

Group 6 Metals Appoints Megan McPherson as Chief Financial Officer

Group 6 Metals Limited (ASX: G6M, “Group 6” or the “Company”) is pleased to advise that Megan McPherson has joined the Company in a full-time capacity as Chief Financial Officer. Ms McPherson has been contracting with G6M as CFO since August 2020.

Megan is a Chartered Accountant with more than 18 years of commercial and public practice experience across multiple jurisdictions including ASX and NASDAQ listed companies. Having commenced her career with Macquarie Bank, currently Ms McPherson provides CFO/Company Secretary services as a consultant to several public and private companies in the mining industry. As CFO of G6M and the head of the finance team, Megan will manage the day-to-day operations of the division, its people and resources.

Group 6 Metals Executive Chairman, Johann Jacobs said,

“In her time with us as a contract CFO, we have been very impressed with Megan’s skillset and capabilities and as such, were thrilled at the opportunity for her to join the G6M team in a full-time role. As the Company is in a prime stage of growth as we surge ahead with the redevelopment of the Dolphin Tungsten Mine, it is imperative that we have a team of dedicated staff in management, technical and administrative roles. We welcome Megan to the team as our latest addition to our growing team.”

Ms McPherson is a member of the Chartered Accountants Australia and New Zealand and holds a Bachelor of Commerce (Accounting) from the University of Wollongong.

Approved by the board of Group 6 Metals Limited.

About Group 6 Metals Limited

Group 6 Metals Limited (ASX: G6M, “G6M” or the “Company”) is an Australian resources exploration and development company. The Company's name recognises tungsten as a Group 6 Metals' member of the periodic table along with chromium and molybdenum, as well as being a critical mineral and a geopolitically strategic resource.

The Company is focussed on the redevelopment of its 100%-owned Dolphin Tungsten Mine located on King Island, Tasmania. Initially the focus is on producing a high grade of tungsten concentrate, however, plans are to value-add the product for supply into the upstream tungsten industry.
