## **UK-based ASM Technologies signs three-year myViSafe deal valued at \$550k AUD**

**Melbourne, Australia:** dorsaVi Ltd (ASX: DVL) announces that ASM Technologies Limited, on behalf of a major UK transport infrastructure organisation, has signed a three-year deal with dorsaVi for 64 myViSafe kits. The organisation will be using myViSafe to support its efforts in self-managing manual handling risks in the field and facilitating changes in manual handling behaviours among their workforce. ASM Technologies is a distribution and procurement provider in the UK.

dorsaVi has received a purchase order and a signed contract from ASM Technologies. ASM Technologies has been invoiced for the full amount of £293,760 GBP (\$550k AUD) and this amount will be paid up front. The revenue will be recognised in 36 equal monthly instalments of £8,160 GBP with the first instalment to be recognised on delivery of the myViSafe kits in early Q4.

“This is our largest rollout of myViSafe to a single organisation to date and I’m delighted to see myViSafe being incorporated into this large-scale workplace safety program. The myViSafe product has been built as a scalable solution for small, medium and large organisations to self-manage manual handling injuries and aligns well with dorsaVi’s strategy to build recurring revenue.” said Dr Andrew Ronchi, Chief Executive Officer, dorsaVi Ltd.

### ***About dorsaVi***

dorsaVi (ASX: DVL) is an ASX company focused on developing innovative motion analysis device technologies for use in clinical applications, elite sports, and occupational health and safety. dorsaVi believes its wearable sensor technology enables – for the first time – many aspects of detailed human movement and position to be accurately captured, quantified, and assessed outside a biomechanics lab, in both real-time and real situations for up to 24 hours.

Our technology has applications across three sectors:

- **Clinical:** dorsaVi is transforming the management of patients with its clinical solutions - ViMove, ViMove2 and Professional Suite – which provide objective assessment, monitoring outside the clinic and immediate biofeedback. dorsaVi is currently used by medical and physiotherapy practices globally.
- **Elite Sports:** ViPerform is allowing coaches and medical teams managing elite athletes and teams to screen athletes and provide objective evidence for decisions on return to play, measure biomechanics and provide immediate biofeedback out on the field, tailor and track training programs and optimise technique and peak performance. ViPerform is being used in the US by the National Basketball Association (NBA), the Major Soccer League (MLS) and the National Football League (NFL), by the AFL and NRL clubs and by Barclays Premier League (EPL) clubs, England and Wales Cricket Board and the Board of Control for Cricket in India as well as various Olympic teams and athletes internationally.
- **Occupational Health and Safety (OHS):** dorsaVi enables employers to assess risk of injury for employees as well as test the effectiveness of proposed changes to OHS workplace design, equipment or methods based on objective evidence. dorsaVi has been used by major corporations including Sodexo, London Underground, Vinci Construction, Crown Resorts, Caterpillar (US), Monash Health, Coles, Woolworths, Toll, Toyota, Orora (formerly Amcor), Crown and BHP Billiton.
