CHAIRMAN'S LETTER

Dear Shareholder,

Australia has recently rescheduled select psychedelics to allow medicine-assisted therapy for some of our most challenging mental health conditions. The integration of drug treatment with therapy is enhancing patient outcomes and prolonging benefits but the preparations required to deliver these new treatments can be complex. Organisations skilled in both drug development and care delivery will be distinctly advantaged to address these challenges and advance the field further through an ability to innovate, refine, and even sculpt entirely new therapeutic strategies. Emyria, with its distinctive 3D model emphasising care Delivery, Data-driven insights, and drug Development, is uniquely positioned to pioneer in this field, and return substantial benefits for our patients and shareholders.

1. DELIVERY

We embarked on this journey with cannabinoids at our Emerald Clinics and observed that many of our patients, despite their primary complaints, also grappled with mental health challenges.

More recently, our commitment to delivering top-tier mental health care has taken an exciting leap forward with our planned acquisition of The Pax Centre, a leading multidisciplinary psychological trauma treatment centre. This strategic move is indicative of our vision. With The Pax Centre, we see a blueprint for an ideal care model, especially when introducing potent therapies like MDMA-assisted therapy. A clinical service, that can offer wraparound care before, during, and after experimental treatments, ensures that the patient journey is thorough, compassionate, and effective.

Combining the strengths of Emerald Clinics and the Pax Centre provides us with dual advantages: an expanded footprint in mental health allowing us to capture more diverse and comprehensive patient data to develop and refine new treatments and thereby deliver great patient outcomes. This model is important in our challenging investment market as it gives us a strong foundation to support our broader mental health treatment development ambitions.

2. DATA COLLECTION

Emyria is committed to robust data collection with our patients especially as we start to provide new and emerging treatments like MDMA- and psilocybin-assisted therapies. By harnessing the power of the world-class data platform, Palantir Foundry, we have delved deeper into patient data, deriving actionable insights that refine our treatment methodologies and guide our drug development programs. Every patient's experience is a lesson; with over 14,000 patients treated to date, our Real-World Data enhances our care delivery and underpins our drive towards the third dimension: Drug Development.

3. DRUG DEVELOPMENT

The ultimate goal of our commitment to ground breaking mental health solutions is to develop proprietary treatments with the potential to help patients globally. Drawing from our vast experience with cannabinoids, we are creating proprietary medicines, dose forms and therapy models.

A particularly exciting avenue of our work revolves around the development of MDMA analogues, undertaken in collaboration with leading medicinal chemistry experts from the University of Western Australia. This partnership is producing pioneering research and promising results. Currently, we are engaged in an extensive preclinical screening program with esteemed global institutions. Early indications from this program have identified promising lead series in two significant areas: a faster-acting MDMA and a potential medicine specifically designed to alleviate the common side effects associated with Parkinson's treatment. The Company however cautions investors that the preliminary results from this program remain subject to further analysis and validation and should not be relied upon in making an investment decision.

An integral part of Emyria's commitment to advancing mental health treatments is our Ultra-Pure CBD dose forms initiative. We've developed three high-potency, highly bioavailable solid oral capsules tailored to specific applications. EMD-RX5, our low-dose product, is in Phase 3 clinical trials and has garnered significant interest. Aspen Pharmacare Australia is our commercial partner for this over-the-counter offering. Meanwhile, our more potent dose forms, EMD-RX7 and EMD-RX9, are under rigorous evaluation at the U.S. National Institutes of Health (**NIH**). With additional funding, we anticipate taking these formulations into Phase 1 trials next year, targeting prescription indications to cater to more specific therapeutic needs. The Company however cautions investors that this timing is indicative only and is subject to change and the Company

obtaining further funding. There are no guarantees that the Company will be able to obtain further funding on terms satisfactory to the Company, or at all. Investors should refer in particular to Section 4.1(a) regarding the Company's future capital requirements.

Our 3D model is aimed to help us make a positive impact for patients while also setting us up to lead in the delivery and development of new treatments. This is especially relevant as Australia recognises MDMA and psilocybin as legal medicines.

With wraparound clinical services at the core, we are setting the stage for not just enhanced patient outcomes, but also for creating intellectual property with vast global potential – we believe this is great for patients and our shareholders.

Your participation in this Entitlement Offer will help Emyria accelerate our programs and we are glad to have your support on this journey.

Warm regards,

Dr Stewart Washer
Executive Chairman, Emyria

What are the risks of a further investment in the Company?

Section 4

Potential investors should be aware that subscribing for New Securities in the Company involves a number of risks. The key risk factors of which investors should be aware are set out in Section 4, including (but not limited to) risks in respect of:

(a) **Additional Capital Requirements**

The Company will require further financing in the future, in addition to amounts raised pursuant to the Offer. It is also possible further capital may be required at an earlier stage if any risks, including those described in this Section 4 materialise. Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the then market price (or Offer Price) or may involve restrictive covenants which limit the Company's operations and business strategy.

Debt financing, if available, may involve restrictions on financing and operating activities or the registering of security interests over the Company's assets.

Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company or at all.

The Company may undertake additional offerings of Securities in the future. The increase in the number of Shares issued and outstanding and the possibility of sales of such Shares may have a depressive effect on the price of Shares. In addition, as a result of the offering of such additional Shares, the voting power of the Company's existing Shareholders will be diluted.

(b) **Risks Associated with Clinical Trials**

Clinical trials inherently come with elements of risk, including the potential for negative, inconclusive, or non-efficacious results. These factors can significantly impact the commercial

potential and profitability of the Company's Ultra-Pure CBD capsules (EMD-RX5, EMD-RX7, and EMD-RX9) and proprietary MDMA analogues. The enrolment of patients into trials is susceptible to delays due to various challenges such as the Covid-19 pandemic, supply chain disruptions, economic downturns, and difficulties in hiring qualified staff. Regulatory approvals, importation, and customs requirements can further delay the progression of clinical trials.

Data obtained from clinical trials can also be interpreted differently by different stakeholders, including regulatory authorities. This could potentially delay, limit, or prevent the receipt of regulatory approvals. Moreover, Phase 3 clinical trial data may not necessarily be indicative of the results obtained upon completion or in future stages. Interpreting masked data is subject to further analysis once unmasked, and negative outcomes at any stage could inhibit further development, limit commercial potential, or impede marketing approval.

The Company's Ultra-Pure CBD capsules and MDMA analogues are subject to stringent safety and efficacy assessments. Failure to demonstrate a strong safety profile or sufficient therapeutic efficacy in future clinical studies could hinder their ongoing clinical development and market release. Delays in patient recruitment or challenges in securing clinical locations may also impact the timeline of the Company's clinical programs.

RX5 recruitment is paused whilst the Company investigates discrepancy in product dissolution rates. The Company is working to develop a new manufacturing method and will have updates towards end of H2, 2023. The ability of the Company to complete the trial, apply for regulatory approval or have commercial success for this product may be affected by the inability to achieve consistent dissolution rates between batches.

(c) Clinical Data

The Company holds sensitive clinical data that is susceptible to cybersecurity risks, including potential attacks or breaches from both internal and external parties.

These breaches could occur whether access to the data is authorised or unauthorised. Consequently, there's a risk that sensitive information may be publicly exposed or permanently lost. Any such cybersecurity attack or data breach could impact Emyria's compliance with relevant data protection or privacy legislation. Non-compliance with such legislation could lead to penalties, attract negative publicity, and adversely affect the Company's brand and reputation.

(d) Research and Development

The future success of the Company is closely tied to the outcomes of clinical trials for the Company's Ultra-Pure CBD capsules (EMD-RX5, EMD-RX7, and EMD-RX9) as well as the Company's proprietary MDMA analogues, and their eventual approval as safe and effective treatments. These products are currently in various stages of clinical development, and the possibility of commercialisation, which would generate sales and revenue, remains uncertain and potentially years away. Continued progress requires further research and development, including ongoing evaluation of product suitability for registration as well as safety and efficacy of those products in clinical trials, followed by regulatory approval prior to marketing authorisation.

Drug development is an inherently high-risk endeavour. Until the Company can provide further clinical evidence supporting the efficacy of its treatments in improving patient outcomes, the success of these products remains speculative. Risks associated with research and development include, but are not limited to, uncertain outcomes, delays in development, and general scientific uncertainties surrounding the development

of novel pharmaceutical products. Materialisation of any of these risks could significantly impede the Company's progress and adversely affect its future financial performance.

(e) **Patient Safety in Clinical Services**

The Company provides comprehensive clinical care to patients with severe mental health issues, including the provision of experimental treatments such as psychedelic-assisted therapy. The vulnerable nature of this patient population elevates the importance of maintaining stringent safety protocols. There is an inherent risk associated with any medical intervention and thorough patient evaluations and informed consent are crucial. Despite these precautions, there can be no assurance that adverse events will not occur. Such events could have legal repercussions, attract negative publicity, and harm the Company's brand and financial standing.

Ensuring the competence and suitability of clinicians is crucial. All clinicians must be rigorously vetted, trained in the specialised treatments offered, and supervised to maintain the highest standards of care. Failure to adequately vet and train clinicians could result in suboptimal treatment outcomes and potentially, legal ramifications.

1. BACKGROUND TO THE OFFER

1.1 BACKGROUND

On 4 September 2023, the Company announced a capital raising of approximately \$5,100,000 (before costs). The capital raising is comprised of the following two tranches:

- (a) the issue of approximately 26,666,667 Shares to unrelated parties at an issue price of \$0.075 per Share to raise approximately \$2,000,000 (before costs), together with 1 free attaching Option for every 2 Shares applied for and issued (**Placement**); and
- (b) the issue of approximately 41,113,242 New Shares to Eligible Shareholders, on the basis of 1 New Share for every 7.5 existing Shares held on the Record Date at an issue price of \$0.075 per New Share to raise approximately \$3,100,000 (before costs), together with 1 free attaching New Option for every 2 New Shares applied for and issued (**Entitlement Offer**).

