ASX:GBM — GBM RESOURCES LTD

Exploring High Grade Gold Systems in the Drummond Basin, Queensland

RIU EXPLORERS CONFERENCE — FEBRUARY 2026

Dominant Position in Drummond Basin

STRATEGIC LAND HOLDING IN AUSTRALIA'S MOST UNDEREXPLORED EPITHERMAL GOLD BELT

Significant Mineral Resources (1.84Moz Au)

- Mineral Resource at **Twin Hills**: **23.1Mt @ 1.3g/t Au** for **1.0Moz Au**[1]
- Mineral Resource at **Yandan**: **15.8Mt @ 1.0g/t Au** for **0.51Moz Au**[2]
- Mineral Resource at **Mt Coolon**: **6.6Mt @ 1.5g/t Au** for **0.33Moz Au**[3]
- 90% of current resource within granted Mining Leases – 59% Measured & Indicated JORC Category[1,2,3]

Significant High-Grade Intersections

Twin Hills [4,5]

309 Deposit
- **17m @ 317.4g/t Au**
- **140.6m @ 5.2g/t Au**

Lone Sister Deposit
- **146m @ 9.8g/t Au**
- **20m @ 14.2g/t Au**

Yandan [2,4]

East Hill Deposit
- **191m @ 4.0g/t Au**
- **13m @ 9.2g/t Au**

Illamahta Deposit
- **52m @ 1.48g/t Au**
- **14m @ 3.96g/t Au**

Significant Exploration Upside

- Substantial upside within the existing mineral resource base
- Multiple high priority proximal drill ready targets
- Large portfolio of **quality prospects** ready for systematic exploration

Experienced Leadership

- Experienced Directors & Management with a history of delivery

Twin Hills Gold Project

50,000m Drill Program Targeting Rapid Expansion of the 1.0Moz Mineral Resource

1.0Moz Au

Twin Hills Project
100% GBM

Twin Hills: 309 Deposit

MINERALISATION OPEN IN MULTIPLE DIRECTIONS AND MATERIAL GAPS IN RESOURCE MODEL REQUIRING INFILL DRILLING

Mineral Resource (JORC)[1]:

- **10.6Mt @ 1.5g/t Au** for 0.52Moz Au

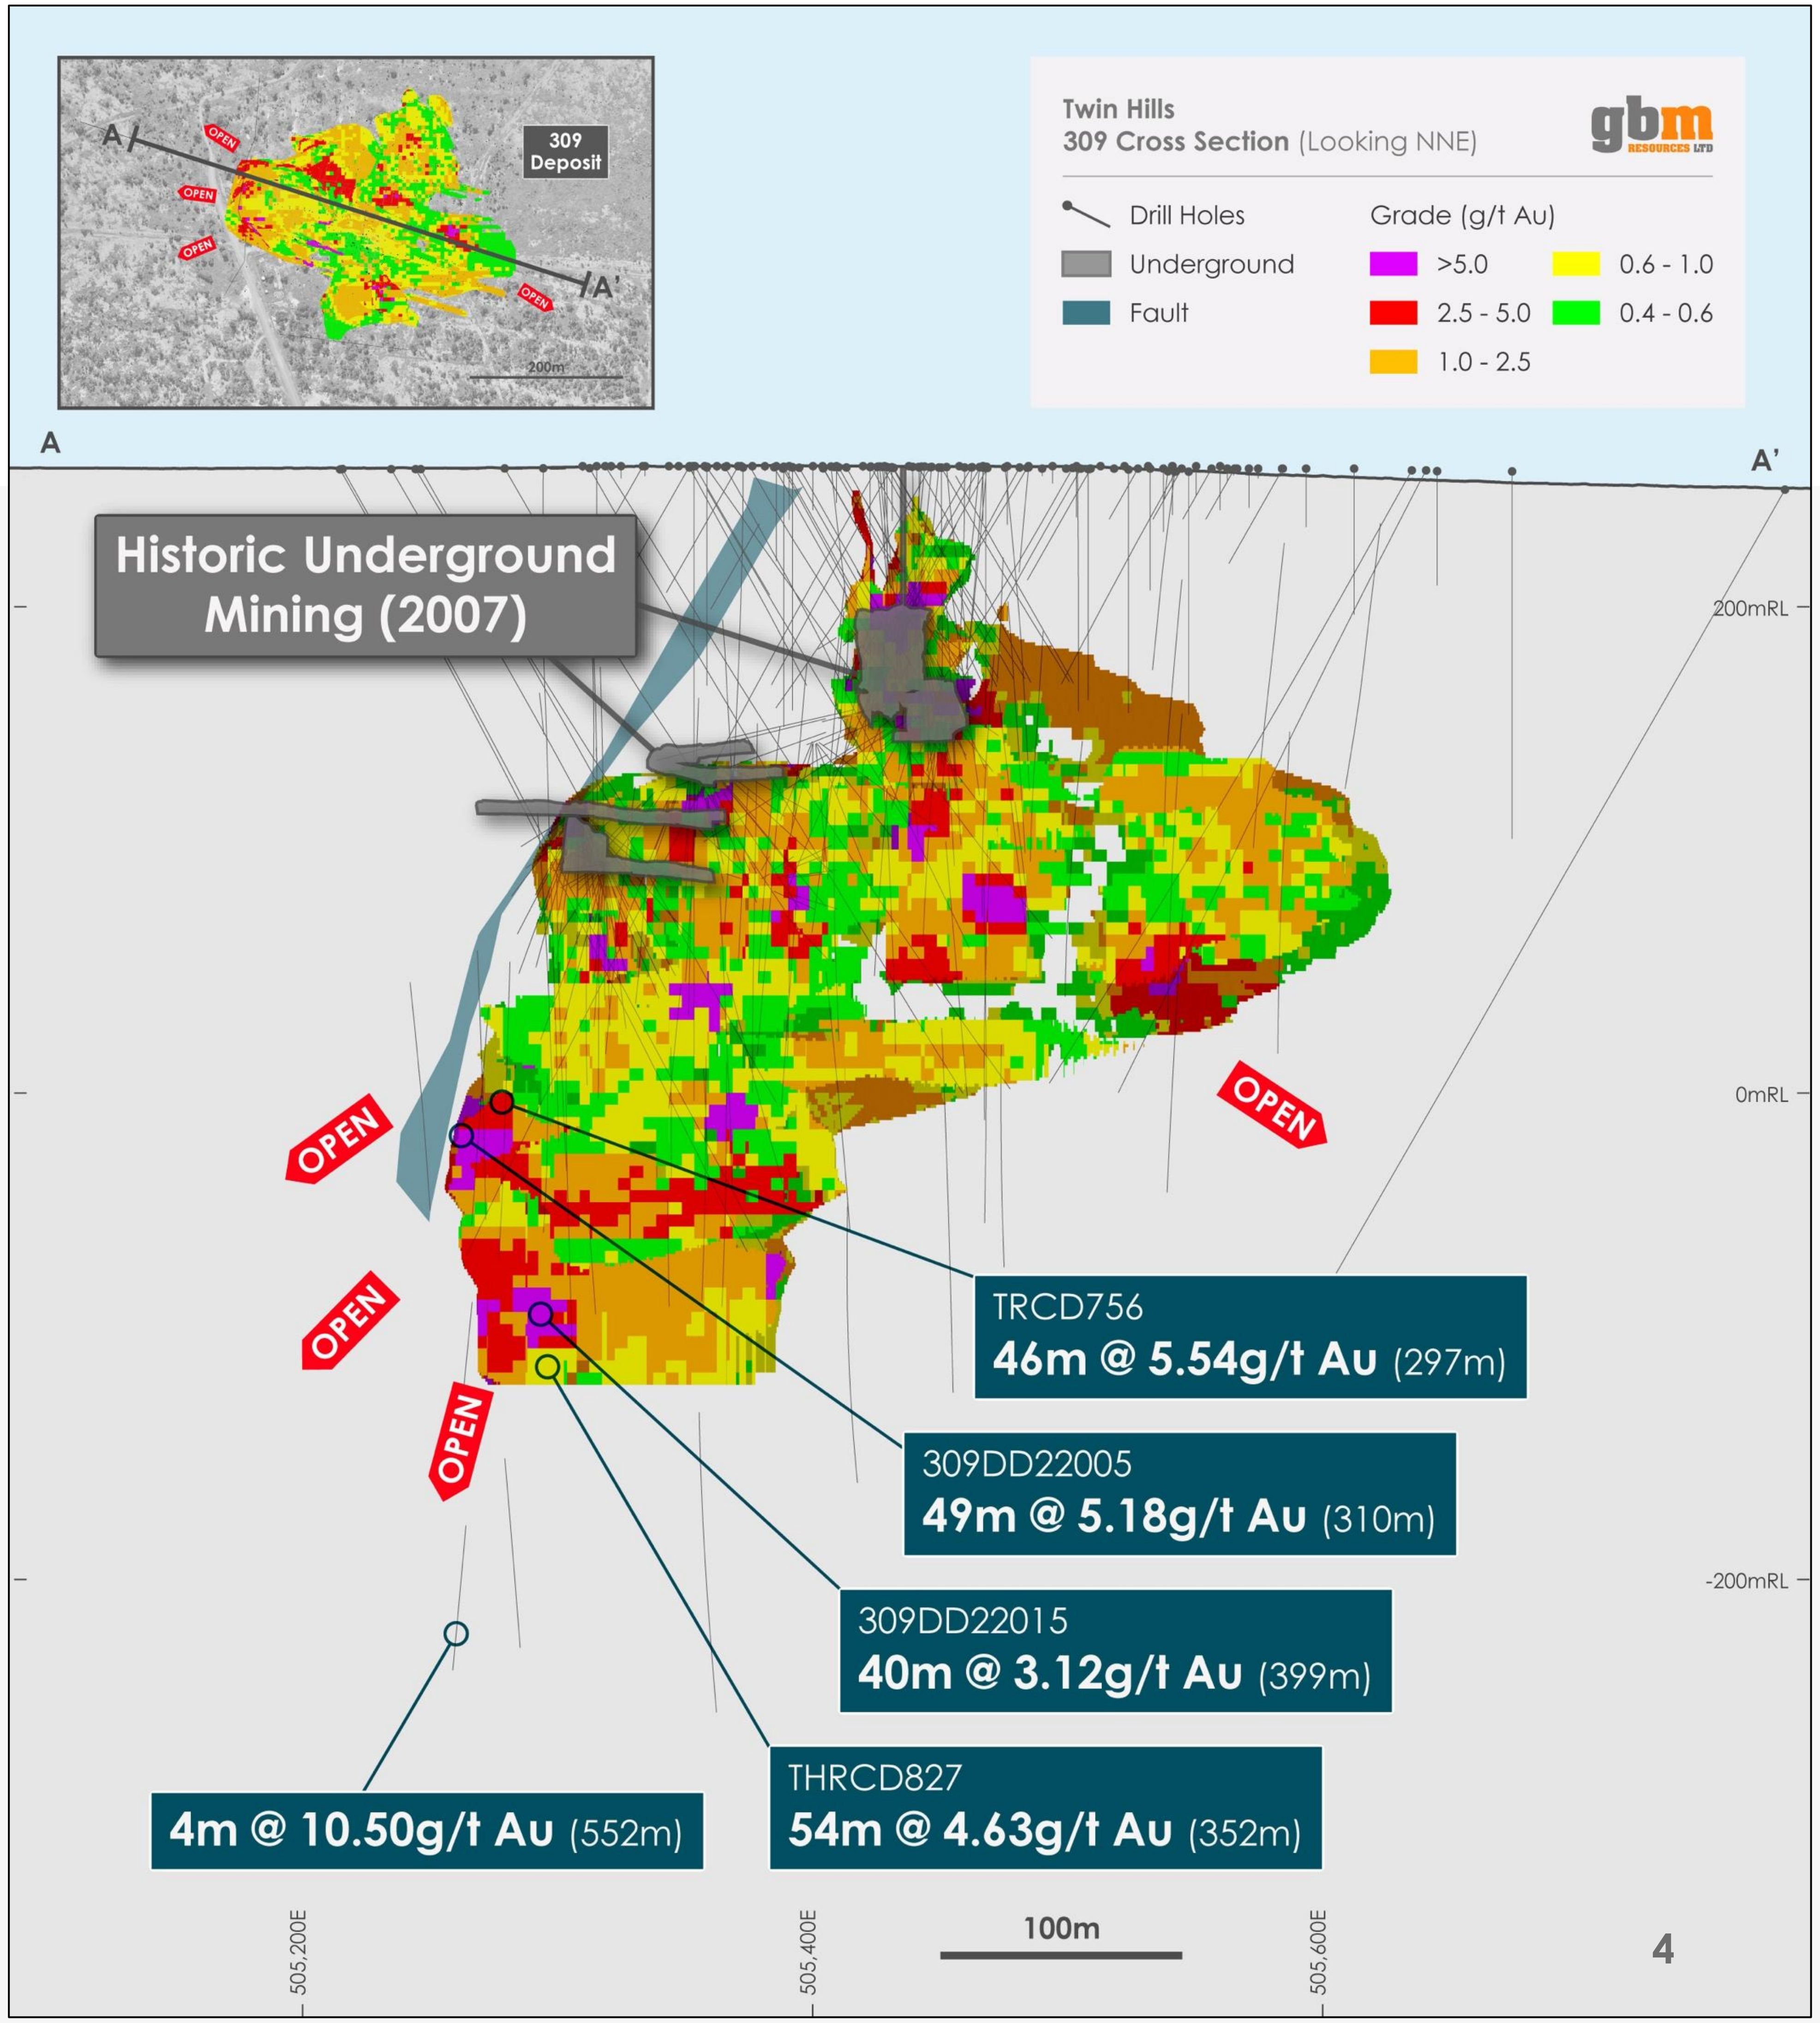
Potential open pit and bulk underground configurations[1]:

- **9.96Mt @ 1.4g/t Au** for 0.44Moz Au above 0mRL (~250m depth)
- **0.67Mt @ 3.9g/t Au** below 0mRL for 0.08Moz Au

Significant High-Grade Intersections[2] including:

- TRCD728 : **17m @ 317.4g/t Au** from 222m
  Incl. **5m @ 1,036.6g/t Au** from 222m
- THRCD875: **140.6m @ 5.1g/t Au** from 154m
  Incl. **8m @ 81.8g/t Au** from 177m

- Modelled high-grade feeder zone at depth
- **Eruption breccia/sinter above a larger epithermal system**
- Significant infrastructure on site and proximal to sealed road



1 Refer to ASX announcement 'Twin Hills Gold Project Upgrades to ~1Moz Mineral Resource', 5 December 2022
2 Refer to ASX announcement 'Mount Coolon and Twin Hills Combined Resource Base Approaches 1 Million Ounces', 18 January 2019

Twin Hills: 309 Recent Drilling

STAGE 1 DRILLING DEMONSTRATES RESOURCE GROWTH POTENIAL OUTSIDE OF EXISTING MRE

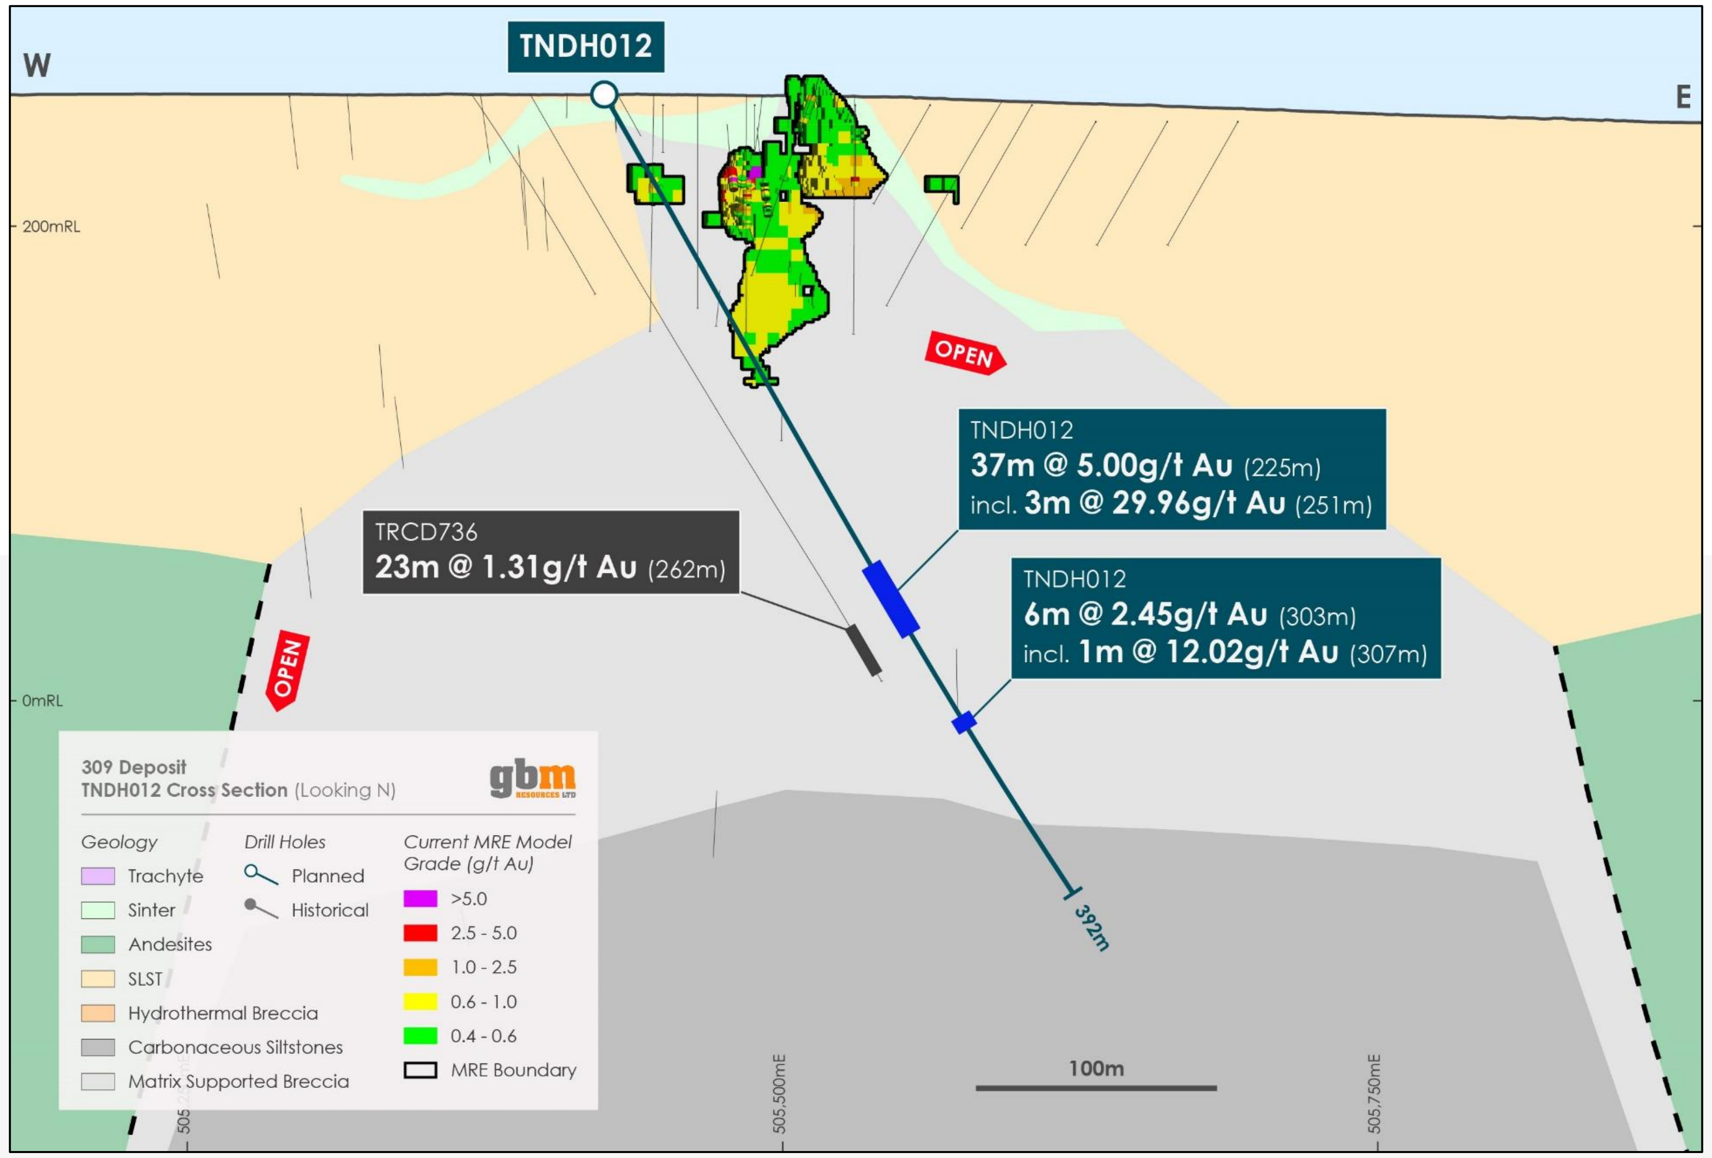
- Significant intersections of **broad, high-grade mineralisation outside of the existing MRE**
- Provided significant structural and mineralisation controls improving **targeting of deeper, high-grade ore shoots** below the existing MRE
- The thick, high-grade intercept in TNDH012 is a **100m step out from the existing MRE** and successfully intersected an interpreted shallow dipping structure

