ESI WINS WATER CONTRACT IN WESTERN AUSTRALIA

Environmental Solutions International (ESI) has been awarded the contract for the design, construction and commissioning of Dalyellup Water Treatment Plant Stage 2 in Western Australia. The contract, awarded by the Water Corporation, is valued at approximately \$2.6 million.

The new 6 ML/day plant will provide high quality potable water for the city of Bunbury in WA's south west and will replace the existing smaller plant. The single structure plant incorporates a number of design innovations that reduced capital cost and will improve the overall plant operability. Due to the current water situation in Western Australia the construction programme for the Dalyellup plant is very tight and it is imperative that the plant be operational by October 2003.

ESI Managing Director, Denis Glennon AO, said "The award of the Dalyellup Water Treatment Plant represents further development of ESI's potable water business. ESI has become a prominent player in the provision of wastewater treatment solutions to clients throughout Australia and overseas. The company is now gaining increasing recognition for its potable water treatment capabilities. The Dalyellup contract follows similar success at Douglas Shire, Goondiwindi and Beaudesert in Queensland, Longford in Tasmania, and Broken Hill in NSW."

For more information, please contact Mr Denis Glennon on Tel: (08) 9470 4004 or Fax: (08) 9355 0998 or email: lornaf@environ.com.au.
