

ASX AND MEDIA RELEASE

TORIAN COMMENCES TIN DRILLING PROGRAM IN NSW

Wednesday 20 July 2011

Torian Resources announces today that it has commenced a 10 hole, 1000 metre RC drilling program on its 100% interest exploration tenements EL 7201 and 6986 at Ardlethan in central western NSW today.

Torian Resources has engaged All Search Drilling to undertake the drilling program.

Six prospects, shown on figure 1, are to be targeted with the initial 10 hole RC program.

At the Lone Hand, White Crystal, Taylors Hill and Maratholi locations the holes are targeting extensions of mineralization associated with historical tin workings, while drilling at the Ardlethan South Anomaly 5 and Ardlethan South Anomaly 6 are designed to test two Sn, Pb, Zn, F, Cu targets generated from an IP survey completed by Shell Exploration.

Samples of rock chips from the holes will be collected and assayed and results are anticipated within 4 weeks.

Torian has a 100% in ELs 7201 and 6986.
