Further Long Copper Intersection At Wilkins Prospect

Havilah Resources (ASX:HAV)

Havilah Resources NL aims to become a significant new producer of iron ore, copper, gold, cobalt and molybdenum from its 100% owned mineral discoveries:

Kalkaroo: 124.5 Mt 0.50% Cu 0.39g/t Au Meas+Indic resource plus 18.7 Mt 0.74 g/t Au Meas resource

Mutooroo: 13.1Mt 1.48%Cu, 0.14%Co Meas+Indic+Inferred res

North Portia: 11.3Mt 0.89%Cu, 0.64g/tAu, 500ppmMo Ind+Inf res

Portia: 720,000t 2.9g/t Au Inferred resource

Maldorky: 147Mt 30.1% Fe (18% Fe cutoff) Indicated resource Excellent potential to expand known resources in all cases.

MMG Exploration spending \$12m over 5 years exploring for IOCG and sedimentary hosted Pb-Zn deposits on Havilah's tenements

Highlights

- **Long interval of copper-gold mineralisation in latest drillhole:** WKRC010 114m at 0.38% copper and 0.17 g/t gold (75m-189m). This hole passed through the entire interpreted 100m wide mineralised zone at this location.
- **Target geometry further confirmed :** drillholes on this section appear to confirm a mineralised zone dipping roughly 70° north and about 100m wide (see section).
- **Drilling continues on other targets :** Havilah's drilling crew are presently testing other regional targets with similar signatures to the Wilkins system. Following this it is planned to deploy the drilling crew on further iron ore drilling in the vicinity.

Commenting on these results, Havilah Chairman, Dr Bob Johnson, said that Wilkins continued to surprise on the upside with such long copper and gold mineralised intervals.

"We think there are good prospects to establish a significant copper resource at Wilkins with further drilling."

"At this stage our focus has been on testing a number of similar looking targets in the region in the hope that we might discover other higher grade zones."

"We are excited by these results because this is a completely new copper-gold setting for Havilah with a great deal of promise. It might prove to be a stand-alone project or a useful addition to one of Havilah's existing copper-gold resources at nearby Kalkaroo or Mutooroo." he said.

The Wilkins prospect lies about 75km west of Broken Hill and just over 1 km south of the Barrier Highway and Transcontinental railway line.

Competent Persons Statement

The information in this report has been prepared by geologists Dr Bob Johnson, who is a member of the Australasian Institute of Mining and Metallurgy, and Dr Chris Giles who is a member of The Australian Institute of Geoscientists. Drs Johnson and Giles are employed by the Company on consulting contracts. They have sufficient experience which is relevant to the style of mineralization and type of deposit under consideration to qualify as Competent Persons as defined in the JORC Code 2004. Drs Johnson and Giles consent to the release of the information compiled in this report in the form and context in which it appears.