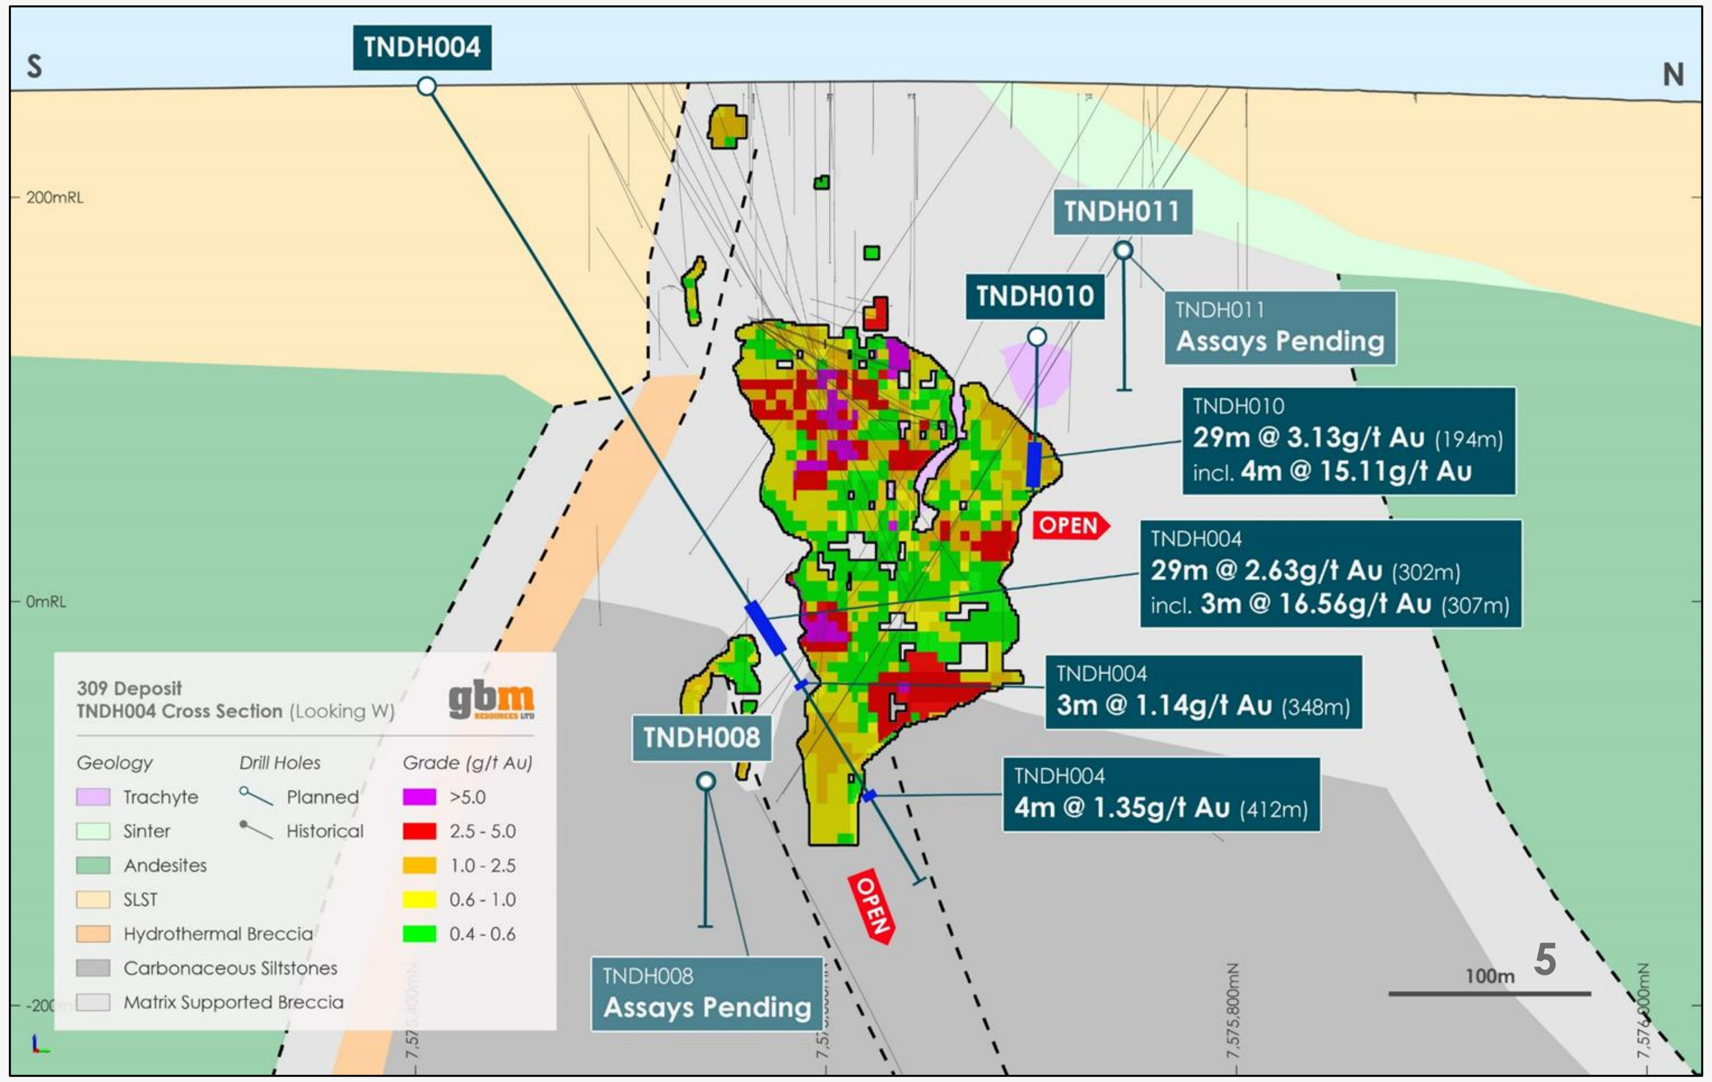
Significant High-Grade Intersections from Stage 1 Drilling including[1]:

– TNDH012 : **37m @ 5.00g/t Au** from 225m
Incl. **1m @ 77.25g/t Au** from 228m
Incl. **3m @ 29.96g/t Au** from 251m

– TNDH010: **29m @ 3.13g/t Au** from 194m
Incl. **4m @ 15.11g/t Au** from 195m including
1m @ 49.87g/t Au from 196m

– TNDH004: **29m @ 2.63g/t Au** from 302m
Incl. **3m @ 16.56g/t Au** from 307m





1 Refer to ASX announcement 'Gold Mineralisation Extended at 309 Deposit', 22 January 2026, and, 'Outstanding High-Grade Intersection 100m Outside 309 Deposit', 29 January 2026

Twin Hills: Lone Sister Deposit

MINERALISATION OPEN IN MULTIPLE DIRECTIONS AND MATERIAL GAPS IN RESOURCE MODEL REQUIRING INFILL DRILLING

Mineral Resource (JORC)[1]:

– **12.4Mt @ 1.2g/t Au (0.48Moz Au)**

Potential open pit and bulk underground configurations[1]:

– **11.8Mt @ 1.1g/t Au** for 0.42Moz Au above 0mRL (~250m depth)

– **0.68Mt @ 2.7g/t Au** below 0mRL for 0.06Moz Au

Significant High-Grade Intersections[2] including:

– **LSDH002[3]:** **181.7m @ 1.55g/t Au** from 189m
Incl. **52m @ 2.77g/t Au** from 299m

– LRCD015: **146m @ 9.81g/t Au** from 104m
Incl. **28m @ 45.2g/t Au** from 211m

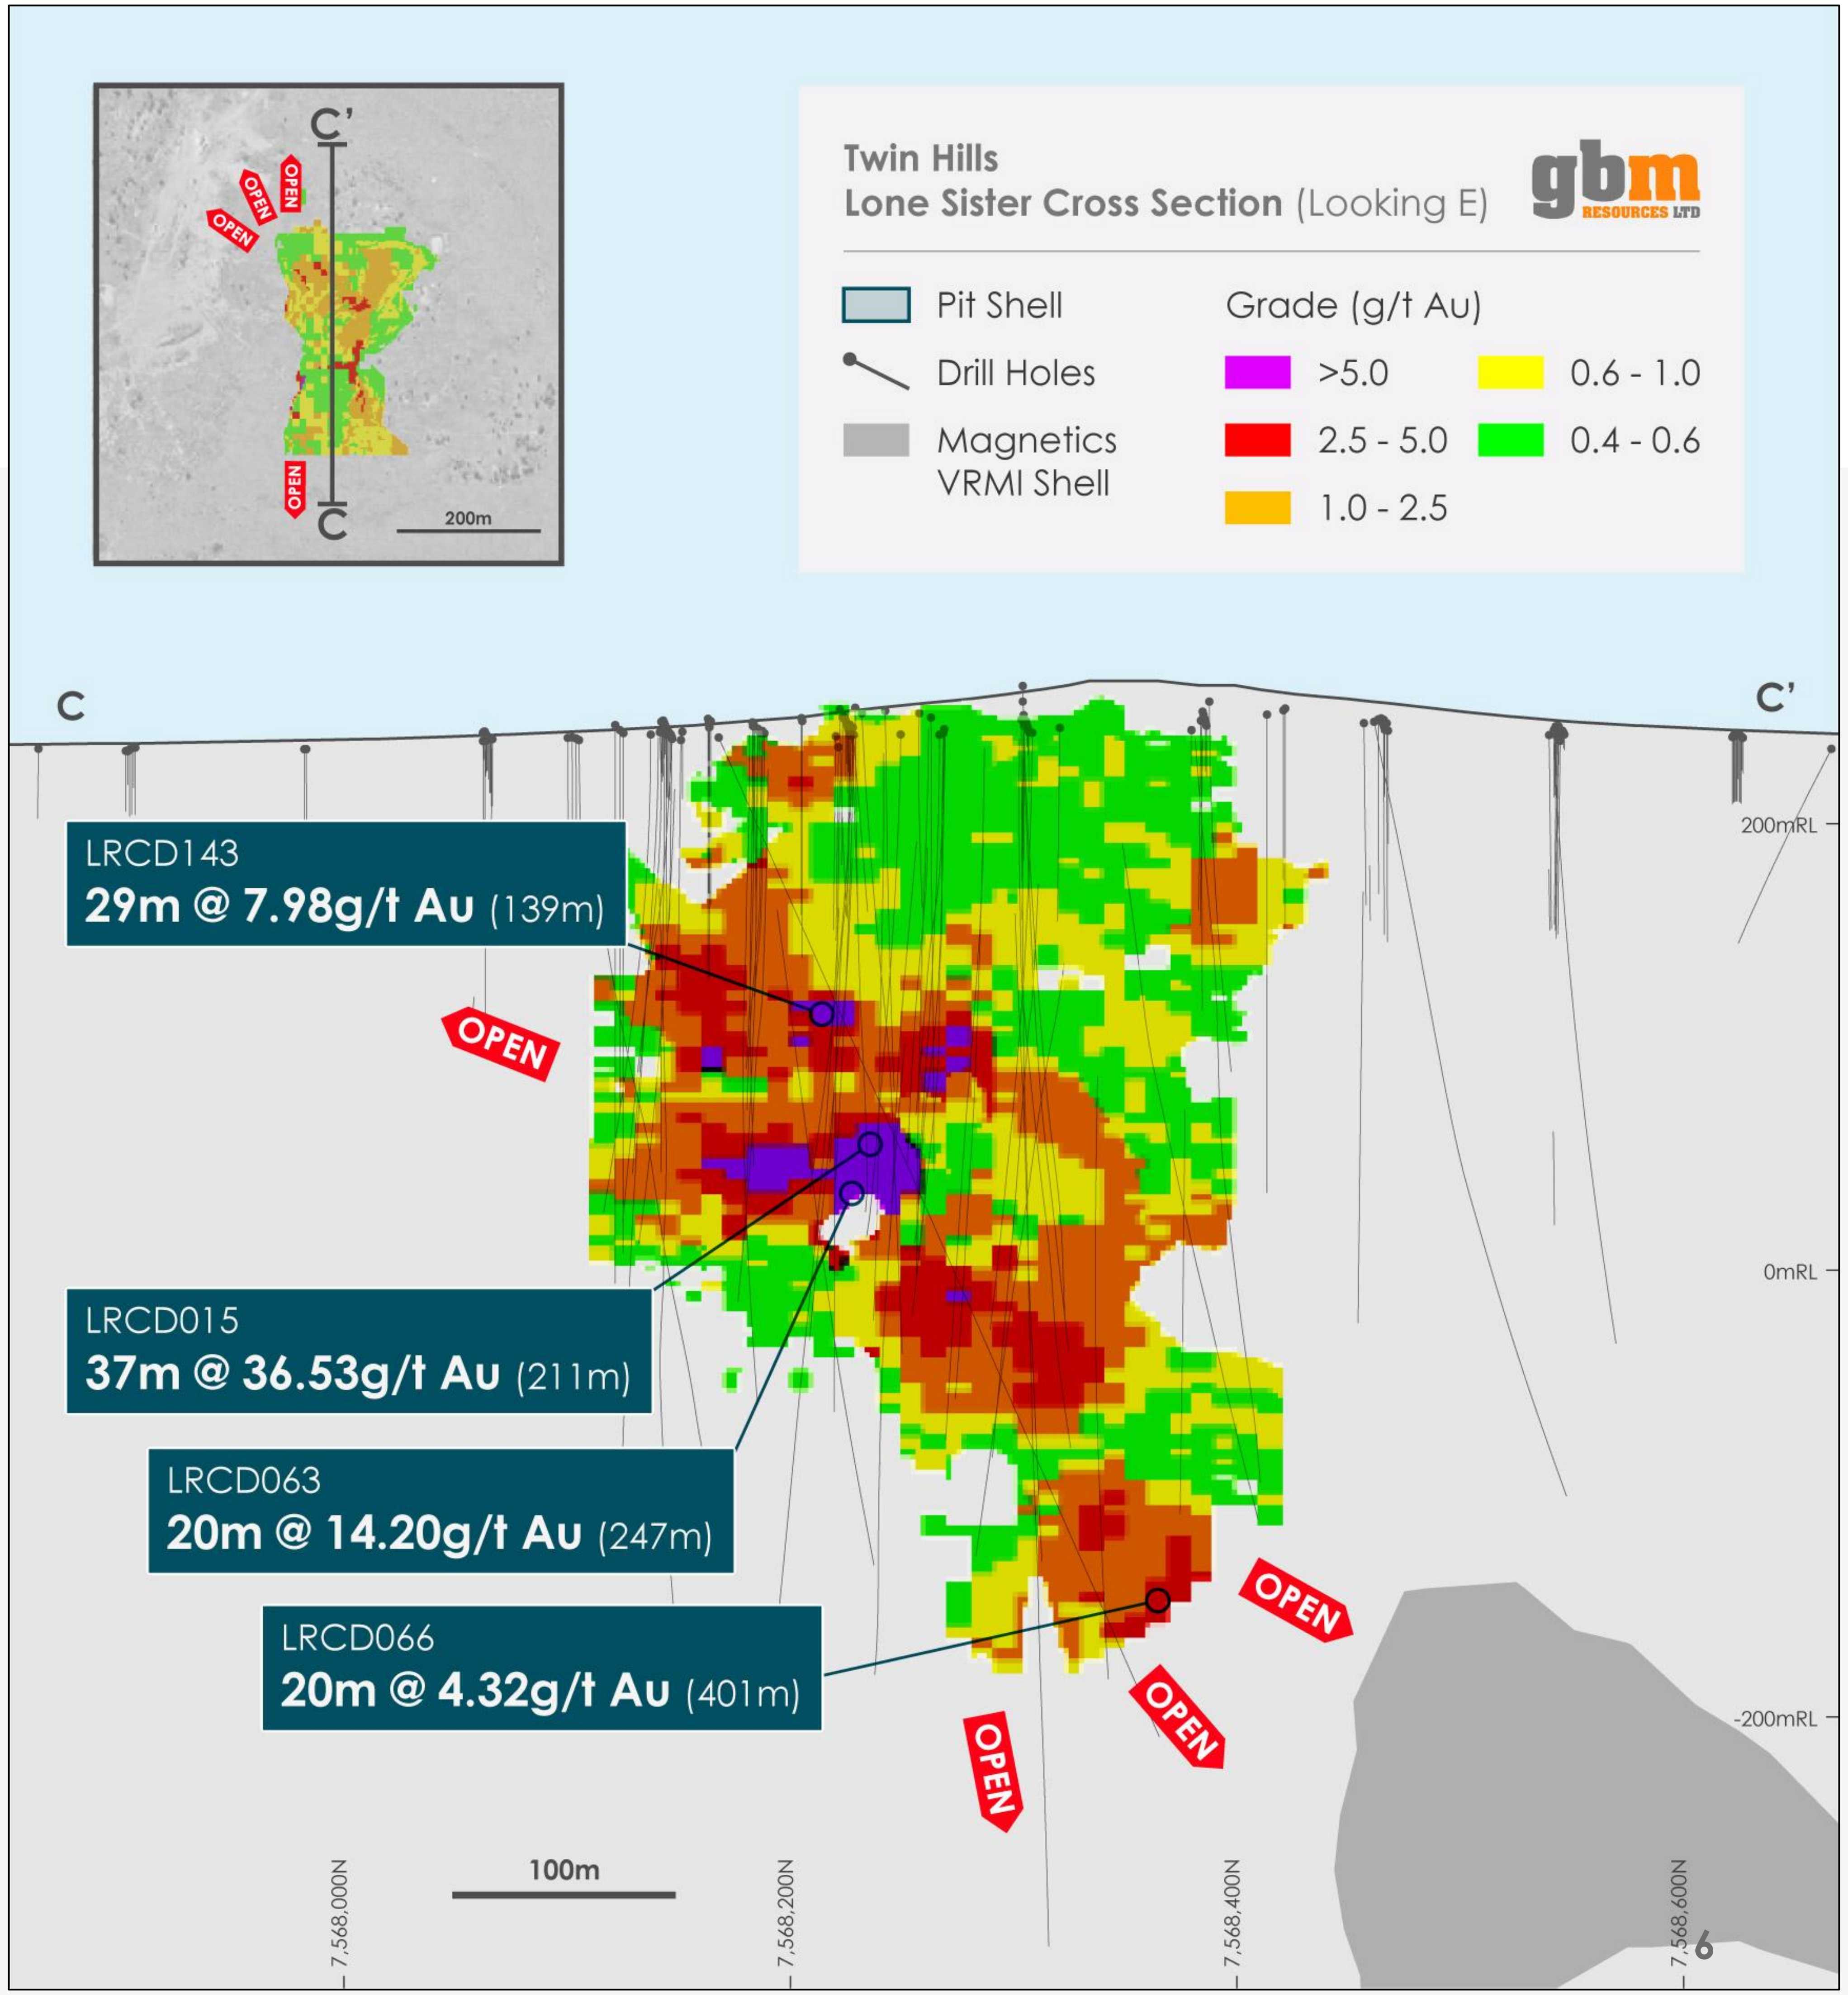
– LRCD063: **20m @ 14.20g/t Au** from 247m

