomechanics and provide immediate biofeedback out on the field, tailor and track training programs and optimise technique and peak performance. ViPerform is being used by AFL and NRL clubs, Cricket Australia, and the Australian Institute of Sport (AIS) in Australia. Barclays Premier League (EPL) clubs in the UK and US based sports clubs from the National Basketball Association (NBA), the Major Soccer League (MLS) and the National Football League (NFL) as well as various Olympic teams and athletes internationally.
- **OHS:** We combine innovation, measurement, and quality to reduce workplace incidents, costs, meet compliance and improve brand reputation. ViSafe enables employers to assess risk of injury for employees as well as test the effectiveness of proposed changes to workplace design, equipment or methods based on objective evidence. ViSafe has been used by major corporations including Sodexo, London Underground, Vinci Construction, Crown Resorts, Caterpillar (US), Monash Health, Coles, Woolworths, Toll, Toyota, Orora (formerly Amcor), Crown and BHP Billiton. Australian Workplace Compliance delivers risk mitigation through compliance to OHS, Quality Management Systems, Company Policy and Process.
