# Salave Gold Project – Court Ruling

EMC Gold Corporation (ASX: EM3; "EMC Gold" or "the Company") notes the recent ruling by the High Court of Asturias upholding the decision of the Tapia de Casariego Municipal Council not to consider the Company's proposed amendment to the municipal urban plan in respect of the Salave Project.

The Ruling is procedural in nature and does not relate to the technical, environmental or economic merits of the Project.

The Company welcomes the clarity provided by the decision and will continue to advance the Salave Project through ongoing engagement with local and regional stakeholders, while also assessing alternative pathways to support its development.

The Company remains confident in the long-term potential of the Salave Project and its ability to deliver significant economic and social benefits to the region.

## About EMC Gold

EMC Gold (ASX:EM3) is an exploration company with a global portfolio of exploration assets. The Company's flagship project is Salave, one of the largest undeveloped gold projects in Europe. Salave is 100 per cent owned by the Company and located in the north of Spain in the Principality of Asturias. For more information visit www.emcgold.com.au.

## About Salave Gold Project

The project has a Measured Mineral Resource of 1.6 million tonnes grading 3.82 g/t Au, containing 0.2 million ounces of gold; an Indicated Mineral Resource of 11.3 million tonnes grading 2.90 g/t Au, containing 1.06 million ounces of gold, plus Inferred Resources totalling 4.1 million tonnes grading 2.34 g/t Au, containing 0.31 million ounces of gold.

The information in this announcement that relates to the Mineral Resource estimate for the Salave project was released by the Company in its news release entitled ‘Updated Scoping Study Salave Gold’ dated 31 March 2025.

EMC Gold confirms that it is not aware of any new information or data that materially affects the information included in the original announcement and that all material assumptions and technical parameters underpinning the estimate in the previous announcement continue to apply and have not materially changed.

A full technical report summarising the Mineral Resource estimate completed by Bara Consulting is available on the Company’s web site (www.emcgold.com.au) and posted on SEDAR. In addition to the current Mineral Resource, historical exploration work suggests there is the potential for additional mineralisation within EMC Gold’s landholdings.