– LRCD143: **29m @ 7.98g/t Au** from 139m

– Possible high-grade feeder zone at depth

– **Epithermal veining in a rhyolite host**

– Limited geophysical data available



1 Refer to ASX announcement 'Twin Hills Gold Project Upgrades to ~1Moz Mineral Resource', 5 December 2022
2 Refer to ASX announcement 'Mount Coolon and Twin Hills Combined Resource Base Approaches 1 Million Ounces', 18 January 2019
3 Refer to ASX announcement 'First Drill Results Extend Lone Sister Gold Mineralisation', 12 November 2025

Twin Hills: Lone Sister Recent Drilling

RESULTS FROM ALL DRILLHOLES INTERSECTED HIGH-GRADE MINERALISATION OUTSIDE OF THE EXISTING MRE

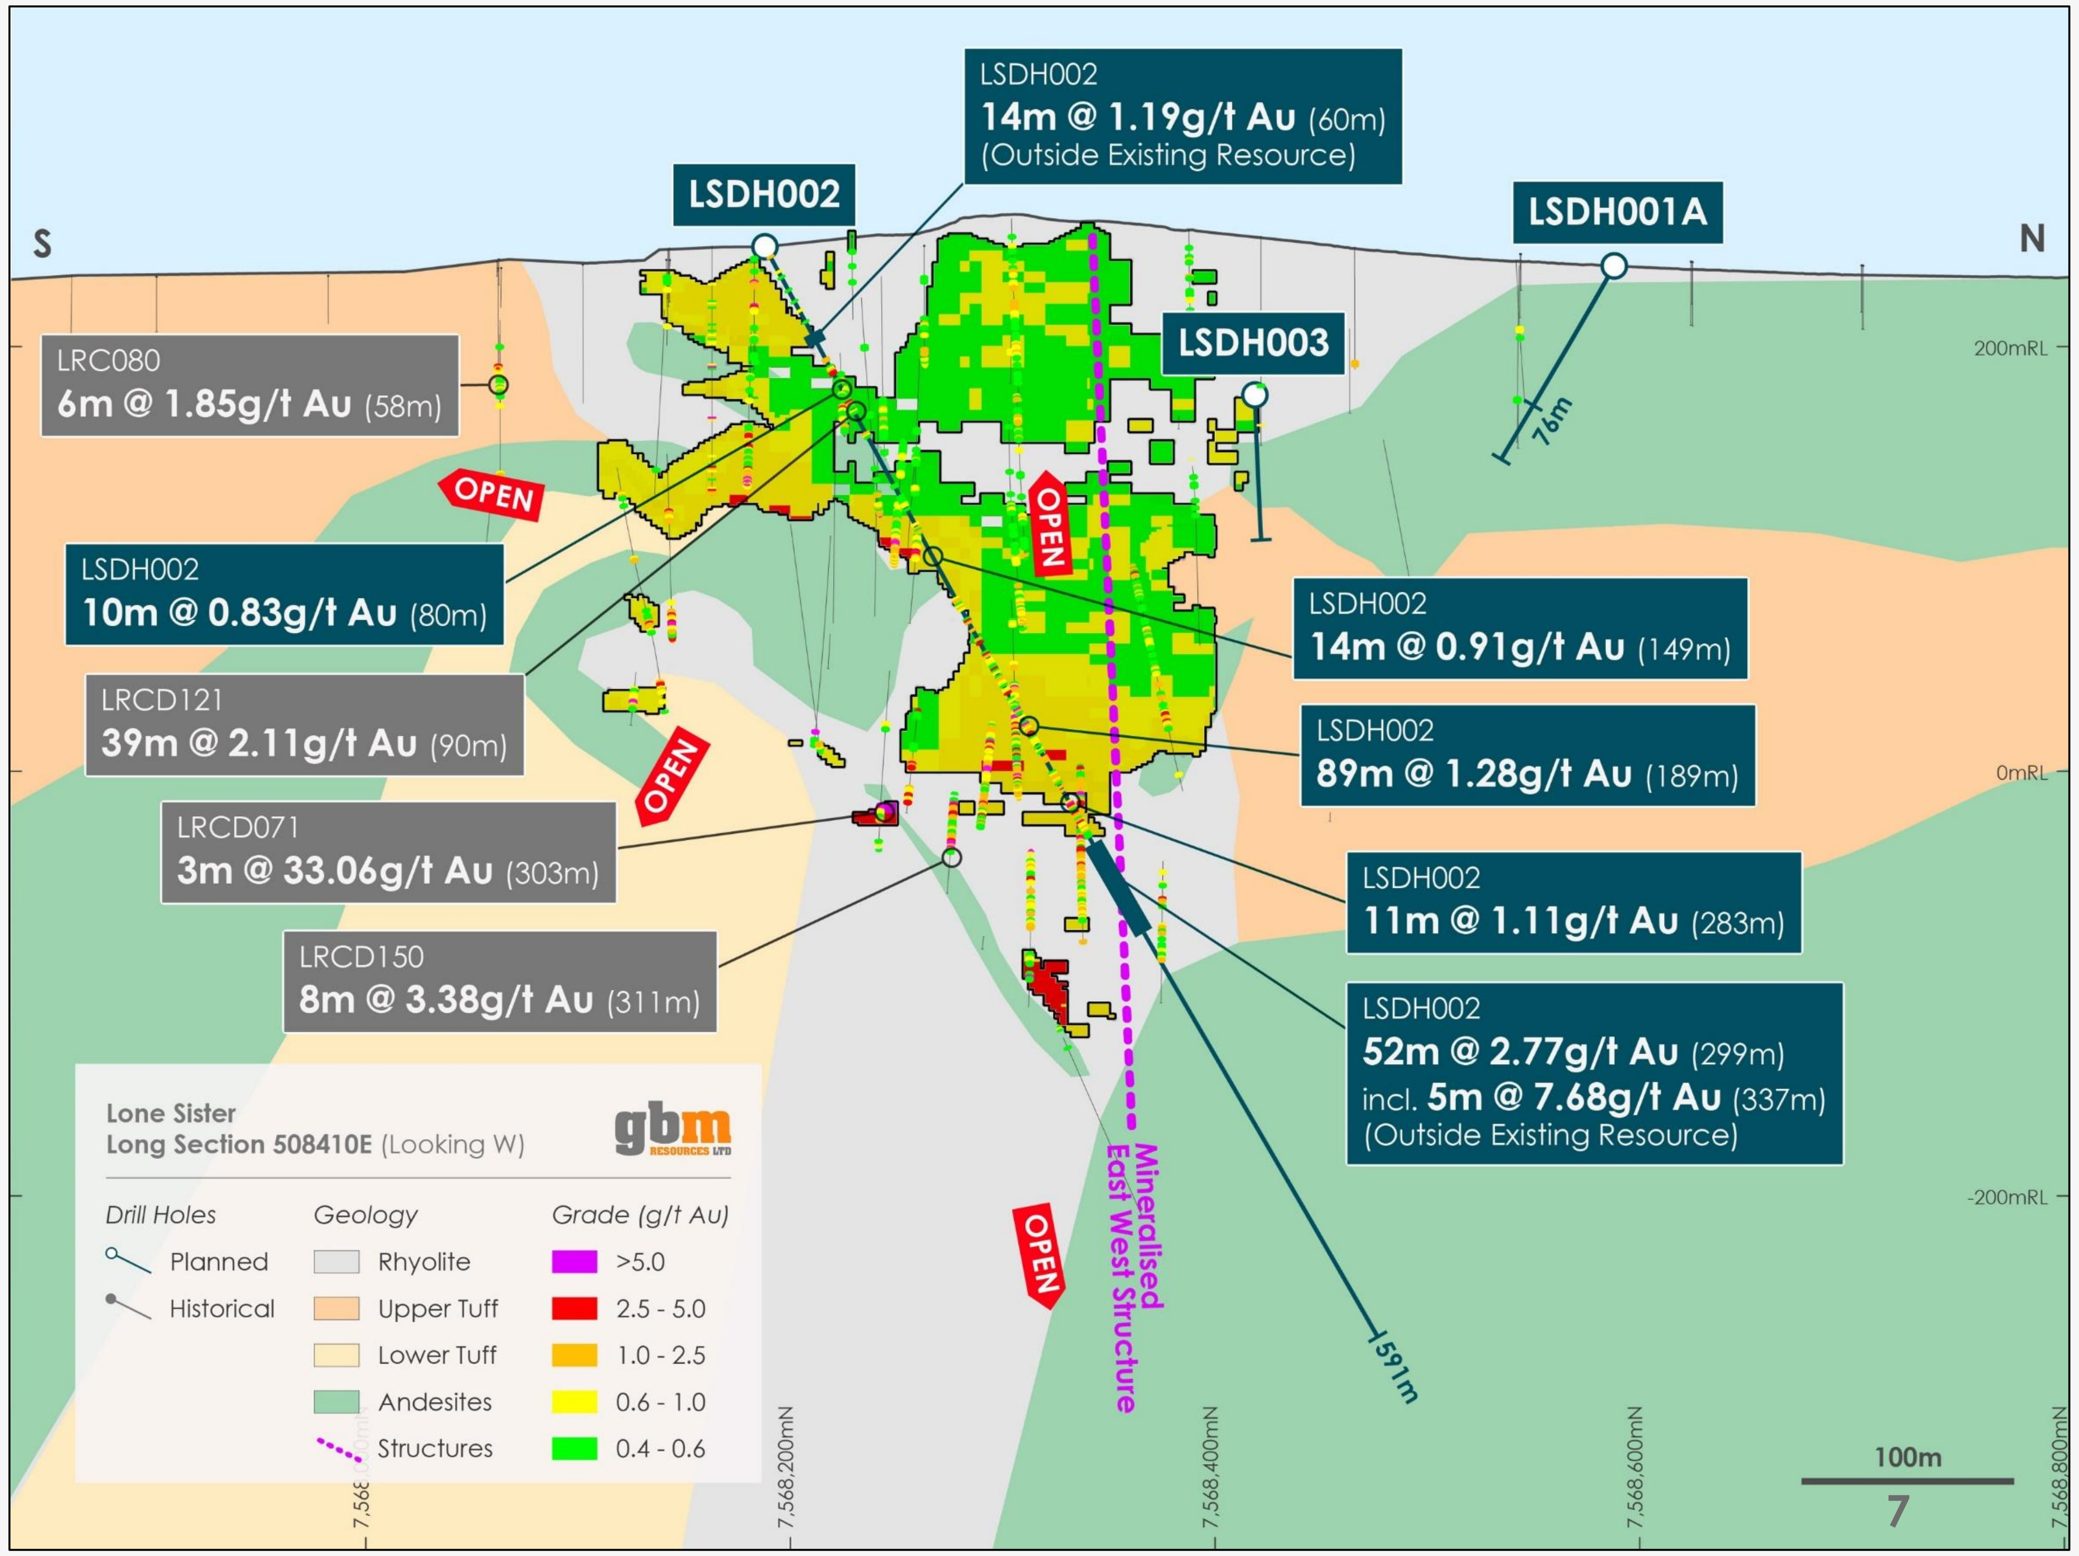
- All holes confirmed a **newly interpreted east-west structure associated with high-grade gold mineralisation**.
- Two distinct styles of high-grade gold mineralisation at Lone Sister have now been identified:
  - quartz vein low sulphidation epithermal; and
  - a **newly identified mineralised rhyolite** more typical of intrusive-related gold mineralisation
- These results provide the opportunity to target **resource growth from both within and outside the current MRE**

Significant High-Grade Intersections from Stage 1 Drilling including[1]:

– LSDH001A : **10m @ 4.33g/t Au** from 442m
Incl. **5m @ 6.18g/t Au** from 446m

– LSDH002: **52m @ 2.77 g/t Au** from 299m
Incl. **5m @ 7.68g/t Au** from 195m

– LSDH003: **7m @ 2.55g/t Au** from 343m
Incl. **4m @ 4.01g/t Au** from 347m

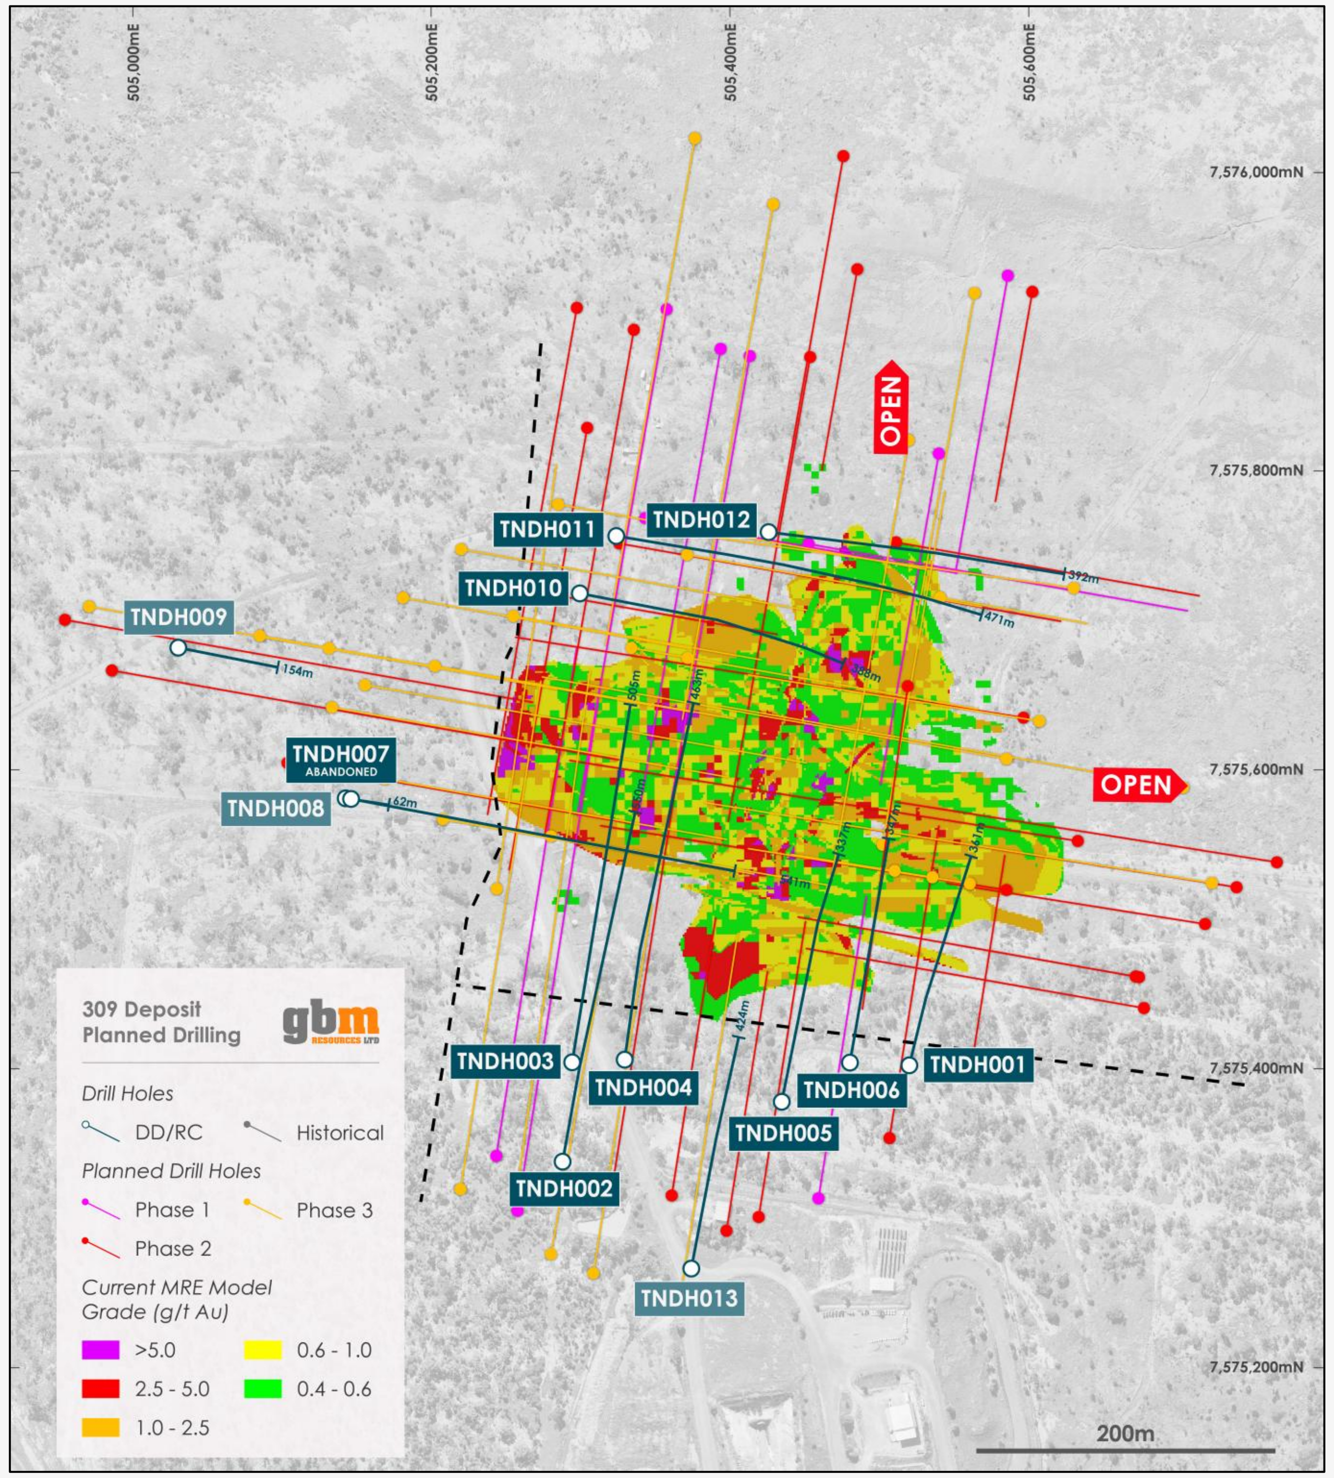


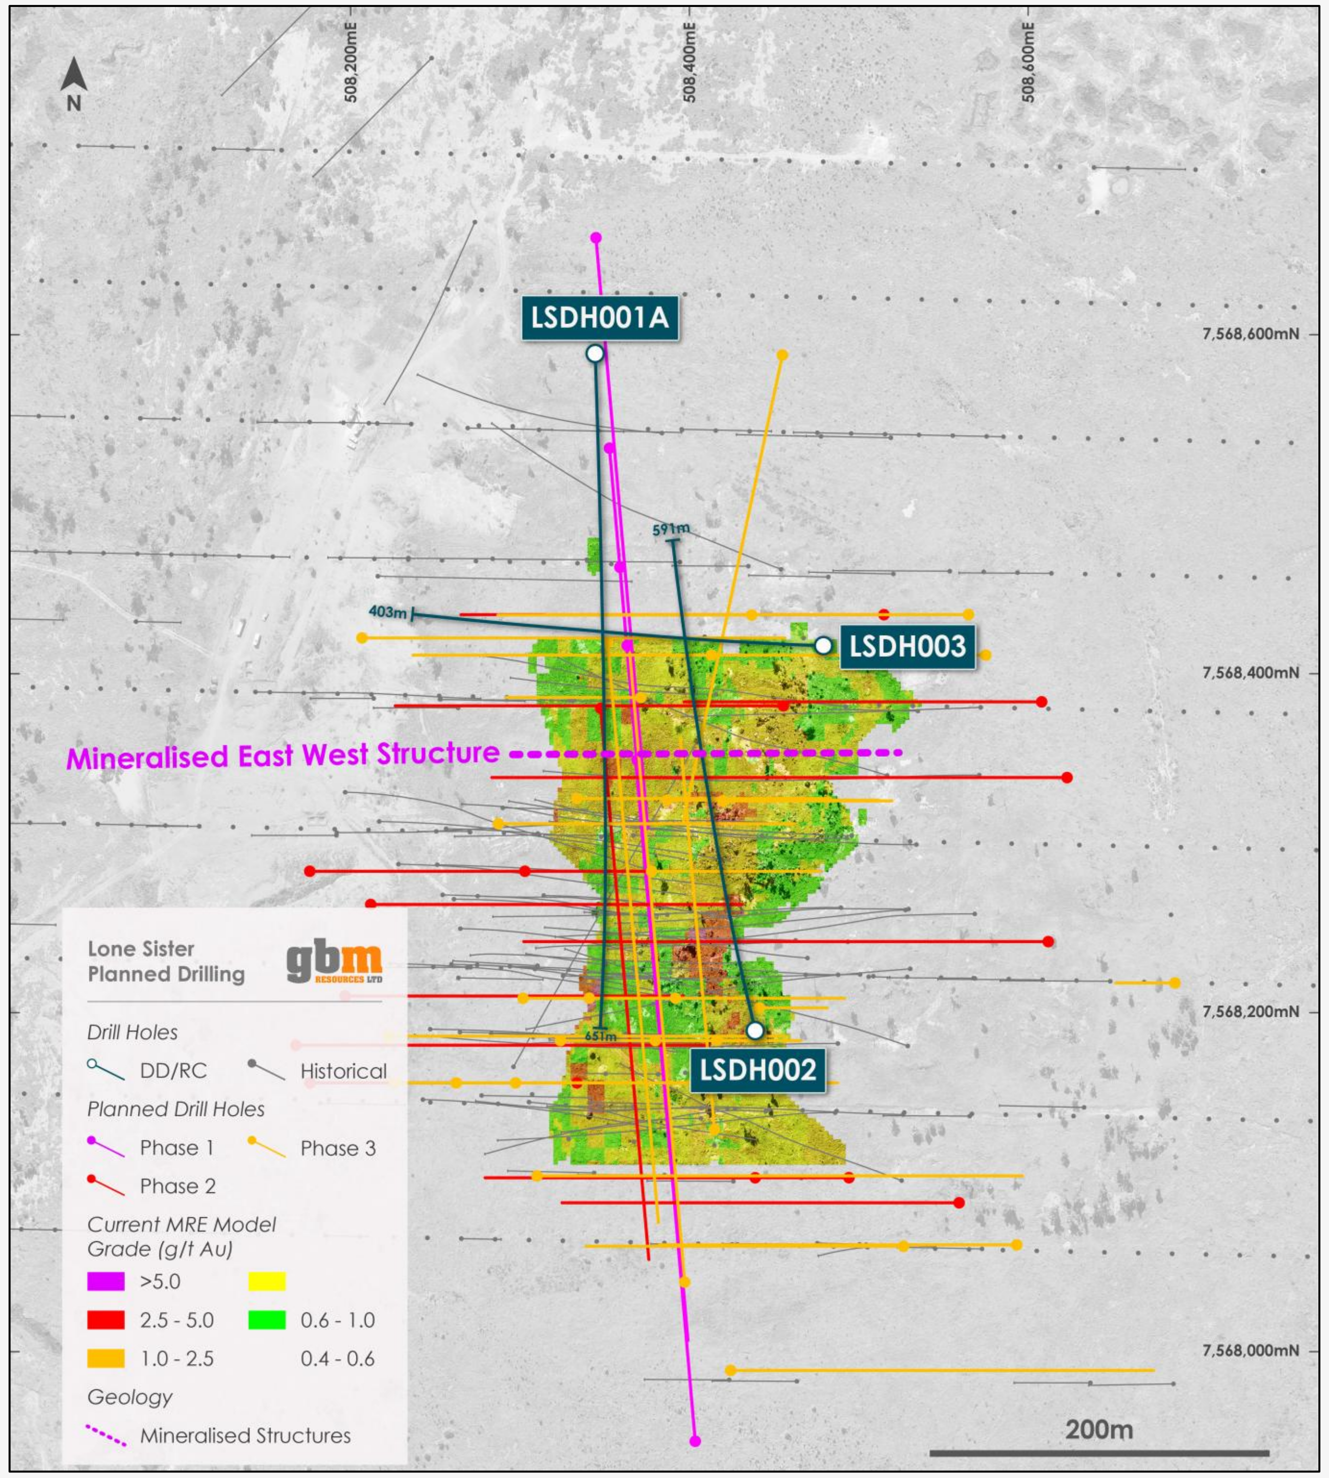
1 Refer to ASX announcement 'First Drill Results Extend Lone Sister Gold Mineralisation', 12 November 2025, and, 'Gold Mineralisation Extended at 309 Deposit', 22 January 2026

Twin Hills: 50,000m Drilling Program Commenced

STAGE 2 DRILLING PROGRAM HAS BEEN DEVELOPED TO INCREASE THE CURRENT MRE AND DEFINE THE QUANTUM AND TENOR OF THE POTENTIAL OPEN PIT MINERALISATION

- Multi-phased drilling program
- **Three drill rigs** operating by start of March
- Planned **20,000m of RC** and **30,000m of DD**
- Targeting material growth to the current MRE
- Designed to **demonstrate high-grade continuity**
- Infill drill gaps within the existing MRE block model
- Will define the quantum and tenor of the upper section of the mineralisation, **demonstrating the open pit potential**
- **Extend MRE at depth** targeting deeper feeder structures and **high-grade ore shoots**

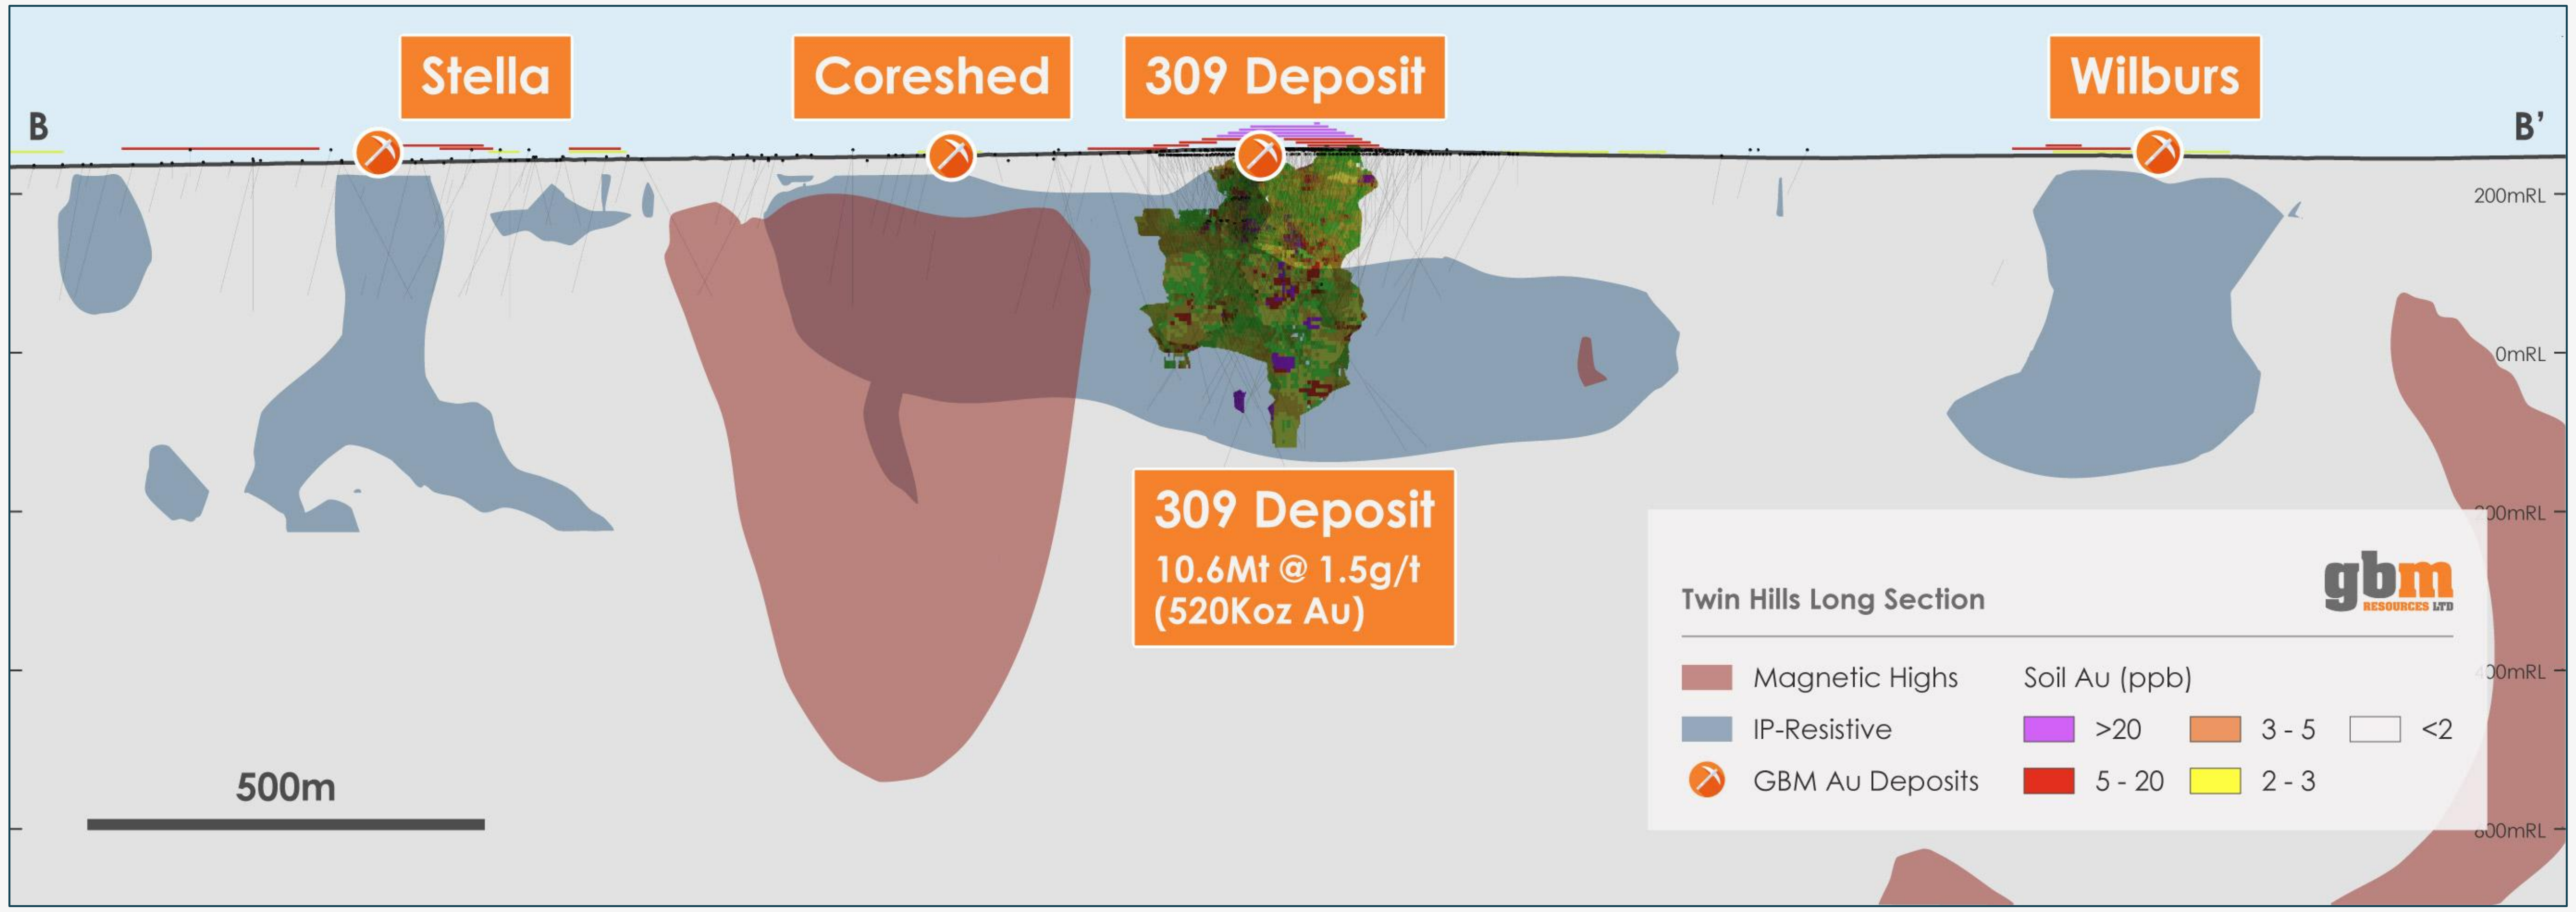


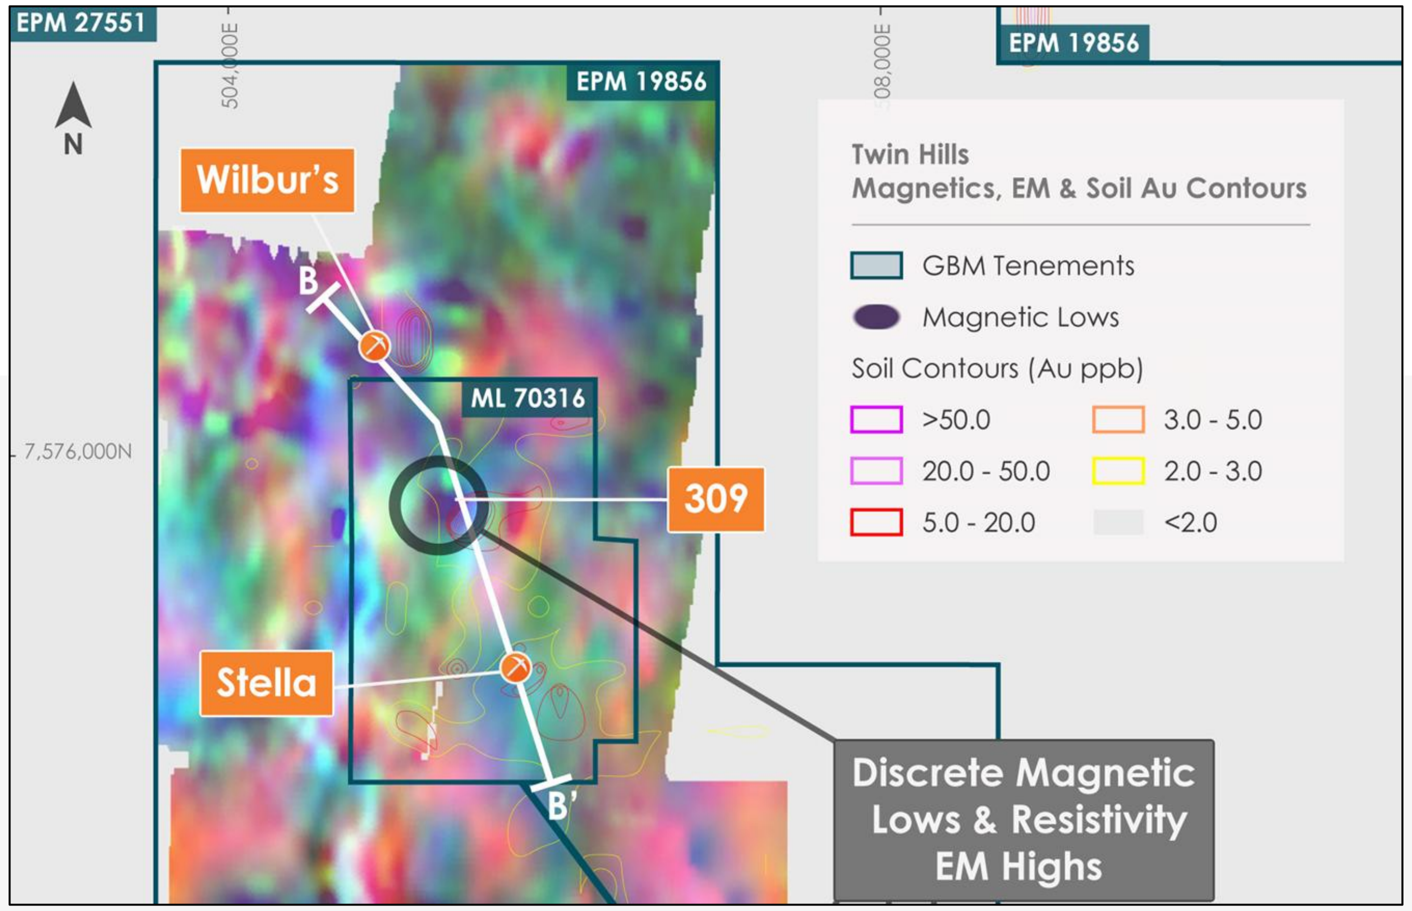


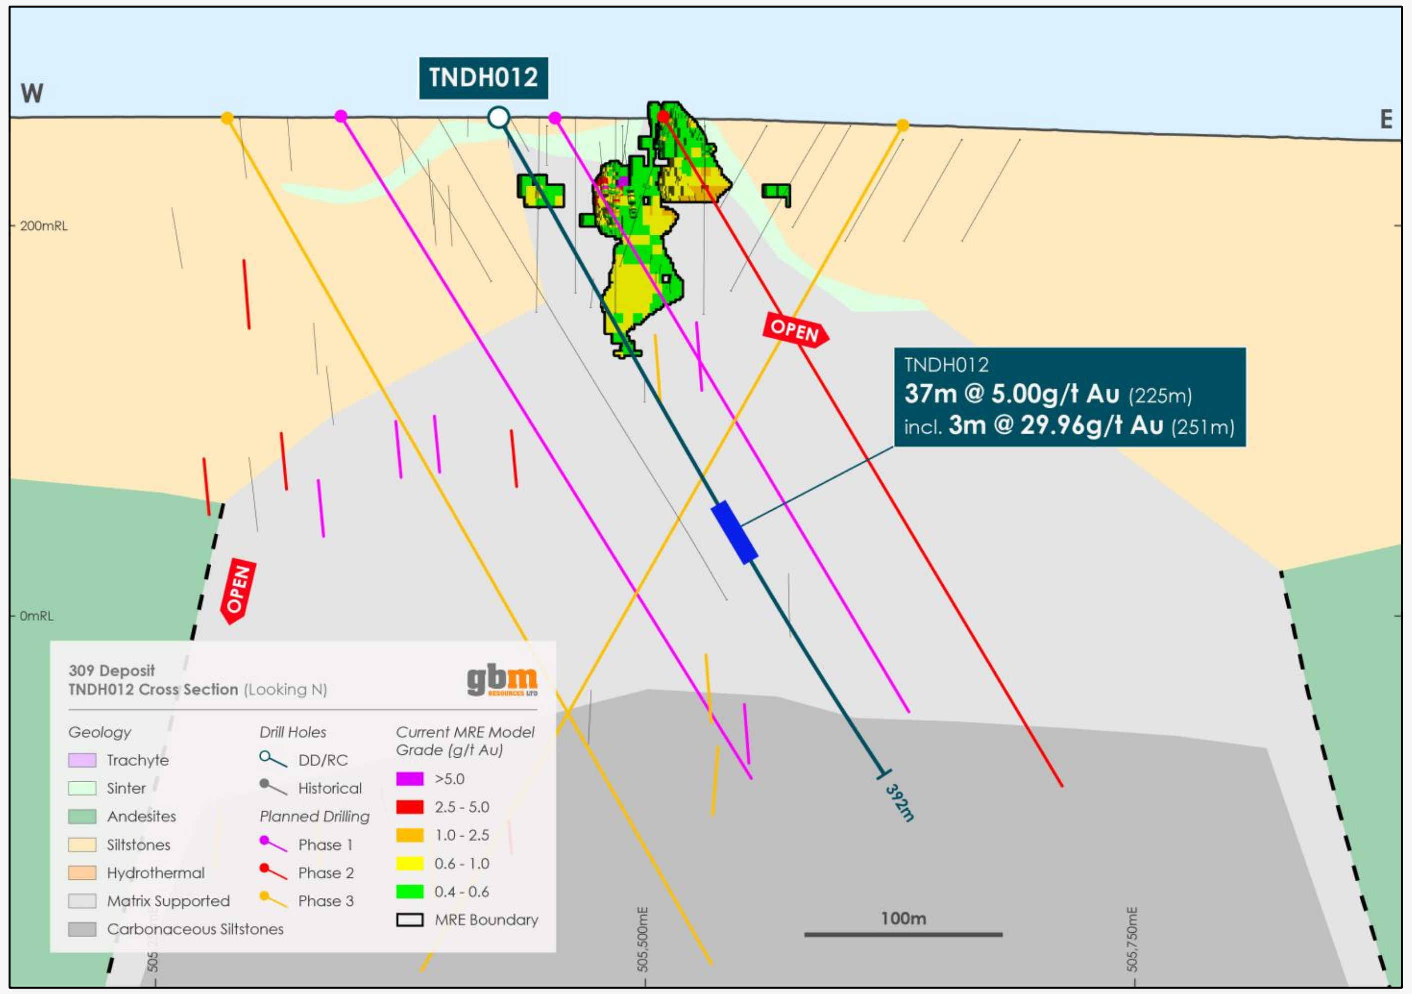
Refer to ASX announcement '50,000m Stage 2 Drilling Program Commences at Twin Hills', 12 February 2026

