## **Kieser Australia signs three-year deal to use ViMove2 across its clinical network**

**Melbourne, Australia:** dorsaVi Ltd (ASX: DVL) has today announced that Kieser Australia has signed a three-year deal worth more than \$150K which will see the recently launched ViMove2 rolled out across its network of nine centres in Melbourne and Sydney.

Kieser Australia was established in 2006 and is a network of integrated physiotherapy, rehabilitation and strength training centres predicated on the core principle of 'Strength for Health'. Eight of the nine centres are located in Melbourne. In 2016 Kieser opened its first Sydney centre with further expansion plans.

The management of back pain is one of the largest parts of Kieser's business. All back pain clients will have movement analysis with ViMove2 as part of their treatment and training program.

"I can't believe any forward thinking allied health professional wouldn't be looking to embed dorsaVi technology into their treatment protocols. The quality of data captured by ViMove2 allows for highly patient specific treatment plans and ultimately better and more sustainable results," said Tony Smith, Managing Director, Kieser Australia.

"The decision to move our clinics to ViMove2 was incredibly simple. We took it out of the box and could use it immediately with no training. As a user of the previous system we were really excited to see the magnitude of the improvements in usability and the reporting outputs."

ViMove2<sup>TM</sup> was released recently in Australia and features smaller, faster, and easier to use sensors, together with a simplified software interface, improved reporting tools, out of clinic monitoring, comprehensive exercise video library, and a patient app.

The patient app, myViMove, delivers assessment reports, customised exercise programs and data collection for out of clinic monitoring and is designed to engage patients in their treatments.

"This is our first large deal for ViMove2 following the Australian launch just a few weeks ago and I'm excited about the market's enthusiasm and ease of uptake for this new device," said Dr Andrew Ronchi, Chief Executive Officer, dorsaVi.

***About dorsaVi***

dorsaVi (ASX: DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in elite sports, occupational health and safety and clinical applications. dorsaVi believes its wearable sensor technology enables – for the first time – many aspects of detailed human movement and position to be accurately captured, quantified and assessed outside a biomechanics lab, in both real-time and real situations for up to 24 hours.

Our technology has applications across three sectors:

- **Clinical:** ViMove is transforming the management of patients by providing objective assessment, monitoring outside the clinic and immediate biofeedback. ViMove is currently used by medical and physiotherapy practices in Australia, the United Kingdom, and the United States.
- **Elite Sports:** ViPerform is allowing coaches and medical teams managing elite athletes and teams to screen athletes and provide objective evidence for decisions on return to play, measure biomechanics and provide immediate biofeedback out on the field, tailor and track training programs and optimise technique and peak performance. ViPerform is being used by AFL and NRL clubs, Cricket Australia, and the Australian Institute of Sport (AIS) in Australia. Barclays Premier League (EPL) clubs in the UK and US based sports clubs from the National Basketball Association (NBA), the Major Soccer League (MLS) and the National Football League (NFL) as well as various Olympic teams and athletes internationally.
- **OHS:** We combine innovation, measurement, and quality to reduce workplace incidents, costs, meet compliance and improve brand reputation. ViSafe enables employers to assess risk of injury for employees as well as test the effectiveness of proposed changes to workplace design, equipment or methods based on objective evidence. ViSafe has been used by major corporations including Sodexo, London Underground, Vinci Construction, Crown Resorts, Caterpillar (US), Monash Health, Coles, Woolworths, Toll, Toyota, Orora (formerly Amcor), Crown and BHP Billiton. Australian Workplace Compliance delivers risk mitigation through compliance to OHS, Quality Management Systems, Company Policy and Process.
