

ASX Announcement/Press Release | 17 October 2025

Gold Mountain Limited (ASX:GMN)

Appendix 3X & Late Lodgement Notice

Gold Mountain Limited (ASX: GMN) (**GMN** or **Company**) provides herewith a nil balance Appendix 3X in for Mr Pablo Tarantini. The Appendix 3X has been lodged late due to an administrative oversight. The Company has prepared and is now lodging the attached form immediately upon being aware of the oversight.

The Company further confirms that the Company and its directors are aware of their obligations under Listing Rule 3.19A. The Company considers its current practices are adequate to ensure compliance with Listing Rule 3.19B however it intends to further review its procedures to identify and implement any potential improvements.

This ASX announcement has been authorised by the Board of Gold Mountain Limited

About Us

Gold Mountain (ASX:GMN) is a mineral explorer with projects based in Brazil and Papua New Guinea (PNG). These assets, which are highly prospective for a range of metals including rare earth elements, niobium, lithium, nickel, copper and gold, are now actively being explored.

Gold Mountain has gradually diversified its project portfolio. The Company has highly prospective rare earth element, niobium, copper and lithium licenses located within the eastern Brazilian lithium belt, spread over parts of the Borborema Province and São Francisco craton in north-eastern Brazil including in Salinas, Mines Gerais.

In PNG, Gold Mountain is exploring the Wabag Project, which covers approximately 950km² of highly prospective exploration ground in the Papuan Mobile belt. This project contains three targets, Mt Wipi, Monoyal and Sak Creek, all lying within a northwest-southeast striking structural corridor. The three prospects have significant potential to host a porphyry copper-gold-molybdenum system and, or a copper-gold skarn system. Gold Mountain's current focus is Mongae Creek, which has been subjected to several phases of exploration, and the potential to host a significant copper-gold deposit is high. The current secondary targets are, in order of priority, Monoyal and Sak Creek.

Gold Mountain has also applied for a 491 km² exploration licence at Green River where high grade Cu-Au and Pb-Zn float has been found and porphyry style mineralisation was identified by previous explorers. Intrusive float, considered to be equivalent to the hosts of the majority of Cu and Au deposits in mainland PNG, was also previously identified.