Sixty Two Capital Pty Ltd acted as lead manager and bookrunner to the Placement (**Lead Manager**). The Lead Manager has a right of first refusal to place any Shortfall from the Entitlement Offer, pursuant to which it will be paid a fee in accordance with the terms of the Lead Manager Mandate. A summary of the Lead Manager Mandate is set out in Section 6.8.

1.2 THE OFFER

The Company intends to raise approximately \$3,100,000 under the Offer via the issue of approximately 41,113,242 New Shares at an issue price of \$0.075 per New Share (**Offer Price**), together with 1 free attaching New Option for every 2 New Shares subscribed for and issued.

The New Shares to be issued by the Company pursuant to the Offer, are of the same class and will rank equally with the existing Shares on issue. The rights and liabilities attaching to the New Shares are further described in Section 5.1.

The New Options to be issued by the Company pursuant to the Offer will be exercisable at \$0.12 each and expire 3 years from the date of issue. The New Options will otherwise be issued on the terms and conditions set out in Section 5.2.

The Offer is made with disclosure under this Prospectus and are made on the terms, and are subject to the conditions, set out in this Prospectus.

(a) **Entitlement Offer**

- (i) The Entitlement Offer is open to Eligible Shareholders (defined below) only. Under the Entitlement Offer, Eligible Shareholders will have the opportunity to subscribe for New Securities in the Company on the basis of 1 New Share for every 7.5 existing Shares held on the Record Date, together with 1 free attaching New Option for every 2 New Shares subscribed for and issued (**Entitlements**). Any Entitlements not taken up in full pursuant to the Entitlement Offer will form the Shortfall and be offered for subscription under the Shortfall Offer (see Section 1.2(b)).
- (ii) The options available to Eligible Shareholders in respect to the Entitlement Offer is detailed in Section 2.2 below.
- (iii) Eligible Shareholders are Shareholders on the Record Date who:
 - (A) are registered as the holder of Shares in the Company as at 5:00pm (AWST);
 - (B) have a registered address in Australia or, subject to the provisions in Section 1.14, residents in New Zealand, as noted on the Company's share register, or are a Shareholder that the Company has otherwise determined is eligible to participate in the Entitlement Offer; and
 - (C) are eligible under all applicable securities laws to receive an offer under the Entitlement Offer.
- (iv) Participants in the Placement are not eligible to participate in the Entitlement Offer.
- (v) All Shareholders who do not satisfy the criteria to be Eligible Shareholders, are "Ineligible Shareholders". Ineligible Shareholders are not entitled to participate in the Entitlement Offer, unless the Company otherwise determines.

- (vi) The restrictions upon eligibility to participate in the Entitlement Offer arise because the Company has determined, pursuant to section 9A(3)(a) of the Corporations Act, that it would be unreasonable to extend the Entitlement Offer to Ineligible Shareholders. This decision has been made after taking into account the number of Shareholders not resident in Australia and New Zealand on the Company's share register, the relatively small number and value of New Securities to which those Shareholders would otherwise be entitled and the potential costs of complying with legal and regulatory requirements in the jurisdictions in which the Ineligible Shareholders are located in relation to the Entitlement Offer.
- (vii) The number of New Securities to which an Ineligible Shareholder would be entitled under the Entitlement Offer will not be issued to such Shareholder and, instead, will form the Shortfall Offer.
- (viii) The Company, in its absolute discretion, may extend the Entitlement Offer to any Shareholder if it is satisfied that the Entitlement Offer may be made to the Shareholder in compliance with all applicable laws. The Company, in its absolute discretion, reserves the right to determine whether a Shareholder is an Eligible Shareholder or an Ineligible Shareholder. To the maximum extent permitted by law, the Company disclaims all liability in respect of such determination.

(b) **Shortfall Offer**

- (i) Any Entitlements not taken up pursuant to the Entitlement Offer will form the Shortfall and be offered for subscription under the Shortfall Offer. The Shortfall Offer is a separate offer made pursuant to this Prospectus.
- (ii) The Shortfall Offer will allow Eligible Shareholders (and other investors invited by the Directors) that have fully subscribed for their Entitlements under the Entitlement Offer to subscribe for additional New Securities (**Shortfall Securities**).

- (iii) Any Shortfall Securities will be limited to the extent there are sufficient New Securities from Eligible Shareholders who do not take up their Entitlements in full or from the Entitlements of Ineligible Shareholders.
- (iv) Subject to the allocation policy in Section 1.3 below, Shortfall Securities (if any) will be issued at the absolute discretion of the Directors and the Lead Manager.