Twin Hills: 309 Proximal Targets and Anomalies

>2.5KM LOCALISED SYSTEM WITHIN THE >14KM TWIN HILLS CORRIDOR WITH MULTIPLE UNTESTED ANOMALIES







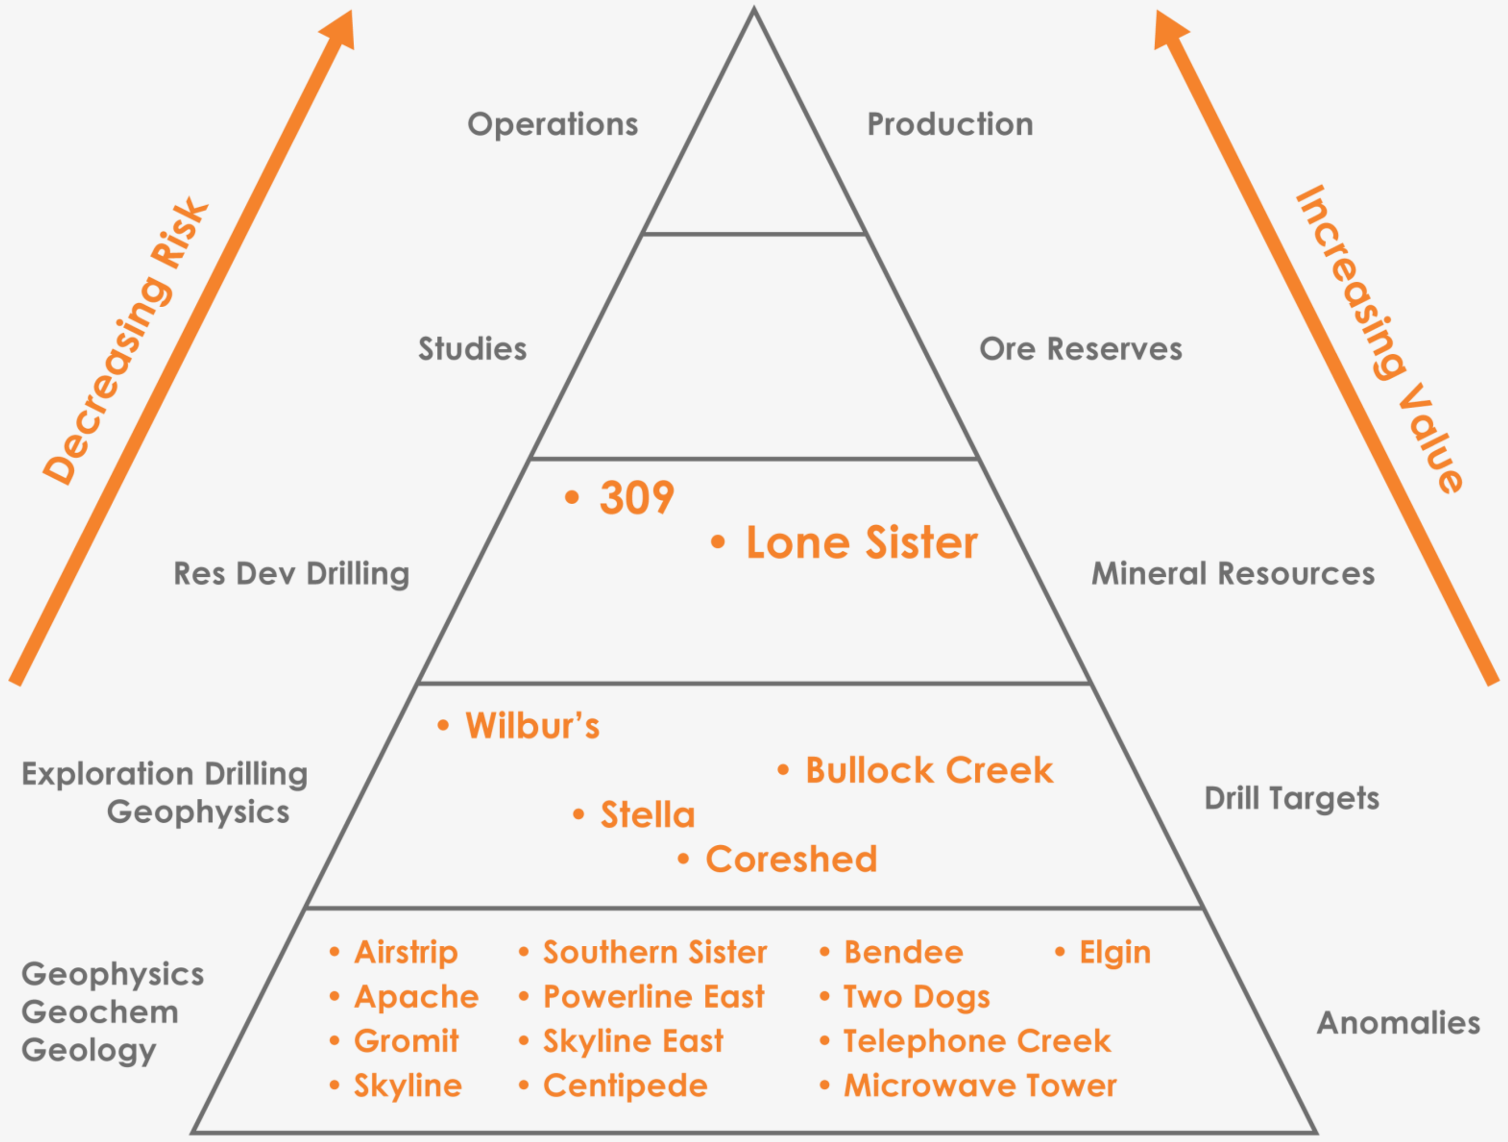
- Significantly **large, untested area to North** and **East** at 309
- Good correlation at 309 between mineralisation and IP resistivity anomaly
- Magnetic highs at margins correlate with Andesite domes / volcanics, the contacts of which likely provided **primary fluid pathways**
- 309 vented to surface (sinter above) whilst other anomalies appear to be capped. **Historical drilling may not have been deep enough**

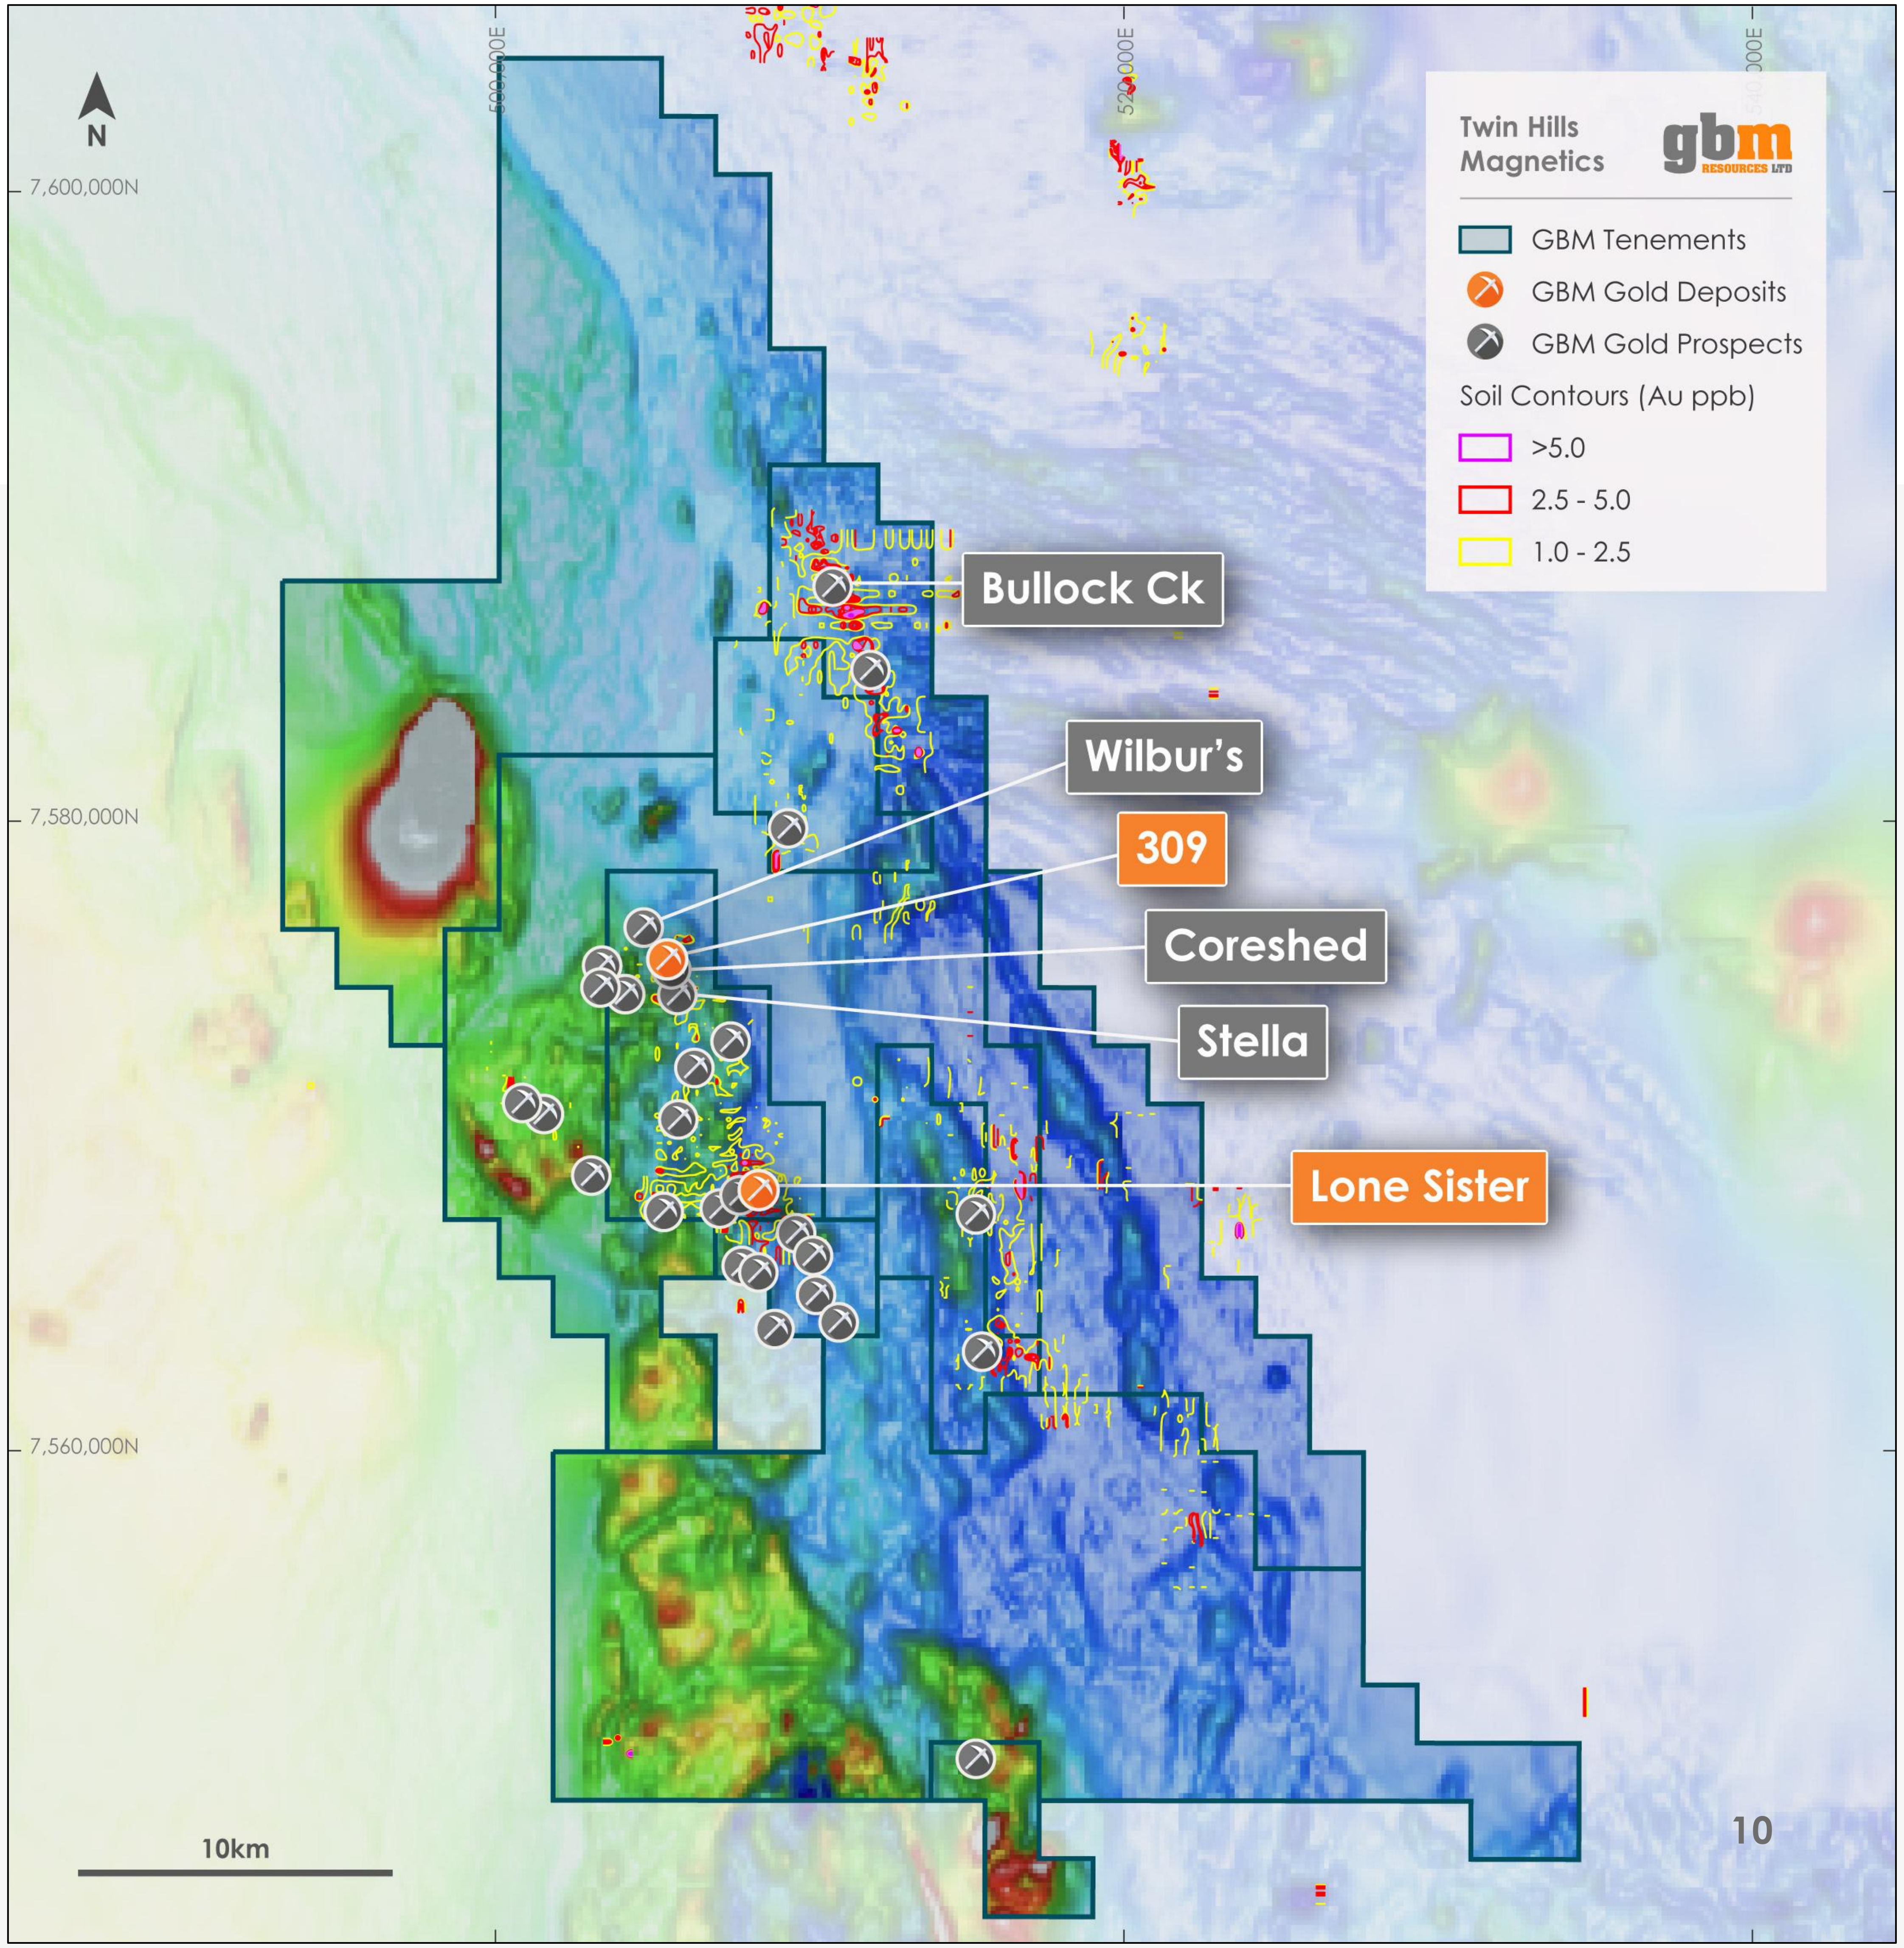
Twin Hills: Gold Corridor

CURRENT DRILL PROGRAM DESIGNED TO EXPAND RESOURCES AND TO MAKE DISCOVERIES BY DRILLING IDENTIFIED TARGETS

>14km long Twin Hills corridor with **multiple untested anomalies**

Clear Epithermal Structural Zone connecting Lone Sister and 309 Deposits (Magnetic Low with Au/As in Soils)





