MOOLYELLA PROJECT - TENEMENT E45/3172 GRANTED

- **Confirmation received that the primary tenement at the Moolyella Project has been granted.**
- **Exploration for tin, tantalum, lithium & rare earth element mineralisation to commence shortly.**

Lithex Resources Limited (ASX:LTX) is pleased to advise that the Company has received confirmation that the primary tenement at its Moolyella Project - E45/3172 has been granted and exploration will now commence.

The Moolyella Project is located approximately 23 kilometres east-north-east of the township of Marble Bar and is accessible by sealed road.

Early preliminary work has already commenced at the Moolyella Project, including:

- compilation and plotting of the historical production and geological data on the unmined leads
- mapping, field referencing drill holes and exploration data
- initial evaluation of tailing dumps and stockpiles
- mapping and confirmation of hard rock targets
- the work to date has identified that the company has several tin, tantalum, lithium and rare earth element targets on its tenements at Moolyella.

The Company looks forward to making further announcements as this exciting new phase of aggressive exploration gets underway.

Sincerely:

Rob Mandanici – Managing Director
