6 May 2015

Commencement of Drilling

Highlights:

- **Drilling underway at Gidgee, WA**

Gateway Mining Limited ('Gateway' or 'the Company') is very pleased to announce that drilling has commenced at Gidgee, WA.

The program is expected to comprise 12 Reverse Circulation (RC) holes for approximately 2,000m.

Details of the program can be found in the Company's recently released Quarterly Activities Report as well as the announcement released on 23 March 2015.

It is expected the program will take between three and four weeks to complete, with assays expected approximately three weeks after that. No XRF gun was taken to the field so preliminary results will not be immediately available.

A further update will be provided once the drilling has concluded.

The information in this report that relates to Exploration Results, Mineral Resources or Ore Reserves is based on information compiled by Mr Scott Jarvis, a full time employee & Head Geologist at Gateway Mining, a member of the Australian Institute of Geoscientists. Mr Scott Jarvis has a minimum of 5 years' experience which is relevant to the style of mineralisation and type of deposit under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2012 Edition of the "Australian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves". Mr Scott Jarvis consents to the inclusion in the report of the matters based on his information in the form and context in which it appears.
