

**ASX Release January 24, 2007**

**Mobi Limited ACN 009 805 298 (ASX:MBI)**

**CLARIFICATION TO MOBI SHAREHOLDERS IN RESPECT TO PRESS ARTICLES ABOUT ENGIN LIMITED (ASX:ENG)**

The Board of Mobi Limited (ASX:MBI) has received a number of calls from Mobi Limited shareholders over the last thirty six hours. These calls specifically relate to articles in various Australian newspapers and on line articles that state Engin Limited is the first company to offer mobile VoIP services in Australia to its customers. We believe this information to be factually incorrect and we have requested that Engin Limited remedy these apparent misstatements.

As a point of absolute clarification to Mobi Limited Shareholders, and in the absence of any doubt, FABfone Pty Ltd, [www.fabfone.com.au](http://www.fabfone.com.au), a wholly owned subsidiary of Mobi Ltd has been offering a seamless commercial mobile VoIP solution to its customers and employees since mid 2006. Accordingly, and as reported to shareholders on October 10, 2006 and October 17, 2006, the FABfone service appears to predate the Press reported Engin Limited service.

Therefore, without knowing of other mobile VoIP providers in existence, this would make Mobi Limited the first company to offer mobile VoIP services in Australia to its customers.

**About Mobi Limited**

Mobi Ltd provides mobile phone applications and Voice over Internet Protocol (VoIP) systems to businesses and home users. Currently comprised of two key divisions:

- **MobiData Group**
- **FABfone**

**MobiData-Group** offers a unique applications and solutions platform around its Mobile Services Hub. The Mobile Services Hub enables customers to deploy enterprise and consumer applications quickly, easily and affordably - typically two to three months with no major capital outlay.

**FABfone** provides Internet telephony applications for businesses and home users. FABfone provides a suite of VoIP based products, from basic VoIP systems through to fully functional soft PBX solutions, integrating mobile phone solutions with VoIP capabilities on a single billing platform.