1.3 ALLOCATION POLICY

- (a) Pursuant to the Lead Manager Mandate, the Company has granted the Lead Manager a first right of refusal to place any Shortfall from the Entitlement Offer.
- (b) The Directors and the Lead Manager reserve the right to allocate the Shortfall at their sole discretion.
- (c) The issue of any Shortfall is subject to the allocation policy in this Section 1.3.
- (d) The Board and the Lead Manager may elect to cap the number of Shortfall Securities that are allotted to Eligible Shareholders under the Shortfall Offer.
- (e) In allocating Shortfall Securities, regard may be had to the following (non-exhaustive) factors:
 - (i) the number of New Securities that an Eligible Shareholder is entitled to subscribe for pursuant to its Entitlement relative to the number of Shortfall Securities that it has applied for;
 - (ii) the total number of Shortfall Securities available for subscription under the Shortfall Offer;
 - (iii) the number of Shares held by an Eligible Shareholder after completion of the Entitlement Offer;
 - (iv) identifying any Eligible Shareholders who are potential long term or cornerstone investors of the Company;
 - (v) the timelines of the bid by particular Eligible Shareholders;

- (vi) the overall level of demand under the Entitlement Offer; and
 - (vii) ensuring an appropriate Shareholder base for the Company going forward.
- (f) The Board and the Lead Manager may scale back allocations of Shortfall Securities prior to allotting and issuing those Shortfall Securities. The Board and the Lead Manager anticipate that, should they receive applications for Shortfall Securities in excess of the number of Shortfall Securities available for subscription under the Shortfall Offer, they will cap or scale back allocations of Shortfall Securities on a pro-rata basis having regard to each Eligible Shareholder's holding in Shares as at the Record Date.
- (g) In any event:
 - (i) no Shortfall Securities will be issued to an Eligible Shareholder (or any other investor) which would, if issued, result in them increasing their voting power in the Company above 20%; and
 - (ii) no Shortfall Securities will be issued if their issue would contravene any law.
- (h) There is no guarantee that Eligible Shareholders will receive the number of Shortfall Securities applied for. The Company's and the Lead Manager's decision on the number of Shortfall Securities to be allocated to an Eligible Shareholder will be final. It is a term of the Shortfall Offer that, should the Company and the Lead Manager scale back Applications for Shortfall Securities in accordance with the allocation policy described above, the Eligible Shareholder will be bound to accept such lesser number of Shortfall Securities allocated to them.
- (i) In the event of a scale back, the difference between the Application Monies received, and the number of Shortfall Securities allocated to the Eligible Shareholder multiplied by the Offer Price, will be refunded by the Company, without interest, following allotment.
- (j) The Company and the Lead Manager may elect to extend the Shortfall Offer to certain institutional or professional investors, including those with registered addresses outside of Australia and New Zealand where the Company and the Lead Manager are satisfied, in their sole discretion, that

the offer and sale of the Shortfall Securities can be made in compliance with applicable securities laws without any locally compliant prospectus, lodgement or filing.

In particular, persons acting as nominees or custodians for other persons may not take up Entitlements on behalf of, or send any documents relating to the Offer to, any person in any jurisdiction outside Australia.

The Company is not required to determine whether or not any registered holder is acting as a nominee or custodian or the identity or residence of any beneficial owners of Shares. The Company is not able to advise on foreign laws.

For the avoidance of doubt, the Company reserves the right (in its absolute sole discretion) to reduce the number of New Securities allocated to Eligible Shareholders, or persons claiming to be Eligible Shareholders, if their claims prove to be overstated or they fail to provide information to substantiate their claims.

The Company also reserves the right to reject any acceptance of an Entitlement that it believes comes from a person who is not eligible to accept an Entitlement.

2.11 WITHDRAWAL OF THE OFFER

Subject to applicable law, the Company reserves the right to withdraw the Offer at any time before the issue of New Securities, in which case the Company will refund any Application Monies already received in accordance with the Corporations Act and will do so without interest being payable to applicants.

2.12 FURTHER ENQUIRIES

3.2 EFFECT ON CONTROL OF THE COMPANY

The Company is of the view that the Offer will not affect the control (as defined by section 50AA of the Corporations Act) of the Company. No investor or existing Shareholder will have a voting power greater than 19.9% as a result of the completion of the Offer.

Further as set out in Section 1.2, on the basis of the allocation policy, no person will acquire, through participation in the Shortfall Offer a holding of Shares of, or increase their holding to, an amount in excess of 19.9% of all the Shares on issue on completion of the Offer.

Further there will be no change to any Shareholder's voting power as a result of the issue of the New Options. Where New Options are exercised into Shares, the voting power of the Shareholders who exercise the New Options will increase. The likelihood of New Options being exercised is dependent on the price of Shares from time to time until the New Options expire.

As at the date of this Prospectus, Dr Stewart Washer, Executive Chairman, has a relevant interest in 49,883,932 Shares currently on issue (representing approximately 16.18% of the voting shares in the Company). Dr Stewart Washer has undertaken to the Company that he will not (and must procure that his associates do not) lodge application(s) for New Shares under the Placement and the Entitlement Offer if such application(s) would result in Dr Stewart Washer, together with his associates applying for New Shares in excess of \$100,000 or having a relevant interest in the Company of 20% or greater.

4. RISK FACTORS

An investment in New Securities offered by this Prospectus should be regarded as speculative. Activities in the Company, as in any business, are subject to risks which may impact on the Company's future performance. The Company has implemented appropriate strategies, actions, systems and safeguards for known risks, however some are outside its control.

