

SITE PREPARATION COMMENCED AT LEPIDOLITE HILL LITHIUM PROJECT

Highlights

- **Earthworks program underway for maiden drilling at Lepidolite Hill Lithium project**
- **Drilling expected to commence in the first half of February**

Eastern Resources Limited (“Eastern Resources” or the “Company”) is pleased to announce that the Company has engaged a drilling company to undertake the Company’s maiden drilling program at the Lepidolite Hill Lithium Project (“Project”).

This program will target lithium rich pegmatites in the area between the existing Lepidolite Hill pit and Tantalite Hill, and to test the east of Signal Hill towards Future Battery Minerals’ (FBM’s) Kangaroo Hills spodumene pegmatite project.

Site preparation works have commenced to ensure drilling to be conducted in the first half of February.

Figure 1: Commencement of site preparation over Lepidolite Hill Project

LEPIDOLITE HILL LITHIUM PROJECT

The Lepidolite Hill Lithium Project is strategically located in the Southern Yilgarn lithium belt. The Project is located approximately 18 km south-southwest of Coolgardie WA, and 32 km west of the Mt Marion Lithium mine.

The Project was a historical old lepidolite and petalite mine in the early 1970's. Lepidolite-rich pegmatites are common in the Lepidolite Hill project area.

An exploration drilling programme conducted by Lithium Australia in 2019 discovered further lithium mineralisation at the Project. Pegmatite horizons were encountered in all drill holes and visual lepidolite and/or petalite and zinnwaldite were recorded in 19 out of the 35 drill holes, with an outstanding result of lithium bearing pegmatite grading 18m @ 1.45% Li_2O from 5m within drill hole LHRC023. Mine stockpiles and limited drilling has confirmed high grade lithium, tantalum and rubidium.

The Project has significant potential for further discoveries of lepidolite, petalite and spodumene. The Company's partner Yongxing Special Materials has strong demand for lepidolite and notes the promising test work completed by Lithium Australia which indicates potential for high recovery of lithium.

ABOUT EASTERN RESOURCES LIMITED

Eastern Resources Limited (ASX: EFE) is an Australia based ASX-listed, emerging lithium focused exploration and development company.

The Company holds four lithium assets in WA as follows:

- 100% interest in the Trigg Hill Lithium-Tantalum project which is strategically located in the historical lithium-tin-tantalum district in the Pilbara,
- 70% interest in the Lepidolite Hill Lithium project located in Southern Yilgarn Lithium Belt (30% interest held by Lithium Australia),
- 100% interest in the Lake Johnston project located in the Southern Yilgarn Lithium Belt, and
- 100% interest in the Yalgoo West Lithium project located in Yalgoo lithium province

The Company is also developing the Nowa Nowa Iron project in East Gippsland, VIC.

The Company has formed a strategic partnership with Ya Hua International Investment and Development Co. Ltd, a wholly owned subsidiary of Yahua Group which is one of the largest Chinese lithium converters, to acquire and develop spodumene projects. The Company also has executed a Strategic Partnership Agreement with Yongxing Special Materials Technology Co. Ltd. ("Yongxing") to acquire and develop lepidolite projects. Yongxing is one of the major Chinese lithium converters using lepidolite concentrates as feed to produce battery grade lithium carbonate. These two strategic relationships provide Eastern Resources with excellent coverage over the primary lithium sources.