Yandan Gold Project

Preparing to grow the 0.51Moz Mineral Resource at Yandan

Yandan: East Hill Deposit

HIGH GRADE EPITHERMAL VEINING IN ANDESITE HOST WITH DISPLACED PRIMARY FEEDER ZONE

Mineral Resource (JORC)[1]:

- **12.8Mt @ 1.1g/t Au** for 0.44Moz Au
  Incl. **1.1Mt @ 5.67g/t Au** for 0.20Moz Au

Significant High-Grade Intersections[2] including:

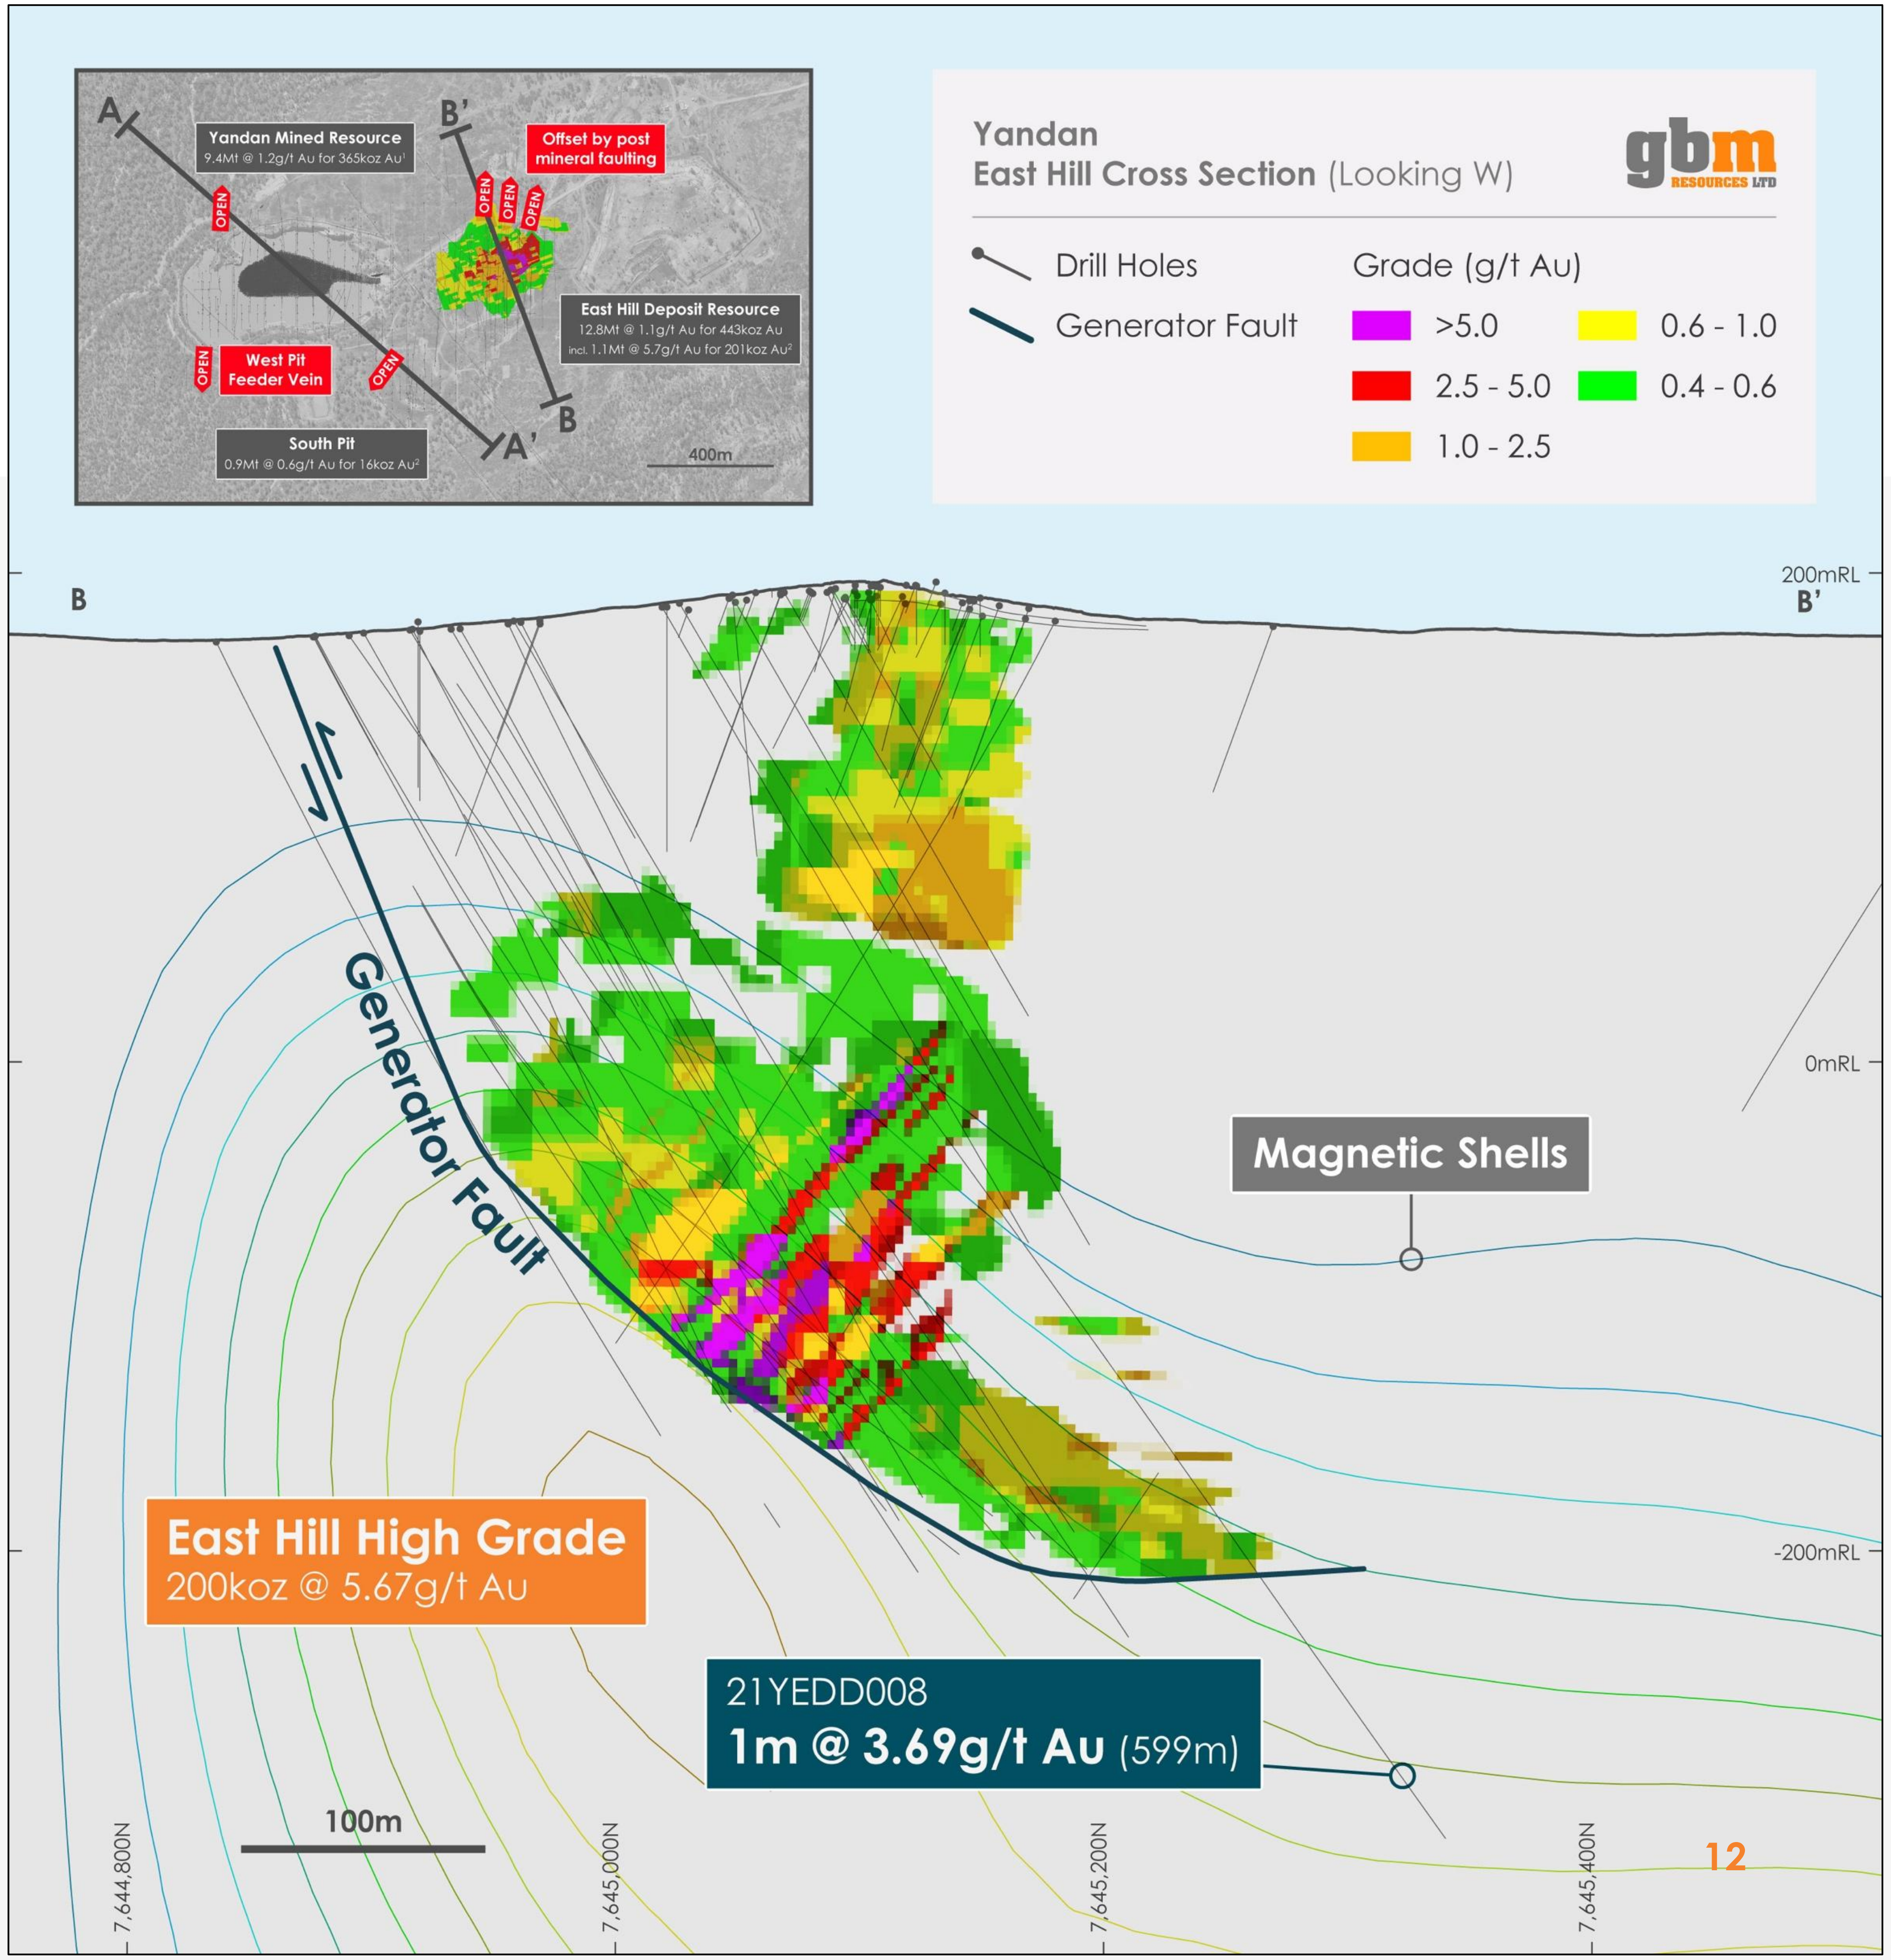
- YAN022: **191m @ 4.0g/t Au** from 190m
  Incl. **43.7m @ 13.9g/t Au** from 325m
- 21YEDDD006A: **13m @ 9.2g/t Au** from 321m
  Incl. **1m @ 48.4g/t Au** from 327m

Top of system interpreted to be displaced by post mineral Generator Fault - repeated geology below Generator Fault with Epithermal Vein Clasts in Breccias:

- 21YEDD008: **1m @ 3.69g/t Au** from 599m[3]

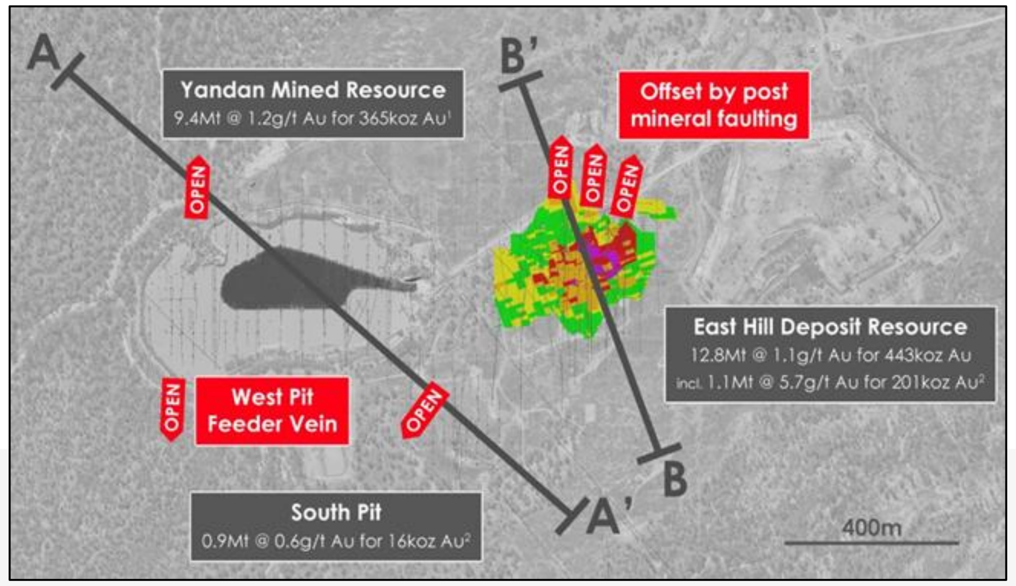
- Large scale, low-grade halo mineralisation (~1km²)
- Indications of a large epithermal feeder fissure vein at depth

1 Refer to ASX announcement 'Results of Yandan Mineral Resource Update', 14 March 2023
2 Refer to ASX announcement 'Resources Rising Stars Presentation', 13 February 2025
3 Refer to ASX announcement 'Phase 1 Drilling at Yandan Confirms Potential to Increase Current Gold Resources', 16 August 2021



Yandan: The Hunt for High-Grade Ore Shoots

NEAR TERM GEOPHYSICS TO UNLOCK THE POTENTIAL OF A LARGE, UNDEREXPLORED EPITHERMAL GOLD SYSTEM

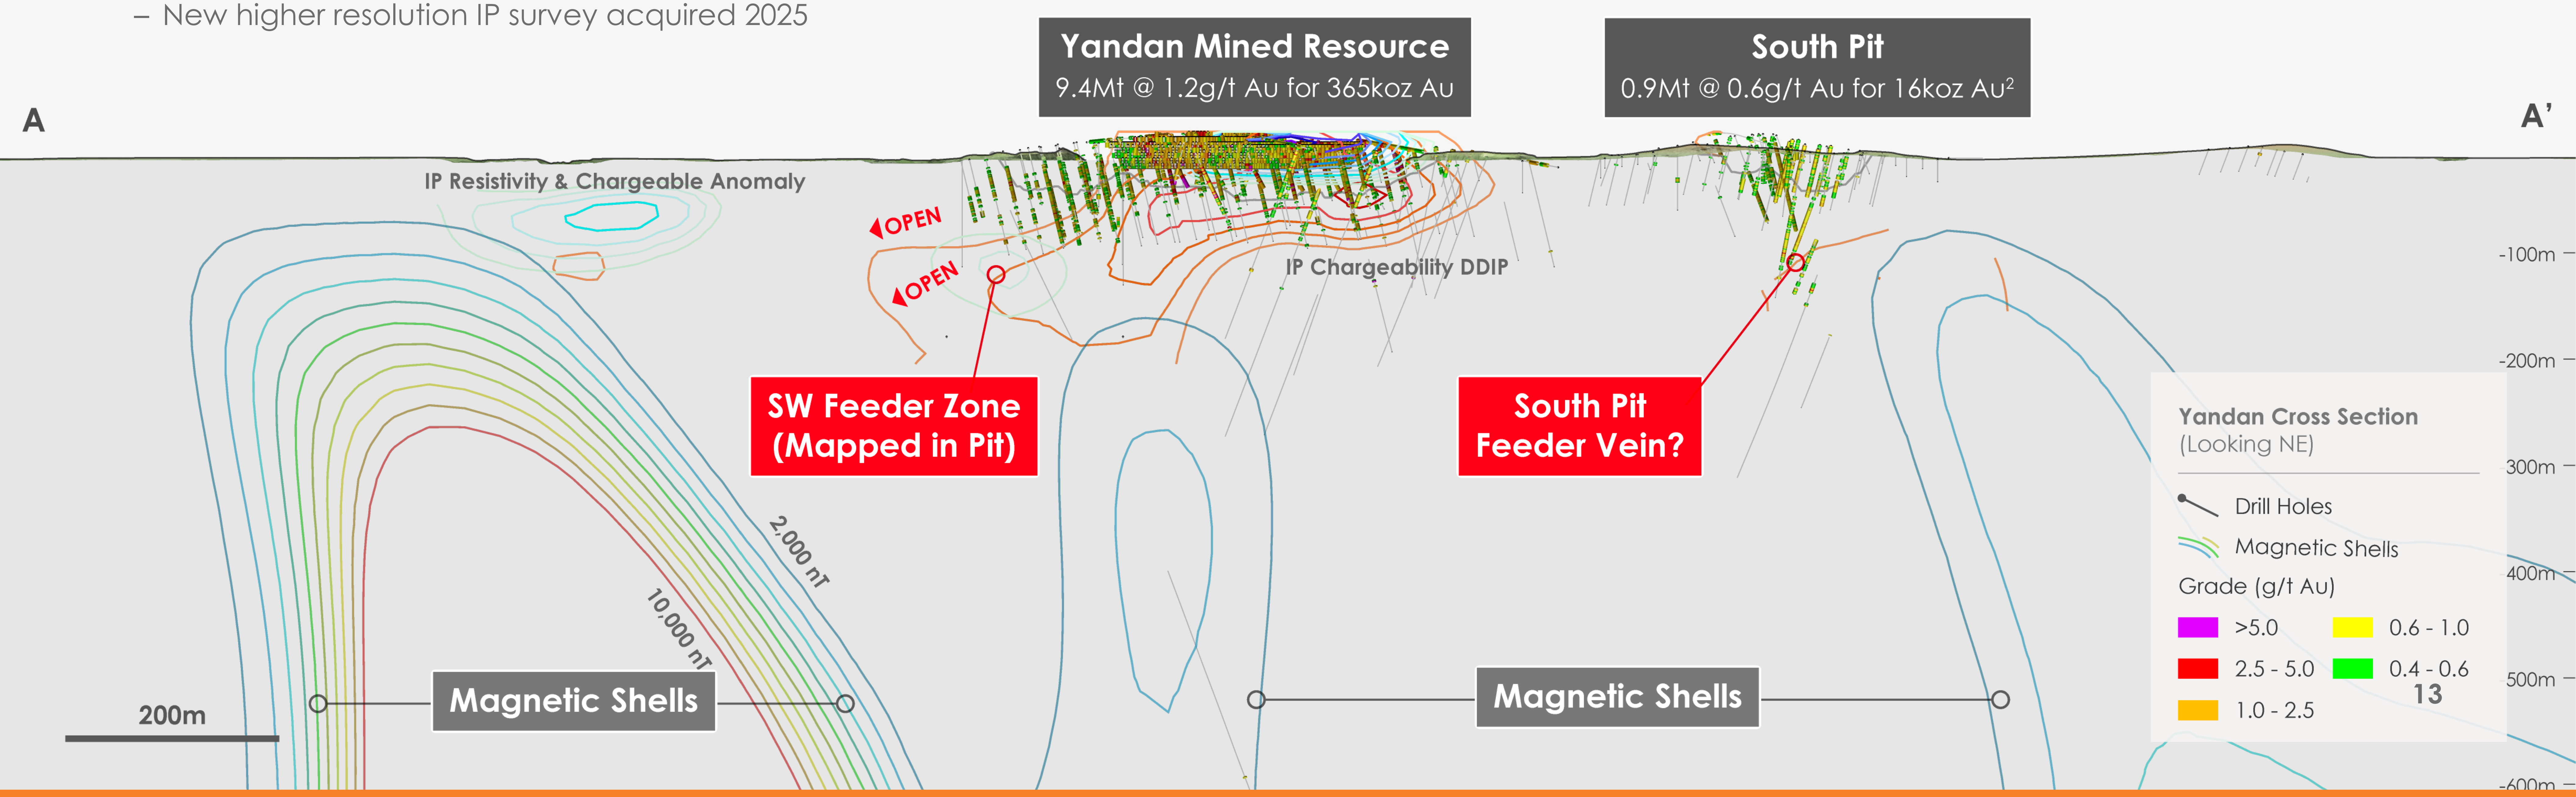


Geophysical Data (Induced Polarisation)