The Directors consider that the following summary, which is not exhaustive, represents some of the major risk factors which prospective investors need to be aware of in evaluating the Company's business and the risks of investing in the Company. Prospective investors should carefully consider the following factors in addition to the other information presented in the Prospectus.

The principal risks include, but are not limited to, the following:

4.1 RISKS SPECIFIC TO THE COMPANY

(a) Additional Capital Requirements

The Company will require further financing in the future, in addition to amounts raised pursuant to the Offer. It is also possible further capital may be required at an earlier stage if any risks, including those described in this Section 4 materialise. Any additional equity financing may be dilutive to Shareholders, may be undertaken at lower prices than the then market price (or Offer Price) or may involve restrictive covenants which limit the Company's operations and business strategy. Debt financing, if available, may involve restrictions on financing and operating activities or the registering of security interests over the Company's assets. Although the Directors believe that additional capital can be obtained, no assurances can be made that appropriate capital or funding, if and when needed, will be available on terms favourable to the Company, or at all.

The Company may undertake additional offerings of Securities in the future. The increase in the number of Shares issued and outstanding and the possibility of sales of such Shares may have a depressive effect on the price of Shares. In addition, as a result of the offering of such additional Shares, the voting power of the Company's existing Shareholders will be diluted.

(b) **Risks Associated with Clinical Trials**

Clinical trials inherently come with elements of risk, including the potential for negative, inconclusive, or non-efficacious results. These factors can significantly impact the commercial potential and profitability of the Company's Ultra-Pure CBD capsules (EMD-RX5, EMD-RX7, and EMD-RX9) and proprietary MDMA analogues. The enrolment of patients into trials is susceptible to delays due to various challenges such as the Covid-19 pandemic, supply chain disruptions, economic downturns, and difficulties in hiring qualified staff. Regulatory approvals, importation, and customs requirements can further delay the progression of clinical trials.

Data obtained from clinical trials can also be interpreted differently by different stakeholders, including regulatory authorities. This could potentially delay, limit, or prevent the receipt of regulatory approvals. Moreover, Phase 3 clinical trial data may not necessarily be indicative of the results obtained upon completion or in future stages. Interpreting masked data is subject to further analysis once unmasked, and negative outcomes at any stage could inhibit further development, limit commercial potential, or impede marketing approval.

The Company's Ultra-Pure CBD capsules and MDMA analogues are subject to stringent safety and efficacy assessments. Failure to demonstrate a strong safety profile or sufficient therapeutic efficacy in future clinical studies could hinder their ongoing clinical development and market release. Delays in patient recruitment or challenges in securing clinical locations may also impact the timeline of the Company's clinical programs.

RX5 recruitment is paused whilst the Company investigates discrepancy in product dissolution rates. The Company is working to develop a new manufacturing method and will have updates towards end of H2, 2023. The ability of the Company to complete the trial, apply for regulatory approval or have commercial success for this product may be affected by the inability to achieve consistent dissolution rates between batches.

(c) **Clinical Data**

The Company holds sensitive clinical data that is susceptible to cybersecurity risks, including potential attacks or breaches from both internal and external parties. These breaches could occur whether access

to the data is authorised or unauthorised. Consequently, there's a risk that sensitive information may be publicly exposed or permanently lost. Any such cybersecurity attack or data breach could impact Emyria's compliance with relevant data protection or privacy legislation. Non-compliance with such legislation could lead to penalties, attract negative publicity, and adversely affect the Company's brand and reputation.

(d) **Research and Development**

The future success of the Company is closely tied to the outcomes of clinical trials for the Company's Ultra-Pure CBD capsules (EMD-RX5, EMD-RX7, and EMD-RX9) as well as the Company's proprietary MDMA analogues, and their eventual approval as safe and effective treatments. These products are currently in various stages of clinical development, and the possibility of commercialisation, which would generate sales and revenue, remains uncertain and potentially years away. Continued progress requires further research and development, including ongoing evaluation of product suitability for registration as well as safety and efficacy of those products in clinical trials, followed by regulatory approval prior to marketing authorisation.

Drug development is an inherently high-risk endeavour. Until the Company can provide further clinical evidence supporting the efficacy of its treatments in improving patient outcomes, the success of these products remains speculative. Risks associated with research and development include, but are not limited to, uncertain outcomes, delays in development, and general scientific uncertainties surrounding the development of novel pharmaceutical products. Materialisation of any of these risks could significantly impede the Company's progress and adversely affect its future financial performance.

(e) **Patient Safety in Clinical Services**

The Company provides comprehensive clinical care to patients with severe mental health issues, including the provision of experimental treatments such as psychedelic-assisted therapy. The vulnerable nature of this patient population elevates the importance of maintaining stringent safety protocols. There is an inherent risk associated with any medical intervention and thorough patient evaluations and informed consent are

crucial. Despite these precautions, there can be no assurance that adverse events will not occur. Such events could have legal repercussions, attract negative publicity, and harm the Company's brand and financial standing.

