## **EXCLUSIVE PRESSURE SEWER CONTRACT EXTENDED**

The Environmental Group Limited (EGL) is pleased to announce that its exclusive contract to supply pressure sewer equipment and services to East Gippsland Water has been extended for a further two years.

East Gippsland Water (EGW) is a leading regional water authority that services an area that encompasses 10% of Victoria in a region that features the highly regarded and environmentally sensitive Gippsland Lakes system. The authority is responsible for nine separate wastewater systems and the introduction of new sewerage schemes in a number of townships is underway.

EGW will install EGL's Eone pressure sewer systems at the seaside township of Marlo to service a new subdivision and to replace on-site effluent disposal systems that have not been able to operate efficiently due to poor soil and drainage conditions. Similarly, Eone systems will also be incorporated in a new sewerage scheme at Orbost as part of an EGW initiative to address non-performing on site systems.

With a strong commitment to being a leader in ecologically sustainable wastewater management, EGW has identified EGL's market leading Eone pressure sewer technology as being the optimal solution in terms of cost and environmental protection.

EGL looks forward to being of service to EGW in the areas of training, product supply and ongoing maintenance.

For further information, please contact Mr. Howard Johnson on (02) 8858 3499.
