ASX CODE: DMY

Highlights

- **Dromana technical and legal due diligence on the Longonjo Project in Angola is well underway;**
- **Dromana and Sable Minerals staff to arrive on site next week to prepare for the upcoming exploration program consisting of rock chip sampling, trenching and channel sampling (underground and at surface);**
- **Aurum Exploration Pty Ltd has been engaged to assist due diligence exploration work to commence in late April; and**
- **Exploration focus will be on re sampling the trench and adit to confirm the high grade copper results at Cassenha Hill which sits within the Cata bola prospect.**

Dromana Estate Ltd (ASX:DMY) is pleased to provide the market with an update on its due diligence investigations on the Longonjo Project in Angola, which Dromana has an option to acquire a 70% interest from Sable Minerals Pty Ltd.

The majority of the previous exploration work on the Longonjo project, especially at the Cassenha Hill copper gold target, has been undertaken by Aurum Exploration who have been working on this project since 2006.

Dromana has engaged Aurum Exploration for the upcoming exploration work, which will focus on confirming and extending the high grade copper results reported in adit number 2 (see Figure 2) and the other adits in which copper mineralization has been reported. The gold association with the copper mineralization at Cassenha Hill will also be investigated.

ABN 58 090 000 276

Existing camp facilities exist at Longonjo (Figure 1), with Sable Minerals maintaining in country staffing and the ability to draw on the local workforce as required. The town and international airport of Huambo is only 70kms away from the Longonjo Project.

Non Executive Chairman Gabriel Chiappini commented “ This is an exciting phase for Dromana, as we look forward to confirming the historical work that highlights a very prospective project. It’s not often you have such a large permit (3,600km²) located near infrastructure, with several high grade mineralization commodity targets (copper, gold and rare earths) within the one license. In discussions with the Sable management it’s clear that the entire permit is yet to be fully explored which means additional mineralized systems may exist”.

Competent Person Statement

The information in this report that relates to Exploration Results is based on information compiled by Andrew Richards, who is a member of The Australasian Institute of Mining and Metallurgy and the Australian Institute of Geoscientists. He is a full time employee of Arc Resources Pty Ltd which is providing consulting services to Dromana Estate Limited. Andrew Richards has sufficient experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the ‘Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves’. Andrew Richards consents to the inclusion in the report of the matters based on their information in the form and context in which it appears.