Ensuring the competence and suitability of clinicians is crucial. All clinicians must be rigorously vetted, trained in the specialised treatments offered, and supervised to maintain the highest standards of care. Failure to adequately vet and train clinicians could result in suboptimal treatment outcomes and potentially, legal ramifications.

(f) **Acquisition risk**

As announced on 3 July 2023, the Company has entered into a binding agreement to purchase the Pax Centre (**Pax Agreement**).

As at the Prospectus Date, completion of the Pax Agreement has not yet occurred and is subject to (among other things) the conditions precedent being satisfied or waived. The Company expects that completion of the Pax Agreement will occur in the coming weeks.

If completion of the Pax Agreement does not occur, the Company will not acquire a 100% interest in the Pax Centre.

The ability of the Company to achieve its stated objectives may be materially affected by the performance of the parties in fulfilling their obligations under the Pax Agreement. There can also be no guarantee that the Pax Agreement will complete or be successful.

(g) **Regulatory Approval**

The Company operates in a highly regulated sector concerning the manufacture, distribution, and supply of pharmaceutical products as well as the use of experimental treatments like psychedelic-assisted therapies. Achieving and maintaining the necessary approvals, licences, and registrations from relevant regulatory authorities across various jurisdictions is not guaranteed. There may be instances where agencies like the Therapeutic Goods Administration (**TGA**) or Food and Drug Administration (**FDA**) identify deficiencies requiring resolution or request additional studies or approvals beyond what is currently planned. This could result in delays and increased costs for the Company's clinical trials as well as the Company's care programs. The Company also faces the risk of

policy, regulation, and legislative changes in all jurisdictions where it operates. Failure to secure or sustain required approvals or adapt to regulatory changes could adversely impact the Company's ability to commercialise and manufacture its treatments.

(h) **Commercial Risks**

The Company may explore various corporate opportunities, such as acquisitions, licensing, or partnerships to advance its reach in mental health care delivery and drug development programs. There is no guarantee that any such opportunities can be finalised on commercially acceptable terms. Even if terms for licensing and partnerships are agreed upon, unforeseen factors related to the environment, technology, or market conditions may impede the performance of partners, distributors and collaborators in delivering contracted outcomes. Moreover, the future success of the Company hinges on market acceptance and client retention. This involves convincing prospective clients and partners of the efficacy of the Company's products and services.

(i) **Information Technology**

The Company is dependent on robust information technology, software, data centres, and communication systems for its operations. The systems are susceptible to various risks, including disruptions, failures, service outages, or data corruption, which could occur due to computer viruses, malware, internal or external misuse, cyber-attacks, or other disruptions like natural disasters and power outages. A disruption to any of these platforms or systems could have a significant adverse impact on the Company's operations.

(j) **Competition**

The healthcare, biotechnology and pharmaceutical sectors are highly competitive and subject to rapid technological changes, both in Australia and internationally. Emyria faces competition from existing alternative treatments as well as from companies developing new products and services targeting similar medical conditions. There is no assurance that the Company will be able to successfully compete in this landscape. Some of these competing companies may possess or develop technologies that are superior to the Company's, or have substantially greater financial,

technical, and human resources. As a result, the Company's services, expertise, or products could be rendered obsolete, less attractive, or uneconomical due to advances in technology or alternative approaches developed by the Company's competitors.

(k) **Intellectual Property**

The acquisition and maintenance of intellectual property rights are crucial for safeguarding the potential value generated from biotechnology research and development. Emyria's success partially hinges on its capacity to secure patents, maintain trade secret protection, and operate without violating the intellectual property rights of third parties. However, the biotechnology sector is often fraught with complex and uncertain legal and factual questions surrounding patent positions. As such, there is no guarantee that Emyria's existing or future patents will provide commercially significant protection or that they will not infringe upon the rights of others. Additionally, patent disputes can arise due to the complex nature of the technologies involved. The issuance of a patent is not an assurance against the competitive technologies that may bypass Emyria's patented technology. Furthermore, Emyria's patent strategies may not offer global coverage, leaving room for generic competition in some markets.

(l) **Manufacturing**

The scaling up of manufacturing processes to support Phase 3 clinical studies requires ongoing validation and Process Performance Qualification (**PPQ**). There is a risk that PPQ may reveal technical issues that could affect timelines and feasibility. These difficulties may include failure to produce materials meeting regulatory specifications for human administration or insufficient product yield to support both clinical studies and planned commercialisation. Any unforeseen challenges in the manufacturing process, such as changes in manufacturing methods, disruptions in supply chains, shortages of input materials, or changes in arrangements with third-party manufacturers, could negatively impact the Company's profitability in the future.

