Australian Stock Exchange Announcement

EGL Wins Major Additional Pressure Sewer Contract

The Environmental Group Limited (ASX:EGL) is pleased to announce it has won an exclusive 5 year contract to supply its market-leading E/One pressure sewer systems to Griffith City Council in NSW.

The pressure sewer systems will initially be used to sewer specified residential and industrial sub-divisions and may also subsequently replace certain on-site residential waste disposal systems.

The Griffith City Council's Director of Water and Sewerage, Mr David Tull, said EGL's package of products and services would provide council with new sewer infrastructure that was reliable, cost effective and environmentally responsible.

"As the regional centre of the Murrumbidgee Irrigation Area, Griffith City Council has a strong commitment to sustainable development because this aligns the interests of the community with the needs of the environment."

Griffith, which is located 570 kms south-west of Sydney, is a thriving regional centre with a population of approximately 25,000. The area features world-class wineries and is also Australia's biggest citrus grower.

For further information, please contact Mike Williamson on 02 8858 3499.

Mike Williamson
CEO & Managing Director.

EGL's E/One pressure sewer systems provide communities with a cost effective and environmentally superior alternative to traditional gravity and septic tank sewer systems.
