

ASX Release May 25, 2007

Mobi Limited ACN 009 805 298 (ASX:MBI)

New Director – International Expansion

The Board of Directors of Mobi Limited has pleasure in announcing certain significant changes to the Company's management structure. These changes are in accord with our business model previously shared with the Market and allow us to facilitate our international roll out sooner rather than later and affords us further independent corporate governance.

We are delighted to welcome Mr. Nicholas Pike to the Board as a Non Executive Director. Mr. Pike resides in the United Kingdom. He is experienced internationally in building large companies with positive cash flows and overseeing the management of a substantial investment portfolio principally based in London. He is to assist us in spearheading our European point of entry and selecting a household name partner to joint venture with us in both our IP Telephony and Mobile Software endeavors.

Karl Morris has stepped down from the Board and has become CEO of our Mobile Software development arm. This has been decided to allow Mr. Morris to focus on monetizing this specific area of our enterprise. Our business model in India has shown us that we have the ability to grow a large footprint in this space globally. We now wish to take advantage of this opportunity and garnish market share. Mr. Morris has an MBA in virtual communications and specializes in this area.

Garry Sholl, our current Non Executive Director, will take up the Executive position of CEO. Again, this aligns with our plans to complete the acquisition of Sholl Communications at our forthcoming EGM. We are looking forward to benefiting from his 20 years of management experience and this appointment allows for a smooth transitory acquisition if passed at our EGM.

Yours sincerely,

Fabio Pannuti
Chairman

About Mobi Limited

Mobi Ltd provides mobile phone applications and Voice over Internet Protocol (VoIP) systems to businesses and home users. Currently comprised of two key divisions:

- **MobiData Group**
- **FABfone**

MobiData-Group offers a unique applications and solutions platform around its Mobile Services Hub. The Mobile Services Hub enables customers to deploy enterprise and consumer applications quickly, easily and affordably - typically two to three months with no major capital outlay.

FABfone provides Internet telephony applications for businesses and home users. FABfone provides a suite of VoIP based products, from basic VoIP systems through to fully functional soft PBX solutions, integrating mobile phone solutions with VoIP capabilities on a single billing platform.