- Historical IP remodelled over all Yandan tenure
- IP Chargeability clearly maps all shallow mineralisation (sulphide) however, limited to 150m depth
- Modern 3D IP able to map down to ~400m
- New higher resolution IP survey acquired 2025

Geology

- Increased silica alteration and veining mapped in the West of the Main Pit
- Feeder zones for Main Pit & South Pit unknown
- Deep drilling failed to test potential feeder zones
- Additional mineralisation lies outside historical pits



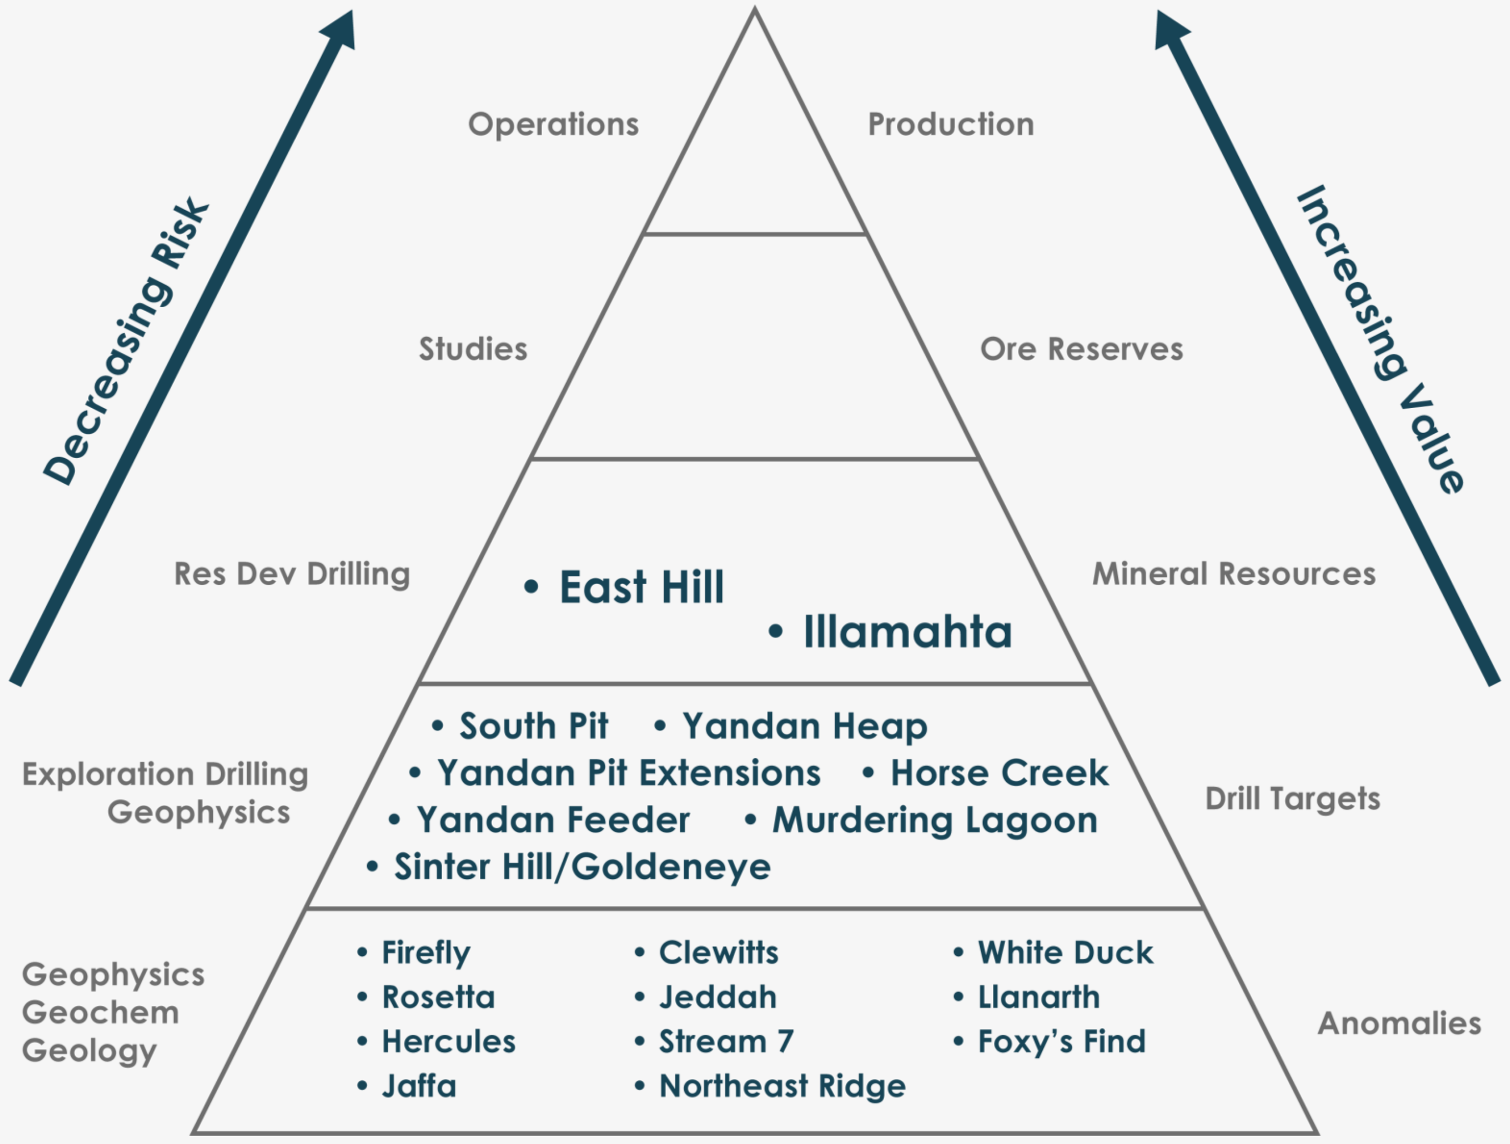
Yandan: Greenfields Exploration

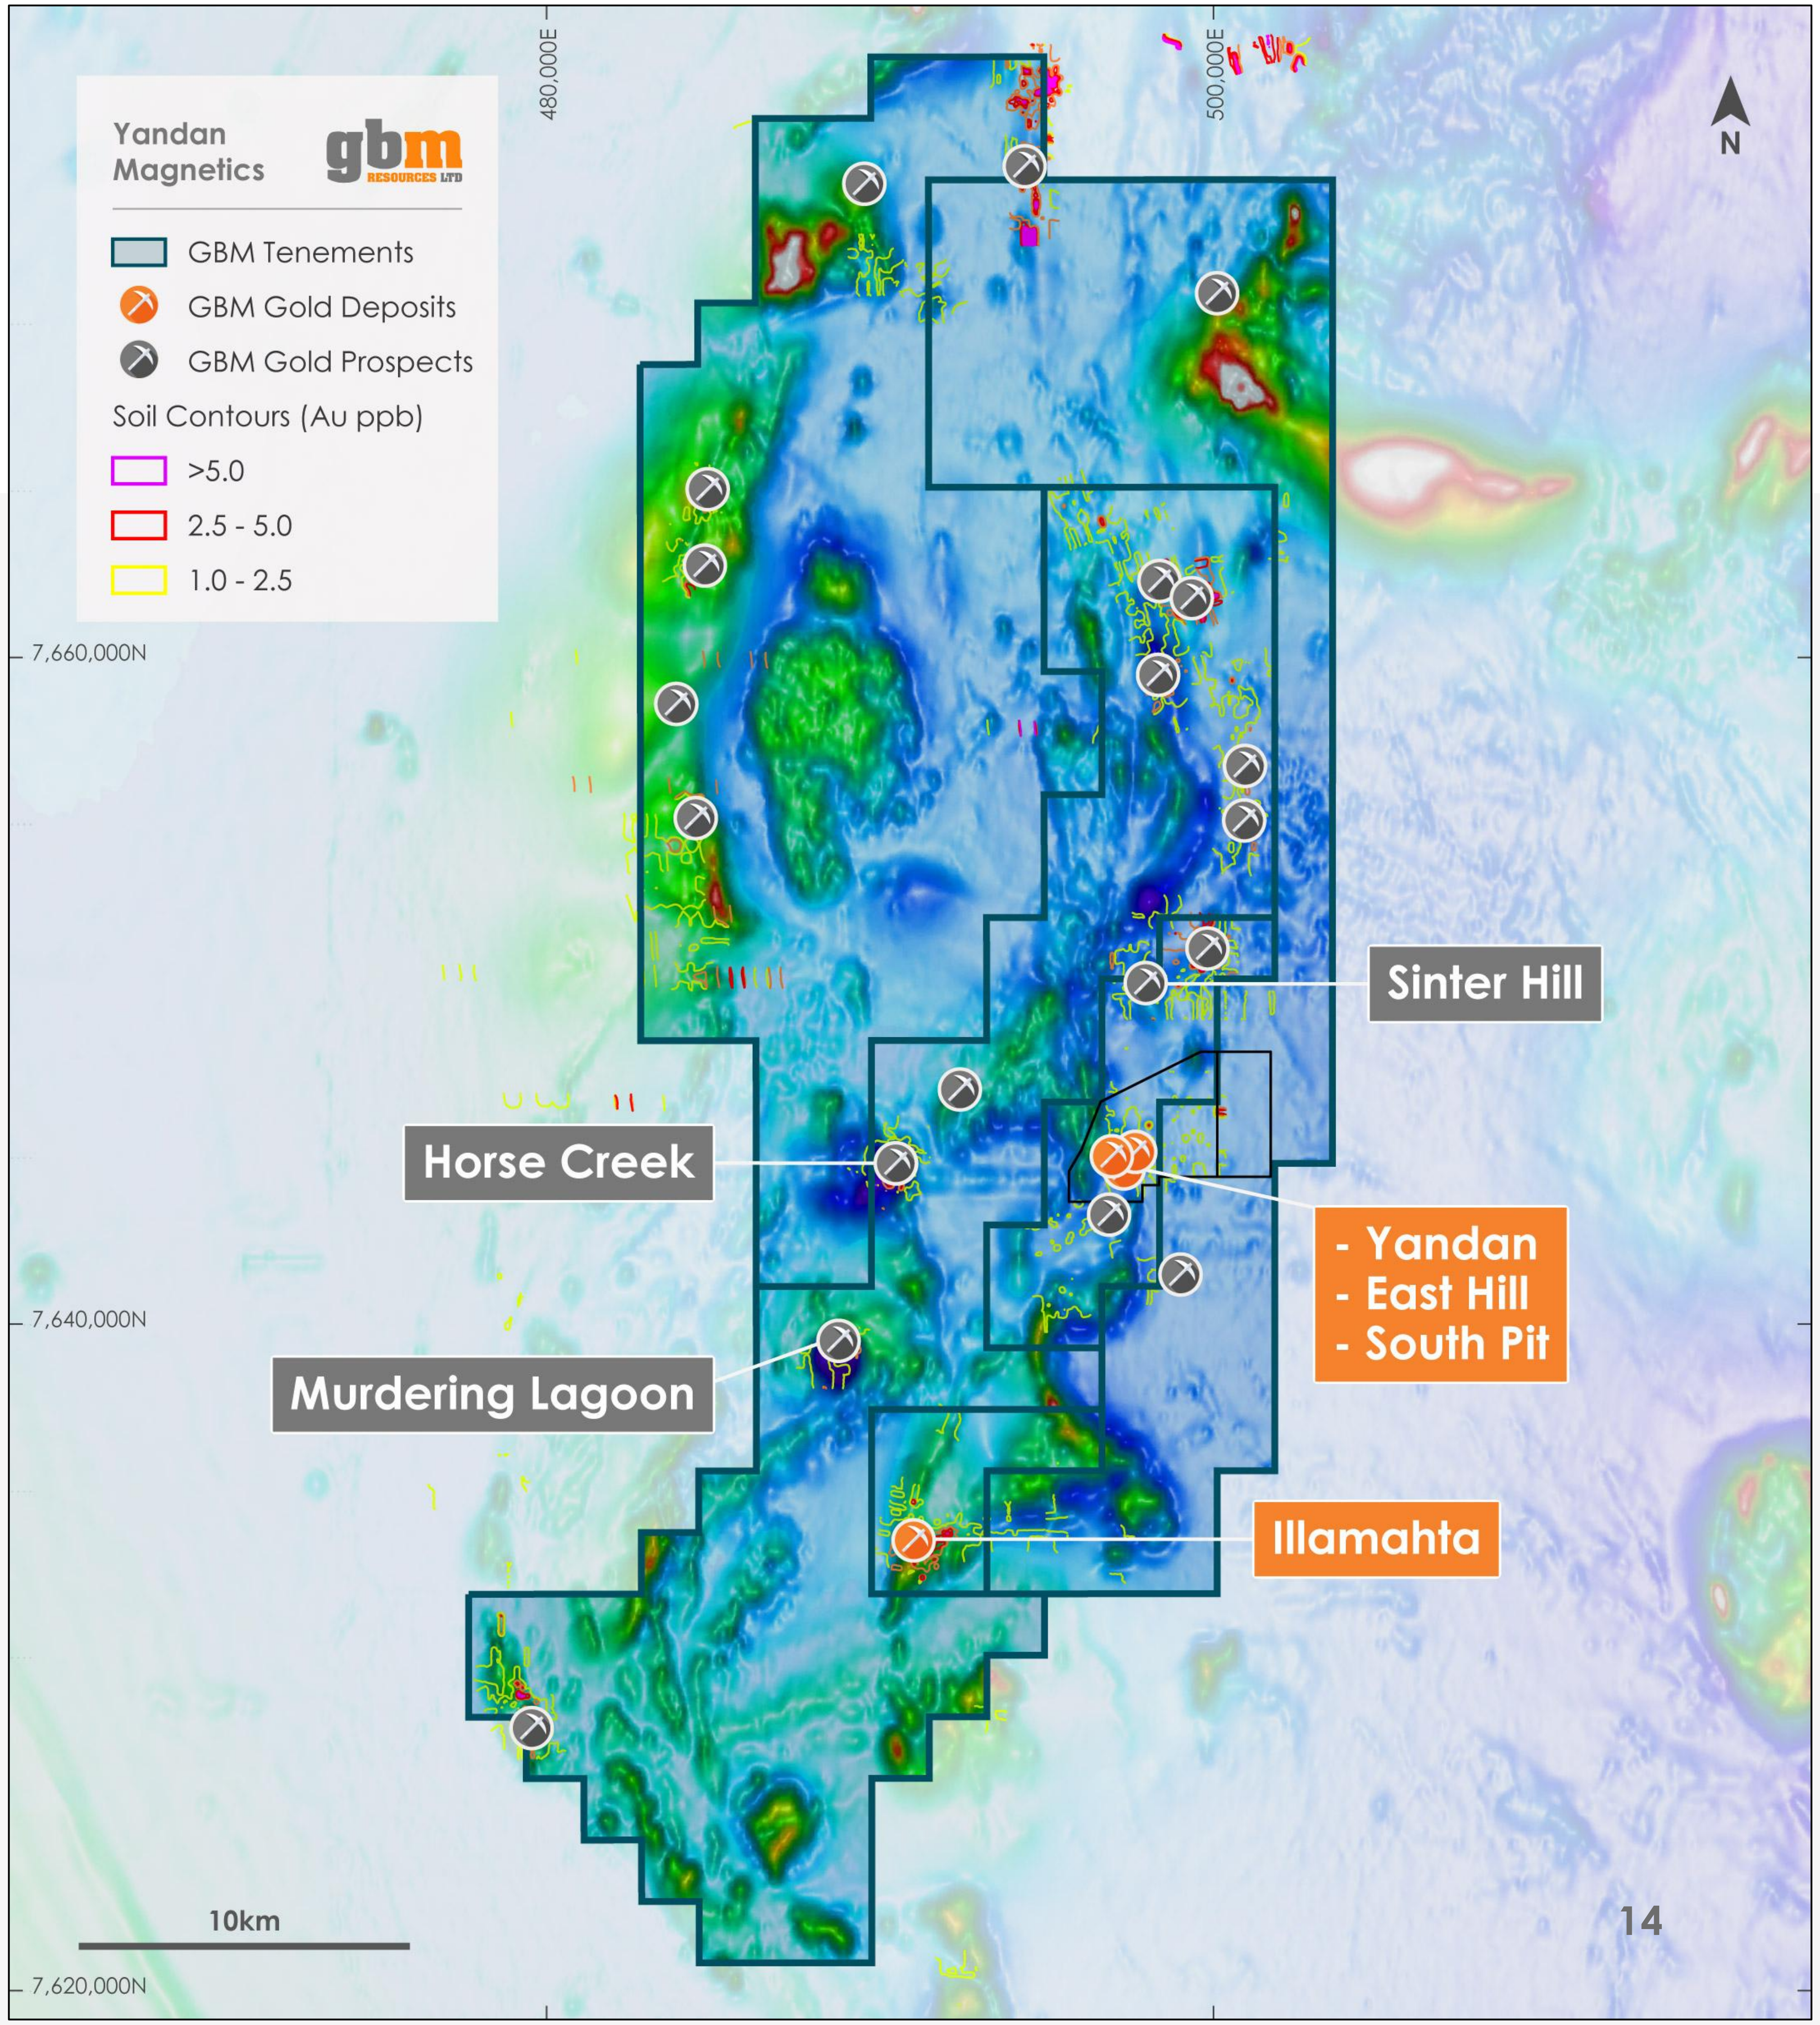
UNDEREXPLORED TENURE WITH GOLD ANOMALISM – MULTIPLE KNOWN GOLD SYSTEMS REQUIRING FURTHER EXPLORATION

