Apple Pay Coming to EML Customers Offering an Instant, Easy & Secure Way to Pay

Fintech company, EML Payments, today brings its customers, and its customer's customers, Apple Pay, which is transforming mobile payments with an easy, secure and private way to pay that's fast and convenient.

In a shake-up for corporate gift and reward programs, the launch will transform the way retailers are able to offer customer cash back incentives and businesses are able to reward employees. Revolutionising physical gift card programs, Apple Pay will allow customers to instantly add a Mastercard Rewards card to Apple Wallet, using the EML Rewards app, to instantly receive and redeem their rewards.

Security and privacy is at the core of Apple Pay. When you use a prepaid card with Apple Pay, the actual card numbers are not stored on the device, nor on Apple servers. Instead, a unique Device Account Number is assigned, encrypted and securely stored in the Secure Element on your device. Each transaction is authorised with a one-time unique dynamic security code.

EML Managing Director & Group CEO, Tom Cregan said: "Customers are frustrated with waiting for gift and reward cards to arrive in the mail or carrying multiple cards at a time. Offering Apple Pay enables companies to not only overhaul their reward schemes to be digital, savvier and faster – but put them at the forefront of reward and recognition programs and make their customer's experience better. At EML, we're constantly innovating and evolving to ensure a customer and their cardholders life is made easier through payments."

About Apple Pay

Apple Pay is easy to set up and works with iPhone SE, iPhone 6 and later, and Apple Watch.

Online shopping in apps and on websites accepting Apple Pay is simple with Touch ID, or just double-click the side button and authenticate with a glance with Face ID. There's no need to manually fill out lengthy account forms or repeatedly type in shipping and billing information with Apple Pay. When paying for goods and services in apps or Safari, Apple Pay works with iPhone 6 and later, iPhone SE, iPad Pro, iPad (5th Generation and later), iPad Air 2, and iPad mini 3 and later. You can also use Apple Pay in Safari on any Mac introduced in or after 2012 running macOS Sierra and confirm the payment with iPhone 6 or later or Apple Watch, or with Touch ID on the new MacBook Pro.
