

INVESTOR PRESENTATION

October 2017

*Battery technology that will
revolutionise the global
battery market*

ULTRACHARGE

This presentation has been prepared by UltraCharge Limited (“UltraCharge”). It does not purport to contain all the information that a prospective investor may require in connection with any potential investment in the UltraCharge. You should not treat the contents of this presentation, or any information provided in connection with it, as financial product advice or advice relating to legal, taxation or investment matters. This presentation and the information contained herein and all electronic and/or hard copy documentation which comprise it are being provided to you solely for your information and may not be copied, reproduced, distributed, disclosed or published, in whole or in part, to any other person for any purpose whatsoever at any time without the prior written consent of UltraCharge. This presentation is not an offer to any person nor is it a prospectus. UltraCharge has prepared this document based on information available to it at the time of preparation. No representation or warranty (whether express or implied) is made by the UltraCharge or any of their officers, advisers, agents or employees as to the accuracy, completeness or reasonableness of the information, statements, opinions or matters (express or implied) arising out of, contained in or derived from this presentation or provided in connection with it, or any omission from this presentation, nor as to the attainability of any estimates, forecast or projections set out in this presentation. This presentation is not investment or financial product advice (nor tax, accounting or legal advice) and is not intended to be used for the basis of making an investment decision. The information contained in this presentation has been prepared without taking into account the objectives, financial situation or needs of individuals. This presentation is provided expressly on the basis that you will carry out your own independent inquiries into the matters contained in the presentation and make your own independent decisions about the affairs, financial position or prospects of UltraCharge. UltraCharge reserve the right to update, amend or supplement the information at any time in their absolute discretion (without incurring any obligation to do so). UltraCharge, nor their related bodies corporate, officers, their advisers, agents and employees accept any responsibility or liability to you or to any other person or entity arising out of this presentation including pursuant to the general law (whether for negligence, under statute or otherwise), or under the Australian Securities and Investments Commission Act 2001, Corporations Act 2001, competition and any such responsibility or liability is, to the maximum extent permitted by law, expressly disclaimed and excluded. Nothing in this material should be construed as either an offer to sell or a solicitation of an offer to buy or sell securities. It does not include all available information and should not be used in isolation as a basis to invest in UltraCharge. All pictures and diagrams are for illustrative purposes only.

UltraCharge is a battery technology company which will revolutionise the global battery market

ASX Code: UTR

Total shares on issue: 635 m

Escrowed shares on issue: 25%

Performance rights: 41 m

Options: 82 m

Market Cap. @ 2.5c: A\$15.9 m

Cash (30 Jun 17): US\$1.8 m

CAPITAL STRUCTURE

Doron Nevo,
Chairman

Over 30 years experience in the high-tech industry. Co-founder & CEO, KiloLambda. CEO of NKO and of Clalco. BSc in Electrical Engineering from the Technion. MSc in Management from NYU

John Paitaridis

25 years executive experience. Optus managing director. Member of Australia's Institute of Company Directors. Chairman, Australia's Information Industry Association. Bachelor of Economics.

Kobi Ben-Shabat,
Co- Founder & CEO

Vast leadership experience. Founded OPS, with annual sales of \$14M, acquired by ASX listed Hills Limited. Holds an BA and MBA in Marketing and Information Technology.

David Wheeler

Over 30 years in executive positions. Experienced director & corporate advisor. Fellow of the AICD, Director of several ASX listed companies.

Sharon Ben-Shabat
VP Operation

Over 17 years of experience in senior management of operation & manufacturing. Global design transfer management & NPI programs in multi locations with most advanced technologies. Extensive practice with Lean & SIX sigma methods. BA Studies from Haifa University

Danny Hacohen,
VP Marketing, Sales, Bus. Dev.

Over 25 years in high-tech. Multiple senior positions in business operations. BA in Social Science & Mathematics. MBA studies, University of Bradford.

Dr. Linoam Eliad,
VP, R&D

15 years in R&D of nano-materials for batteries and super capacitors. Lead projects for large corporations, smaller start-ups, & US Air Force. PhD in Physical Chemistry & Electrochemistry from Bar-Ilan University, Israel.

Prof. Chen Xiaodong,
Advisor

Associate Professor, School of Material Science and Engineering, NTU, Singapore. Domain expert in nano-bio interfaces & programmable materials for energy conversion.

TECHNOLOGY TO ENHANCE ENERGY STORAGE IN LITHIUM-ION AND FLOW BATTERY MARKETS

ANODE TECHNOLOGY

- New Lithium Ion Battery Technology
- Exclusive license to patented anode technology from the Nanyang Technology University in Singapore (NTU)

IRON FLOW BATTERY

- New Battery Storage Technology
- Exclusive license to patented iron flow battery technology from Epsilor
- This technology will allow efficient use of renewable energy production

ADDRESSABLE MARKET

- US\$93.1 billion lithium-ion battery market by 2025 [*Grand View Research*]
- US\$185 million flow battery by 2020 [*Businesswire*].

ON TRACK

- Shipment of anode material for commercial clients by end of 2017.
- Likely production of 1000mA/P pouch cell battery by end of 2017.

