About Envirozel Limited

Envirozel is an emerging industrial group with a portfolio of specialist businesses operating in the infrastructure, water and engineering industries. The company's operations currently encompass three successful businesses, Syfon Systems, Brockman Engineering and Danum Engineering. These businesses have strong positions in their respective markets with exceptional growth opportunities. The company's strategy is to grow by acquisition targeting strong, established and profitable businesses where generational change or succession issues have become a constraint on growth.

Syfon Systems is a specialist roof drainage engineer with leading edge technology that offers greater building design flexibility resulting in lower capital costs to developers, faster construction times for builders and lower life cycle costs for property owners. The company is market leader in Australia and has a growing business in Asia.

Brockman Engineering designs and fabricates large and very large scale tanks, silos and cooling towers for the chemical, petroleum, agriculture and water industries. The company also fabricates and repairs equipment for the aluminium industry.

Danum Engineering provides construction, on-site installation and maintenance engineering services to a wide range of industries including petrochemicals, aluminium, glass, cement, defence and agriculture. The company specialises in major shutdown maintenance.

About National Engineering Pty Ltd

N.S.W., Young based, National Engineering details, fabricates and erects structural steelwork, for commercial, industrial and retail projects including stadiums, car parking stations, bridges, multi-storey buildings, the resource sector and mining. The company has 75 employees and annual turnover exceeding \$15 million.
