Forward looking statement

- These materials prepared by Evolution Mining Limited (or “the Company”) include forward looking statements. Often, but not always, forward looking statements can generally be identified by the use of forward looking words such as “may”, “will”, “expect”, “intend”, “plan”, “estimate”, “anticipate”, “continue”, and “guidance”, or other similar words and may include, without limitation, statements regarding plans, strategies and objectives of management, anticipated production or construction commencement dates and expected costs or production outputs.
- Forward looking statements inherently involve known and unknown risks, uncertainties and other factors that may cause the Company’s actual results, performance and achievements to differ materially from any future results, performance or achievements. Relevant factors may include, but are not limited to, changes in commodity prices, foreign exchange fluctuations and general economic conditions, increased costs and demand for production inputs, the speculative nature of exploration and project development, including the risks of obtaining necessary licenses and permits and diminishing quantities or grades of reserves, political and social risks, changes to the regulatory framework within which the Company operates or may in the future operate, environmental conditions including extreme weather conditions, recruitment and retention of personnel, industrial relations issues and litigation.
- Forward looking statements are based on the Company and its management’s good faith assumptions relating to the financial, market, regulatory and other relevant environments that will exist and affect the Company’s business and operations in the future. The Company does not give any assurance that the assumptions on which forward looking statements are based will prove to be correct, or that the Company’s business or operations will not be affected in any material manner by these or other factors not foreseen or foreseeable by the Company or management or beyond the Company’s control.
- Although the Company attempts and has attempted to identify factors that would cause actual actions, events or results to differ materially from those disclosed in forward looking statements, there may be other factors that could cause actual results, performance, achievements or events not to be as anticipated, estimated or intended, and many events are beyond the reasonable control of the Company. Accordingly, readers are cautioned not to place undue reliance on forward looking statements. Forward looking statements in these materials speak only at the date of issue. Subject to any continuing obligations under applicable law or any relevant stock exchange listing rules, in providing this information the Company does not undertake any obligation to publicly update or revise any of the forward looking statements or to advise of any change in events, conditions or circumstances on which any such statement is based.
- All US dollar values in this presentation are calculated using an AUD:USD exchange rate of US\$0.78 unless stated otherwise

Additional opportunities at Cowal

- Assessing further asset enhancement opportunities including:
 - Co-treatment of high-grade oxide stockpiles to bring forward treatment
 - Increased gold production of 10 – 12koz per annum
 - Secondary crushing
 - Increase throughput to 9.0 – 9.5Mtpa to bring forward treatment of low-grade stockpiles
 - Continued drilling to convert significant mineral endowment outside of existing reserves
 - E46, E41, Galway and Regal

Cowal gold mineralisation and E42 open pit outline

Ernest Henry

- Large scale, long life, copper-gold asset operated by Glencore
- Approximately A\$600 million recently invested by Glencore in expanding the underground mine to 6.4Mtpa
- Evolution's economic interest acquired 1 November 2016:
 - 100% of gold and 30% of copper and silver produced over 11 year life of mine (LOM) plan
- Annual payable production (Evolution's interest):
 - 80 – 85koz Au and 18 – 20kt Cu
- Upside opportunities through potential mine life extensions and exploration joint venture
 - Evolution has a 49% interest in all gold, copper and silver production beyond current LOM area
