

ASX ANNOUNCEMENT**26 September 2018**

AKELA INTEGRATION OF BRONID

Ookami Limited (ASX:OOK) (**OOK** or the **Company**) is pleased to announce that its wholly owned Akela platform has now integrated Brontech's "bronID" personal identity solution within the Onboarding and Login Pages of the platform. Users can use their bronID to login or via bronID QR code on Akela's login page.

About bronID

The bronID API allows partners such as Akela and NCX (and others) to onboard users in a seamless manner by instantaneously extracting their identity information and verifying this information across different data sources for KYC/AML purposes. Once users create their bronID and add their ID documents, they can use the solution to instantly verify and transfer their personal identity attributes.

The customers that already have a bronID can onboard and be verified on the Akela platform. Furthermore, once users are onboard any platform (e.g. Akela), they will be able to reuse the same verified credentials for all other partner platforms within the Ookami Ecosystem (e.g. NCX), as well as other parties (institutions, technology providers etc.) utilising the bronID technology. bronID users will not have to complete an ID verification process with another partner platform and will be able to simply utilise their existing bronID profile. If the client does not have a bronID, then they will complete one single ID verification process within Akela, which will use the bronID API, and at the end of the process they will be offered to save their digital profile in the bronID app.

The usage of the bronID API for identity verification will also overcome the compatibility issues in regard to identity verification requirements for compliance purposes between the different participants in the ecosystem. This is expected to strengthen the relationship between all the stakeholders within both Ookami's ecosystem and Brontech technology partners and make the network more attractive for new participants.

Download bronID

bronID can be downloaded via the following App stores:

<https://bronid.com/>

<https://itunes.apple.com/au/app/bronid/id1406109476>

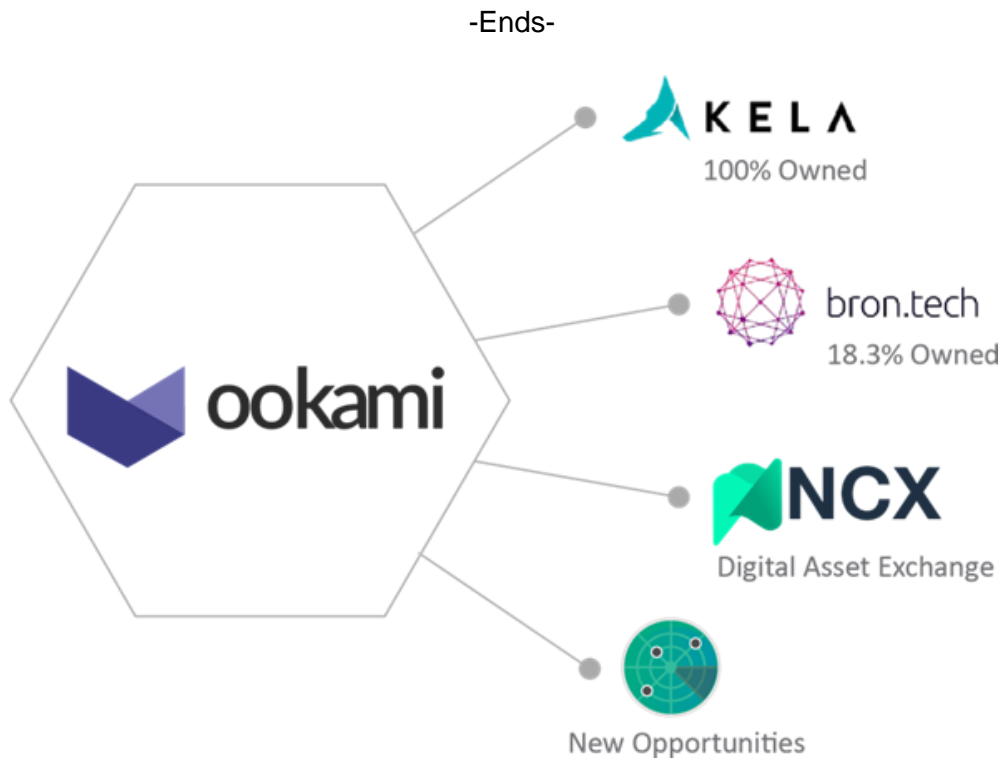

<https://play.google.com/store/apps/details?id=tech.bron.bronid>

Paid by Coins

Akela is currently implementing the final stages of integration with Paid By Coins which will provide secure cryptocurrency to BPAY/Bank account technologies as one of Akela's Payment Gateway solutions. Shortly, Akela will be accepting BTC (Bitcoin), ETH (Ether) and other Alt-coins from its verified clients. This functionality will allow Akela to attract a rapidly growing customer base that wish to utilise their existing cryptocurrency assets, for traditional and alternate investments and assets classes, facilitated via a seamless "one stage" transaction process.

Akela Upgrade

In parallel with the Bron ID and Paid by Coins integration, the Akela web User Interface is also finalizing its upgrade. The new look Akela interface and investor dashboard will be released early next quarter.

About Ookami Limited

Ookami has a portfolio of synergistic companies that disrupt data and advertising markets, investment platforms, software as a service (SaaS) and digital asset applications.

Ookami is developing an ecosystem of advanced technology solutions encompassing 'smart contracts' and blockchain technologies, secure identity management and verification ('Know Your Client') (KYC) and anti-money laundering (AML) applications, data markets, advertising analytics, digital asset wallets and exchange platforms, digital asset solutions and security and encryption applications.

About Akela

 **AKELA** provides Australian Financial Services Licence (AFSL) holders a streamlined total management solution to capital raisings and distribution of public and private offerings. Akela is a unique 'Service Platform' with Peer-to-Peer (P2P) community, Business-to-Business (B2B), KYC) and compliance and data collection & analytics capabilities.

Individuals and entities can continue to register on the platform and gain access to current and future offerings at www.akela.vc

About Akela Mobile App

iOS and Android users have access to the Akela Platform mobile app via the App Store and Google Play. The app will be initially free for all users, but will require a membership with the Akela Platform to use. Once logged into the app, investors will be linked with their account. Your investment progress will be linked across any device that you log in from. The mobile app is another tool that the Akela Platform provides to give you the best investment experience on the web.

About Brontech

Brontech is Sydney based company that is pioneering a blockchain backed platform for data exchange and identity management. The company is also building complementary proprietary applications to extract data from various sources and pack them into anonymized data products that are sold to corporations and SMEs as insights and research tools. In its diverse data product offering is also included the MyBron API that enables individuals and companies to exchange verified information in a Peer-to-Peer manner where the data is verified through the company's proprietary identity verification protocol that pulls data from diverse set of sources.

Individuals and entities can find more information on Brontech's products at www.bron.tech

National Currency eXchange (NCX)

 **NCX** NCX's vision is to be the world's trusted digital asset exchange addressing many of the problems and risks evident in existing digital asset exchanges. NCX aims to promote a trusted, secure and robust digital asset exchange solution following "bank-like" checks and processes, adhering to strict Know Your Customer (KYC) and Anti-Money Laundering (AML) policies, including verification of customer ID prior to trading, whilst also providing exceptional customer service and user experience.

NCX's expertise lies in its ability to rapidly and securely utilise cutting edge technology development and infrastructure to greatly improve the current digital asset currency technology platform to add new features, rollout rapidly in multiple countries and maintain a secure and scalable operation.

NCX aims to operate a series of locally based crypto-currency exchange solutions in various jurisdictions commencing with Australia, Singapore and Hong Kong. Following the successful initial launch, NCX is poised to continue its global roll-out of locally based crypto-currency exchange solutions in Malaysia, Croatia and elsewhere.