(m) **Commercialisation**

While the Company's products such as the Company's Ultra-Pure CBD capsules (EMD-RX5, EMD-RX7, and EMD-RX9) and proprietary MDMA analogues have shown promise in preclinical assays and clinical trials, they have not yet been approved for commercial sale. We anticipate that it may take several years for these products to gain regulatory approval, if they do at all. If and when approval is granted, there will be a significant increase in commercialisation expenses. These costs could be associated with setting up sales channels, marketing initiatives, distribution networks, manufacturing capabilities, and supply chain management. Moreover, the success of these products, success in implementing new therapies and treatments in our clinical services and expansion of our clinical services is not guaranteed and will depend on market acceptance by healthcare professionals, patients, and payors within the medical community.

(n) **Reliance on key personnel, clinicians and management**

The success of the Company is highly dependent on the expertise and commitment of its key personnel. These individuals possess unique skills and knowledge crucial to the development of the Company's intellectual property, the progression of the Company's clinical trials and the provision of mental health care services. As the Company advances towards drug registration, the Company will require additional specialists in clinical development, as well as key financial and administrative staff. Additionally, as the Company broadens its scope in the provision of emerging mental health care services the company will require sufficiently trained clinicians and support staff. There is no guarantee that Emyria will succeed in attracting and retaining qualified personnel. Failure to do so could significantly hinder the Company's clinical development operations and could have a material adverse impact on the Company's financial performance.

(o) **Data collection risk**

It is likely that the Company will continue to collect, store and process highly sensitive, highly regulated and confidential information. The provision of secure and reliable information storage and processing services is integral to the businesses and operations of the Company. The

Company has developed policies in relation to collecting sensitive and personal data. However, even with such policies in place, if the Company's systems or data is compromised for any reason there is a risk that the Company may become involved in legal action due to breaching data confidentiality agreements.

The collection, use, storage and disclosure of personal and sensitive information within the data and analytics industry in Australia is governed by the *Privacy Act 1988* (Cth) (**Privacy Act**) and the Australian Privacy Principles contained at Schedule 1 of the Privacy Act (**Australian Privacy Principles**). Various changes to the regulatory framework have been introduced in recent years, including as a result of the *Privacy Amendment (Enhancing Privacy Protection) Act 2012* (Cth), key provisions of which came into effect in March 2014. Any future adverse changes in privacy legislation (including changes to the Privacy Act and the Australian Privacy Principles), or changes in the way privacy laws are interpreted in the future could render any of the Company's services and products (or the ways in which such services and products are currently implemented or delivered) less attractive or contrary to law, which could have a material adverse effect on its business, operations and financial performance, and the price of the Shares.

If the Company operates in jurisdictions outside of Australia, it will need to develop appropriate policies, guidelines and systems to comply with local legislation, guidelines and best practice. If the Company's security measures are breached or unauthorised access to customer data is otherwise obtained, the Company may be perceived as not being secure, customers may reduce the use of or stop using the Company, and it may incur significant liabilities.

(p) **Product Safety and Efficacy**

The reputation and commercial success of the Company hinges on the health, safety, and efficacy of its products, including the Company's Ultra-Pure CBD capsules (EMD-RX5, EMD-RX7, and EMD-RX9) and proprietary MDMA analogues. Serious or unforeseen health, safety, or efficacy concerns could result in reduced market acceptance, reputational damage, product recalls, and potential product liability claims. Any concerns regarding the

health, safety, or efficacy of the Company's products are likely to diminish customer demand and adversely affect the Company's profitability.

4.2 GENERAL RISKS

(a) Securities investments

There are risks associated with any securities investment. The prices at which the securities of the Company trade may fluctuate in response to a number of factors. Furthermore, the stock market, and in particular the market for technology companies, has experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of such companies. There can be no guarantee that trading prices will be sustained. These factors may materially affect the market price of the securities of the Company regardless of its operational performance.

(b) Share market conditions

Share market conditions may affect the value of the Company's quoted Securities regardless of the Company's operating performance. Share market conditions are affected by many factors such as:

- (i) general economic outlook;
- (ii) introduction of tax reform or other new legislation;
- (iii) pandemics;
- (iv) interest rates and inflation rates;
- (v) changes in investor sentiment toward particular market sectors;
- (vi) the demand for, and supply of, capital; and
- (vii) terrorism or other hostilities.

The market price of securities can fall as well as rise and may be subject to varied and unpredictable influences on the market for equities in general. Neither the Company nor the Directors warrant the future performance of the Company or any return on an investment in the Company.

(c) **Government and legal risk**

Changes in government, monetary policies, taxation, and other laws can have a significant impact on the Company's assets, operations and ultimately the financial performance of the Company and its Shares. Such changes are likely to be beyond the control of the Company and may affect industry profitability as well as the Company's capacity to undertake its activities.

The Company is not aware of any reviews or changes that would affect its interests. However, changes in community attitudes on matters such as taxation, competition policy and environmental issues may bring about reviews and possibly changes in government policies. There is a risk that such changes may affect the Company's development plans. Any such government action may also require increased capital or operating expenditures and could prevent or delay certain operations by the Company.

(d) **Litigation risks**

The Company is exposed to possible litigation risks including, without limitation, intellectual property claims, contractual disputes, occupational health and safety claims and employee claims. Further, the Company may be involved in disputes with other parties in the future which may result in litigation. Any such claim or dispute if proven, may impact adversely on the Company's operations, financial performance, and financial position. The Company is not currently engaged in any litigation.

