

ASX RELEASE

11 February 2016

For immediate release to the market

AWARD OF GRUYERE GOLD PROJECT FEASIBILITY STUDY

GR Engineering Services Limited (ASX:GNG) (**GR Engineering**) is pleased to announce that it has been engaged by Gold Road Resources Limited (ASX:GOR) (**Gold Road**) to undertake the lead engineer role in the Feasibility Study for the proposed Gruyere Gold Project in Western Australia.

GR Engineering's engagement to undertake the Feasibility Study follows its role in the management and delivery of the processing plant and infrastructure aspects of the positive, and recently published, Gruyere Gold Project Pre-Feasibility Study (PFS). The Feasibility Study will be the detailed investigation into the development of a 7.5 Mtpa¹ SABC CIL processing plant and associated infrastructure enabling Gold Road to undertake final investment decisions and potentially advance the Gruyere Gold Project to implementation.

Commenting on the award, GR Engineering's Managing Director, Mr Geoff Jones said:

"We look forward to continuing our solid working relationship with Gold Road on the Feasibility Study for the development of the Gruyere Gold Project, which we believe will be a significant gold development opportunity in Australia."

Ends.

1. Process plant capacity designed for 7.5Mtpa on fresh ore feed and up to 8.8Mtpa on oxide ore and transitional ore blends.

GR Engineering Services Limited (ASX:GNG) is an ASX listed engineering design and construction contractor specialising in fixed price engineering design and construction services to the resources and mineral processing industry.

GR Engineering has successfully completed the engineering design and construction of projects for a diverse range of clients, including global mining houses, mid-tier miners and junior developers undertaking their first project. Traditionally an EPC contractor, GR Engineering also has the ability to contract through a variety of models, including EPCM and hybrid contracting arrangements.

GR Engineering also has a long history of providing a diverse range of process engineering consulting services, including feasibility study preparation and management, process design and peer review engagements. These services have been delivered for projects globally and play a key role in delivering organic growth opportunities through design and construction project execution.

The Company also has a presence in the hydrocarbons industry via its wholly owned subsidiary, Upstream Production Solutions. Upstream Production Solutions is a leading provider of operations and maintenance and well management services to the Australian and South East Asian oil and gas industry.

As a group, GR Engineering employs more than 300 professional and support staff throughout Australia and internationally, in addition to a direct construction workforce and subcontracted personnel.