Soil sampling covers just **8% of the Yandan Project area**

Felsic intrusions and gold soil anomalies align with magnetic lows

Aim to expand prospects & mineral resources through discovery





Near Term Exploration Program

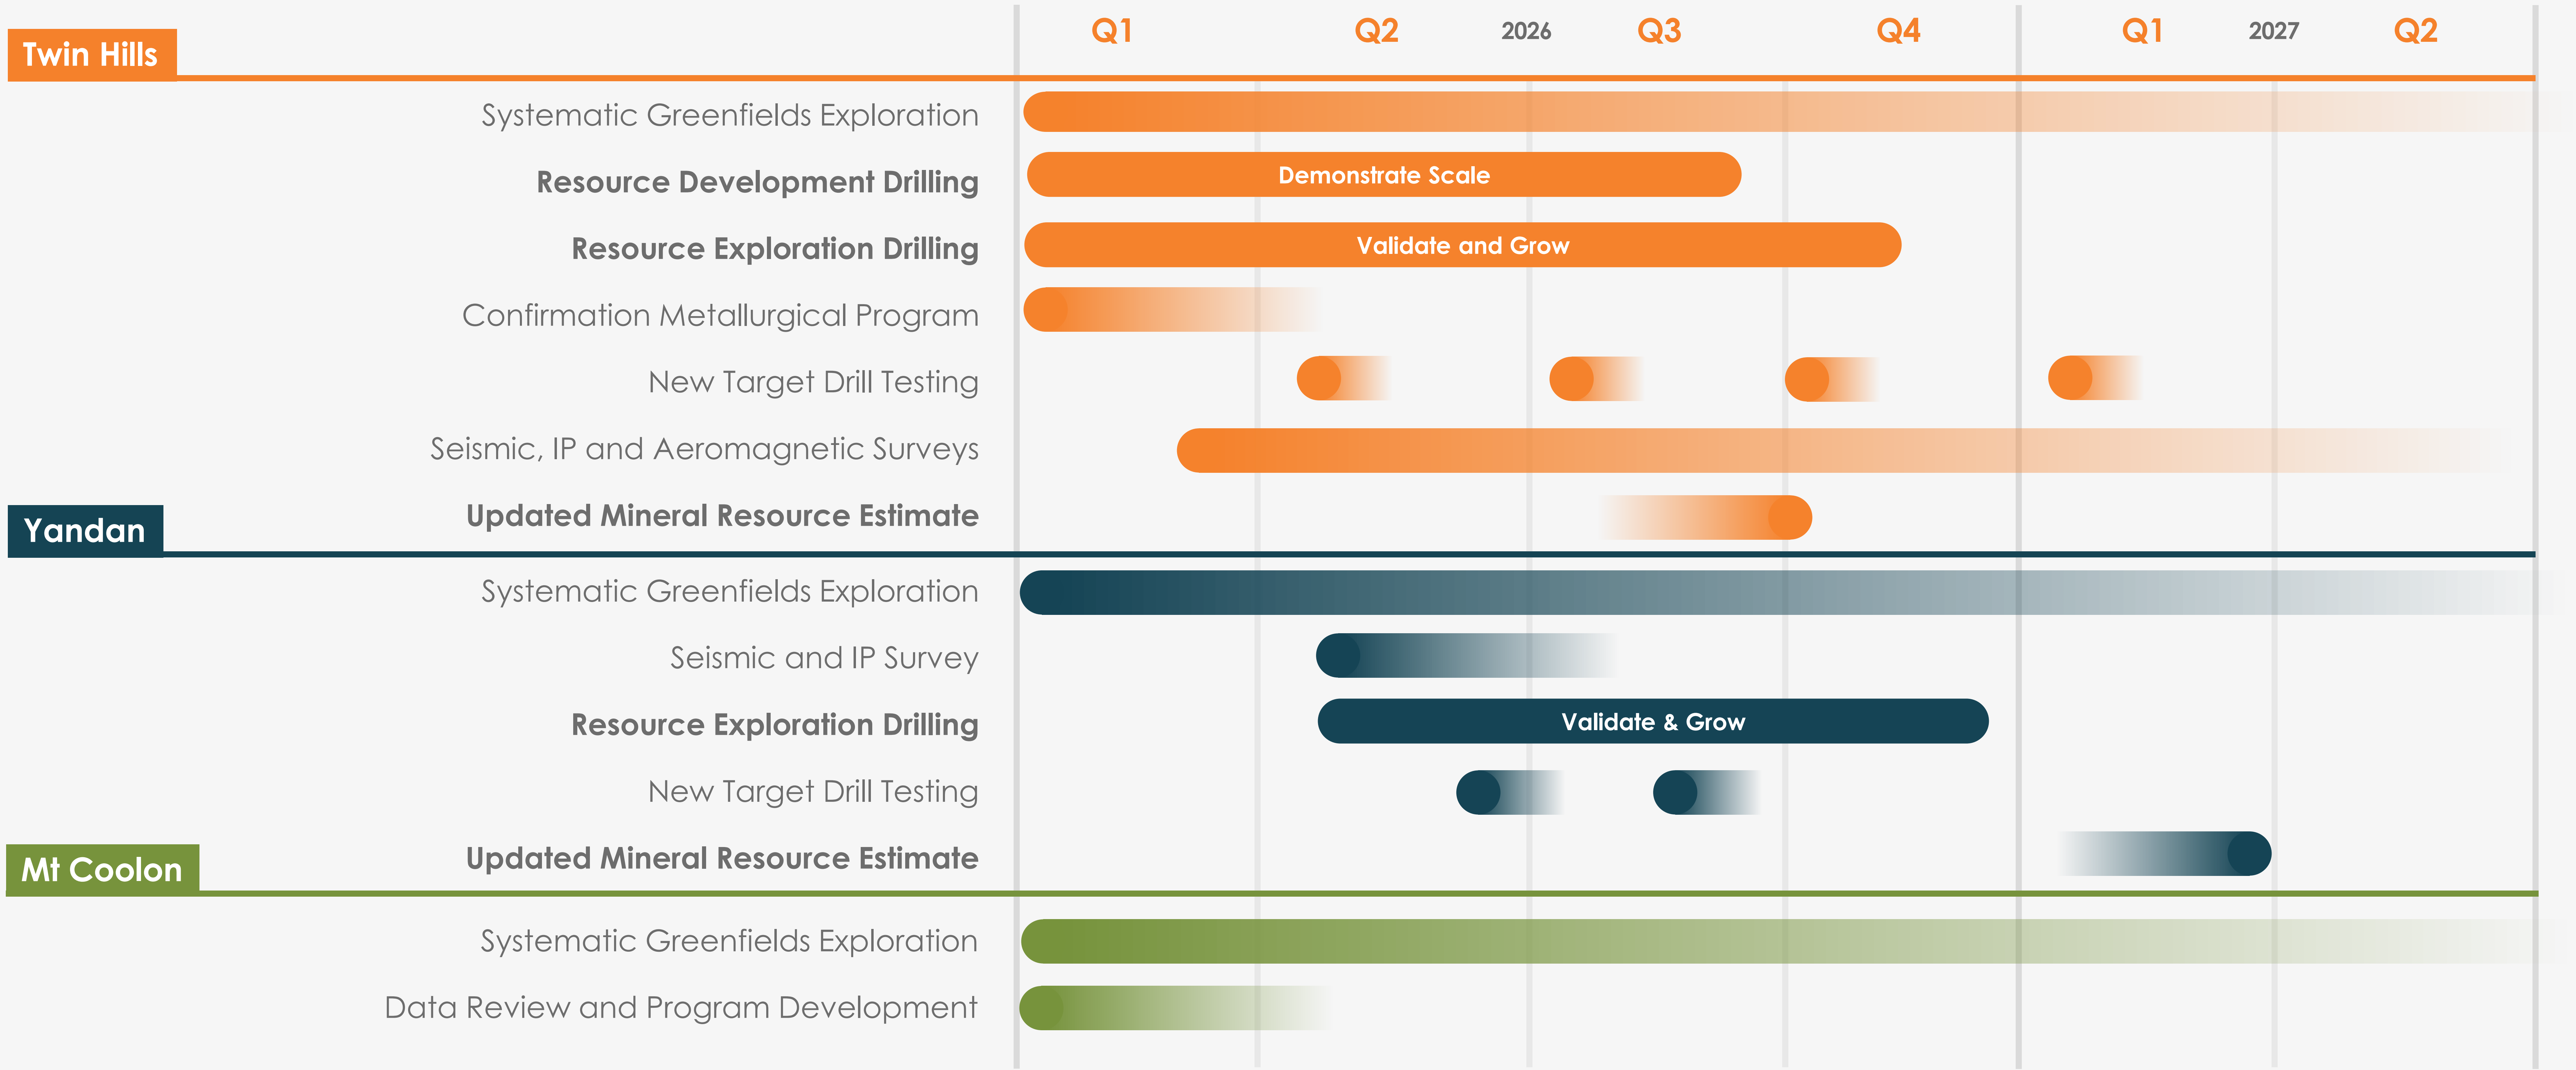
Aggressively Advancing
Under-Explored, High-Quality Targets

ASX:GBM

GBM RESOURCES LTD

Drummond Basin: Next 18 Months

MINERAL RESOURCE GROWTH UNDERPINNING INCREASING VALUE AND SYSTEMATIC GREENFIELDS EXPLORATION PROVING UPSIDE POTENTIAL



Drummond Basin: Near-Term Development Strategy

CONTINUING SYSTEMATIC EXPLORATION & UPGRADING OF PROSPECTS WITHIN THE GBM DRUMMONG BASIN PORTFOLIO

Validate & Grow

Materially grow the current Drummond Basin Mineral Resources through infill and extension drilling

Demonstrate Scale

Significantly increase the Mineral Resource through extension and step-out drilling programs

Technical De-Risking

Convert potential open pitable Mineral Resources to Ore Reserves through a robust PFS process and technically derisk the project

Prove Upside

Deliver additional Mineral Resources via new discoveries validating GBM's exploration model and tenement endowment

Deliver Value

Fast-track near-term value through rapid development on the back of continuing growth in Mineral Resources and Ore Reserves

ASX:GBM — GBM RESOURCES LTD

Board & Management

CORPORATE OVERVIEW

BOARD

Mr Ian Middlemas
Non-Executive Chairman

Mr Middlemas is renowned for leading major resource projects across commodities and regions.

He is a former Senior Executive at Australia's largest gold producer and an experienced director on global exchanges including ASX, LSE, and NASDAQ.

Mr Andrew Krelle
Executive Director

Mr Krelle is a geologist with broad experience across mining and finance, including roles in Australia, Hong Kong, and London. He worked with Bacchus Capital and co-founded Aozora Minerals, focused on copper exploration in Queensland.

Mr Peter Fox
Non-Executive Director

Mr Fox holds a Master of Applied Finance and specialises in corporate and business development.

As an accomplished corporate finance executive, he brings extensive experience in equity capital markets, strategic growth, and project execution within the metals and mining sector.

Mr Robert Behets
Non-Executive Director

Mr Behets is a geologist with 35+ years' experience and a key figure in Mantra Resources' growth ($9M to $1B over 5 years). He brings strong technical, commercial and managerial expertise across exploration, resource estimation, and operations.

Mr Sunny Loh
Non-Executive Director

Mr Loh is an expert in corporate strategy, finance markets, investor relations and capital restructures.

Mr Loh is focused on supporting the Board through interaction with the Company's overseas shareholder base, and via evaluation of additional funding and corporate options to further develop and grow GBM.

Mr Liu Hang
Non-Executive Director

Mr Liu is Chairman of the Board of Directors of Wise Walkers Limited, a substantial shareholder in GBM.

He is a permanent resident of Hong Kong with over two decades of extensive business experience in Australia.

MANAGEMENT

Mr Daniel Hastings
Chief Executive Officer

Mr Hastings is a seasoned mining executive with 25 years of global experience in operations and corporate roles. He has delivered major growth outcomes and led significant exploration teams with a track record of discovery and success.

Mr Themi Kailis
Corporate Development Manager

Mr Kailis is a Chartered Accountant with a Graduate Diploma in Exploration Geoscience, combining financial expertise with deep mining industry knowledge. He specialises in identifying, structuring, and funding global resource projects.

Mr Edward Jelicich-Kane
Exploration Manager

Mr Jelicich-Kane is a qualified geologist with extensive exploration experience, having held key roles at several ASX-listed companies. He also co-founded Aozora Minerals, a private exploration company focused on sediment-hosted copper and IOCG-style deposits in Queensland.

Mr Lachlan Lynch
Company Secretary

Mr Lynch is a Chartered Accountant and Chartered Secretary who has been involved in several ASX-listed mineral resources companies in similar roles.

The announcements containing the Table 1 Checklists of Assessment and Reporting Criteria relating to the 2012 JORC compliant Resources are:

- Koala/Glen Eva and Eugenia – GBM ASX Announcement, 4 December 2017, Mt Coolon Gold Project Scoping Study.
- Yandan – GBM ASX Announcement, 23 December 2020, Mt Coolon and Yandan Combined Resources Total 852,000 oz, following completion of Yandan acquisition, GBM ASX Announcement, 14 March 2023, Results of Yandan Mineral Resource Update
- Twin Hills – GBM ASX Announcements, 18 January 2019, Mt Coolon and Twin Hills Combined Resource Base Approaches 1 Million Ounces, 2 February 2022, Significant Resource Upgrade at Twin Hills Project and 5 December 2022, Twin Hills Gold Project Upgrades to ~1 Moz Mineral Resource

a) The preceding statements of Mineral Resources conforms to the "Australasian Code for Reporting Exploration Results, Mineral Resources and Ore Reserves (JORC Code) 2012 Edition"

b) All tonnages are dry metric tonnes

c) Data is rounded to ('000 tonnes, 0.0 g/t and '000 ounces). Discrepancies in totals may occur due to rounding

d) Resources have been reported as both open pit and underground with varying cut-off based off several factors as discussed in the corresponding Table 1 which can be found with the original ASX announcement for each Resource

Disclaimer

IMPORTANT NOTICES

This presentation is not a prospectus, disclosure document or offering document under Australian law or under any other law. It is for informational purposes only. This document does not constitute, and should not be construed as, an offer to issue or sell or a solicitation of an offeror invitation to subscribe for, buy or sell securities in GBM Resources Limited ABN 91 124 752 745 (GBM).

Any material used in this presentation is only an overview and summary of certain data selected by the management of GBM. The presentation does not purport to contain all the information that a prospective investor may require in evaluating a possible investment in GBM nor does it contain all the information which would be required in a disclosure document prepared in accordance with the requirements of the Corporations Act and should not be used in isolation as a basis to invest in GBM. The information contained in this presentation is not investment or financial product advice and has been prepared as general information only, without consideration for your particular investment objectives, financial situation or particular needs. Recipients of this presentation must make their own independent investigations, consideration, and evaluation of GBM. GBM recommends that potential investors consult their professional advisor/s as an investment in GBM is considered to be speculative in nature. Statements in this presentation are made only as of the date of this presentation unless otherwise stated and the information in this presentation remains subject to change without notice. Reliance should not be placed on information or opinions contained in this presentation.

To the maximum extent permitted by law, GBM disclaims any responsibility to inform any recipient of this presentation on any matter that subsequently comes to its notice which may affect any of the information contained in this document and presentation and undertakes no obligation to provide any additional or updated information whether as a result of new information, future events or results or otherwise.

To the maximum extent permitted by law, no representation or warranty, express or implied, is made as to the fairness, accuracy, completeness or correctness of the information, opinions or conclusions contained in or derived from this presentation or any omission from this presentation or of any other written or oral information or opinions provided now or in the future to any person. To the maximum extent permitted by law, neither GBM nor, any affiliates, related bodies corporate and their respective officers, directors, employees, advisors and agents (Relevant Parties), nor any other person, accepts any liability as to or in relation to the accuracy or completeness of the information, statements, opinions or matters (express or implied) arising out of, contained in or derived from this presentation or any omission from this presentation or of any other written or oral information or opinions provided now or in the future to any person.

This presentation may contain forward-looking statements including, but not limited to, comments regarding the timing and content of upcoming work programs, geological interpretations, receipt of property titles, potential mineral recovery processes, and other related matters. Forward-looking statements address future events and conditions and therefore involve inherent risks and uncertainties. The Company's current projects in Australia are at an early stage and all estimates and projections are based on limited, and possibly incomplete data. More work is required before geological and economic aspects can be confidently modelled. Actual results may differ materially from those currently anticipated in this presentation. No representation or prediction is intended as to the results of future work, nor can there be any guarantee that estimates and projections herein will be sustained in future work or that the Project will otherwise prove to be economic.

It is a requirement of the ASX Listing Rules that the reporting of ore reserves and mineral resources in Australia comply with the Joint Ore Reserves Committee's Australasian Code for Reporting of Mineral Resources and Ore Reserves ("JORC Code").

Investors outside Australia should note that while ore reserve and mineral resource estimates of GBM in this Document comply with the JORC Code (such JORC Code-compliant ore reserves and mineral resources being "Ore Reserves" and "Mineral Resources" respectively), they may not comply with the relevant guidelines in other countries and, in particular, do not comply with (i) National Instrument 43-101 (Standards of Disclosure for Mineral Projects) of the Canadian Securities Administrators (the "Canadian NI 43-101 Standards"); or (ii) Industry Guide 7, which governs disclosures of mineral reserves in registration statements filed with the US Securities and Exchange Commission (the "SEC"). Information contained in this Document describing mineral deposits may not be comparable to similar information made public by companies subject to the reporting and disclosure requirements of Canadian or US securities laws. In particular, Industry Guide 7 does not recognise classifications other than proven and probable reserves and, as a result, the SEC generally does not permit mining companies to disclose their mineral resources in SEC filings. You should not assume that quantities reported as "resources" will be converted to reserves under the JORC Code or any other reporting regime or that GBM will be able to legally and economically extract them.

COMPETENT PERSONS STATEMENT

The Company confirms that it is not aware of any new information or data that materially affects the information included in the original market announcements dated:

ASX Release: 04/12/2017, Scoping Study Demonstrates the Potential Economic Viability of Recommencing the Mount Coolon Gold Project, Queensland Project

ASX Release: 23/12/2020, Mt Coolon and Yandan Combined Resources Total 852,000 oz, following completion of Yandan acquisition

ASX Release: 02/02/2022, Significant Resource Upgrade at Twin Hills Project

ASX Release: 10/05/2022, Impressive drill results at Twin Hills – 49 m @ 5.18 g/t Au

ASX Release: 05/12/2022, Twin Hills Gold Project Upgrades to ~ 1 Moz Mineral Resource

ASX Release: 15/03/2023, Results of Yandan Mineral Resource Update

ASX Release, 22/03/2023, New Yandan Geology Model Define Compelling Targets GBM

ASX Release: 28/04/2023, Compelling Target Areas Identified at Twin Hills

ASX Release: 12/11/2025, First Drill Results Extend Lone Sister Gold Mineralisation

ASX Release: 22/01/2026, Gold Mineralisation Exte4nded at 309 Deposit

ASX Release: 29/01/2026, Outstanding High Grade Intersection 100m Outside 309 Deposit

containing previous released exploration results and, in the case of estimates of Mineral Resources that all material assumptions and technical parameters underpinning the estimates in the relevant market announcements dated:

Koala/Glen Eva and Eugenia – ASX Announcement, 4 December 2017,

Mt Coolon Gold Project Scoping Study

Yandan – ASX Announcement, 23 December 2020, Mt Coolon and Yandan Combined Resources Total 852,000 oz, following completion of Yandan acquisition, and GBM Announcement, 14 March 2023, Results of Yandan Mineral Resource Update

Twin Hills – ASX Announcements, 18 January 2019, Mount Coolon and Twin Hills Combined Resource Base Approaches 1 Million Ounces and 2 February 2022, Significant Resource Upgrade at Twin Hills Project and 5 December 2022, Twin Hills Gold Project Upgrades to ~1 Moz Mineral Resource

continue to apply and have not materially changed.

The Company confirms that the form and context in which the Competent Person's findings are presented have not materially changed from the original market announcement.