(e) **General economic and political risks**

Changes in the general economic and political climate in Australia and on a global basis may impact on economic growth, interest rates, taxation and tariff laws, the rate of inflation and domestic security which may affect the value and viability of any activities that may be conducted by the Company.

(f) **Insurance**

Insurance against all risks associated with the Company's business is not always available or affordable. The Company maintains insurance where it is considered appropriate for its needs however it will not be insured against all risks either because appropriate cover is not available or because

the Directors consider the required premiums to be excessive having regard to the benefits that would accrue.

(g) **Unforeseen expenditure risks**

Expenditure may need to be incurred which has not been taken into account in the preparation of this Prospectus. Although the Company is not aware of any such additional expenditure requirements, if such expenditure is subsequently required or incurred, this may adversely impact budgeted expenditure proposals by the Company.

4.3 INVESTMENT SPECULATIVE

The above list of risk factors ought not to be taken as exhaustive of the risks faced by the Company or by investors in the Company.

The above factors, and others not specifically referred to above, may in the future materially affect the financial performance of the Company and the value of its Securities. Investors should consider that the investment in the Company is high risk and should consult their professional adviser before deciding whether to apply for New Securities pursuant to this Prospectus.

5. RIGHTS ATTACHING TO SHARES

5.1 RIGHTS AND LIABILITIES ATTACHING TO SHARES

A summary of the rights attaching to Shares in the Company is below. This summary is qualified by the full terms of the Constitution (a full copy of the Constitution is available from the Company on request free of charge) and does not purport to be exhaustive or to constitute a definitive statement of the rights and liabilities of Shareholders. - (iii) on a poll, every person present who is a Shareholder or a proxy, attorney or representative of a Shareholder will, in respect of each fully paid Share held by him, or in respect of which he is appointed a proxy, attorney or representative, have one vote for the Share, but in respect of partly paid Shares will have such number of votes as bears the same proportion to the total of such Shares registered in the Shareholder's name as the amount paid (not credited) bears to the total amounts paid and payable (excluding amounts credited).

(c) **Dividend rights**

Subject to the rights of any preference Shareholders and to the rights of the holders of any shares created or raised under any special arrangement as to dividend, the Directors may from time to time declare a dividend to be paid to the Shareholders entitled to the dividend which will be payable on all Shares according to the proportion that the amount paid (not credited) is of the total amounts paid and payable (excluding amounts credited) in respect of such Shares.

No dividend will carry interest as against the Company.

The Company must not pay a dividend unless the Company's assets exceed its liabilities immediately before the dividend is declared and the excess is sufficient for the payment of the dividend. The Directors may capitalise any profits of the Company and distribute that capital to the Shareholders, in the same proportions as the Shareholders are entitled to a distribution by dividend.

(d) **Winding-up**

If the Company is wound up, the liquidator may, with the authority of a special resolution of the Company, divide among the shareholders in kind the whole or any part of the property of the Company, and may for that purpose set such value as the liquidator considers fair upon any property to be so divided, and may determine how the division is to be carried out as between the Shareholders or different classes of Shareholders.

(e) **Further increase in capital**

Subject to the Corporations Act and the Constitution, the Board may, on behalf of the Company, issue, grant options over or otherwise dispose of unissued shares to any person on the terms, with the rights, and at the times that the Board decides. The Company must not issue shares or grant options if the issue or grant would result in a breach of the Listing Rules.

(f) **Transfer of Shares**

Shares can be transferred upon delivery of a proper instrument of transfer to the Company or by a transfer in accordance with the ASX Settlement

Operating Rules. The instrument of transfer must be in writing, in any usual or common form or in any other form that the Directors approve.

Until the transferee has been registered, the transferor is deemed to remain the holder, even after signing the instrument of transfer.

In some circumstances, the Directors may refuse to register a transfer if upon registration the transferee will hold less than a marketable parcel. The Board may refuse to register a transfer of Shares upon which the Company has a lien. The Company must refuse to register a transfer of Shares where the Corporations Act, Listing Rules or ASX Settlement Operating Rules or a law about stamp duty requires the Company to do so.

(g) **Variation of rights**

Pursuant to section 246B of the Corporations Act, the Company may, with the sanction of a special resolution passed at a meeting of Shareholders vary or abrogate the rights attaching to Shares.

If at any time the share capital is divided into different classes of Shares, the rights attached to any class (unless otherwise provided by the terms of issue of the shares of that class), whether or not the Company is being wound up, may be varied or abrogated with the consent in writing of the holders of three-quarters of the issued shares of that class, or if authorised by a special resolution passed at a separate meeting of the holders of the shares of that class.

(h) **Alteration of Constitution**

The Constitution can only be amended by a special resolution passed by at least three quarters of Shareholders present and voting at the general meeting. In addition, at least 28 days written notice specifying the intention to propose the resolution as a special resolution must be given.
