Dulhunty Power Wins Transmission Line Project in WA

Dulhunty Power (Aust) Pty Ltd, the Australian subsidiary of Dulhunty Power Limited (ASX: DUL) has recently been awarded a contract, valued in excess of \$400,000, to supply all line hardware for the Shotts to Wells 330kv high voltage Transmission Line in Western Australia.

Line hardware for the project will be manufactured in Dulhunty Power's Chinese and Thai factories, with vibration dampers to be made at Dulhunty Power's factory in North Ryde, Sydney.

The CEO of Dulhunty Power Australia, Mr Jack Roughan said,

"The award of this contract makes it seven out of seven for Dulhunty Power in the Transmission Line hardware market and comes on the back of winning six other significant transmission line Projects in the Australian market over the past two years."

Mr Tony Wingrove, Managing Director of Dulhunty Power Limited (ASX: DUL), praised the performance of the Australian arm of the company and its plants in China, Thailand and Malaysia, commenting that the DUL business model developed for its subsidiary is working exceptionally well. The company is keen to replicate this success in other areas of the power supply industry, several of which are currently under review.

Mr Martin Thomas

Chairman

About Dulhunty Power

Dulhunty Power Ltd (ASX: DUL) is a company focused on acquiring and developing businesses that supply to the electricity supply industry. It has exceptionally strong industry connections. It is the stated aim of Dulhunty Power to build a multi brand business that can meet the various demands of the electricity supply industry from electricity generation through transmission to distribution.

Its initial, and currently main subsidiary, Dulhunty Engineering Ltd (which trades under the Dulhunty Power brand) manufactures and distributes the fittings, hardware and insulators that underpin the reliable operation of electrical power transmission and distribution systems. The Dulhunty Power brand is most well known for its world leading range of vibration control products and its technical capability in measuring and resolving vibration control problems in transmission line applications.

Dulhunty Engineering has wholly owned manufacturing facilities in Australia, China, Thailand and a joint venture in Malaysia that service the Australian, New Zealand, Pacific, and North American markets and developing markets in Asia and North Africa. The company also has a subsidiary in New Zealand with full warehousing facilities. The company currently employs some 150 people across its operations.