EXCELLENT DEVELOPMENT RESULTS

Working on increasing production efficiencies to meet customer requirements

MARKET DRIVERS

Massive increase in demand due to growth of renewable energy, consumer demand for faster charging, longer lasting batteries

KEY PARTNERSHIPS

In place with NTU, Epsilor and Leclanché.

LEADERSHIP & MANAGEMENT

Experienced team with key expertise in battery technology

Every committed milestone met

Breakthrough technology for lithium batteries replaces graphite used for the anode (negative pole) with UltraCharge's nanotube gel material made from titanium dioxide (TiO_2).

Significant benefits over current anode materials:

RAPID CHARGING

Smartphones: 70% charged in <6 mins
Electric cars: dramatic increase in capabilities with just 10-15 minutes charging

COST EFFICIENCY

Use of raw materials and patented affordable production method

ENHANCED SAFETY

Less carbon in batteries = No thermal runaway & overheating – safer than traditional lithium-ion batteries

LONGER LIFE CYCLE

Handle 20 times more charging cycles than today's batteries (between 10,000 and 20,000 charging cycles)

The Innovation:

Patented technology low cost raw material. Simple hydrothermal stirring

TiO₂ nanotube gel

Electron microscopy of titanium dioxide nanotubes

Graphite replaced by titanate powder

UTR’S TECHNOLOGY IS AN IMPROVEMENT ON CURRENT ANODE TECHNOLOGIES

	Capacity (mAh/g)	Typical Charge Time (hours)	Cycle life	Safety	Cost	Technology Complexity
UTR’s Nanotubes (Titanium Dioxide)	~250	0.02	> 10000	Medium	Low - Medium	Market Standard
Graphite	< 350	> 2	< 1000	Low	Low	Market Standard
Silicon	400 – 2500	2 - 3	700 - 1000	NA	Low	High
LTO	~ 170	0.02	7500	Medium	Medium	Low

Global lithium-ion battery market expected to reach **US\$93.1 billion by 2025**, growing at a CAGR of 17%
[Grand View Research].

ELECTRIC
VEHICLES

PORTABLE CONSUMER
ELECTRONICS

GRID STORAGE
SYSTEMS

High drivers of lithium-ion battery demand [EPS News]

Immediate market is electric vehicles and industrial applications:

CARS

BUSES

FORKLIFT

Electric vehicle market predicted to be worth US\$731 billion by 2037
[Global Newswire]

Global Lithium Market*

*IDTechEx Research report, Lithium-ion Batteries 2016-2026

High power density flow battery based on breakthrough Nano-iron anodes

ADVANTAGES

Very high MW capabilities

Low installation cost -
\$250/kwh vs CAPEX:
~\$200/kwh DC

Long term stability

Safer & more environmentally
responsible than traditional
lithium-ion batteries

Low manufacturing & running
costs – lifecycle costs by
2020: 13c/kwh vs Telsa's
PowerPack: 15-16c/kwh

Ability to supply 4-12 hours
continuous power without
recharge

MARKET

Electrification of Rural
Areas - \$154B

Replacement of
Gensets on Remote
Islands - \$18B

Replacement of
Gensets in Developing
Countries - \$11B

Global flow
battery market to
**reach US\$185
million by 2020.**
[Businesswire]

Energy storage systems expected to witness
fastest growth over forecast period at CAGR of
21% from 2017-2025 [EPS News].

Nanyang Technology University (NTU), Singapore

Leading technology university. UltraCharge has an exclusive license over the anode material developed at NTU.

Leclanché, Switzerland

One of the world's leading fully integrated battery energy storage solution providers. Ultracharge has a MOU in place to undertake a project, focused on the electrical bus market.

Epsilor Electric Fuel Limited, Israel

Subsidiary of Arotech Corporation's power sources division. UltraCharge has a licensing agreement which provides an exclusive license option for new battery intellectual property (Iron Flow Battery).

Source: CrunchBase, TMT Analytics

Examples of private companies established within the last five years similar to UTR. With Commercialisation slated within the next two to three years.

StoreDot is a similar Israeli company (private), which is two years ahead of UTR in terms of development, scaling facilities and pilot production. The company has a valuation of US\$500 million and has recently raised US\$60 million [Bloomberg].

UltraCharge's energy storage technology is a game-changing battery that is: ***Fast charging, has enhanced safety, is cost efficient, and has a longer lifespan.***

The ability of Ultra Charge to meet these timelines is subject to various factors including availability of staff and equipment at production facilities and Ultra Charge Anode material being suitable for use by end users in accordance with its proposed business plan. Ultra Charge believes that the funds raised under the public offer will be sufficient to commence production and sales of the Anode material. However, grant financing cannot be guaranteed and further funding may be required to meet the objectives stated above.

RAPID CHARGING TECHNOLOGY

ENHANCED SAFETY

**HUGE GROWTH MARKET
PROJECTED FOR LI-BATTERIES**

IP SECURED

LONG LIFE SPAN TECHNOLOGY

COST EFFICIENT

**STRATEGIC COMMERCIAL
COLLABORATIONS IN PLACE**

FAVOURABLE ECONOMICS
