Dear Sir

SUMMARY OF ANNOUNCEMENT

Southern Laverton Tectonic Zone (SLTZ) Update

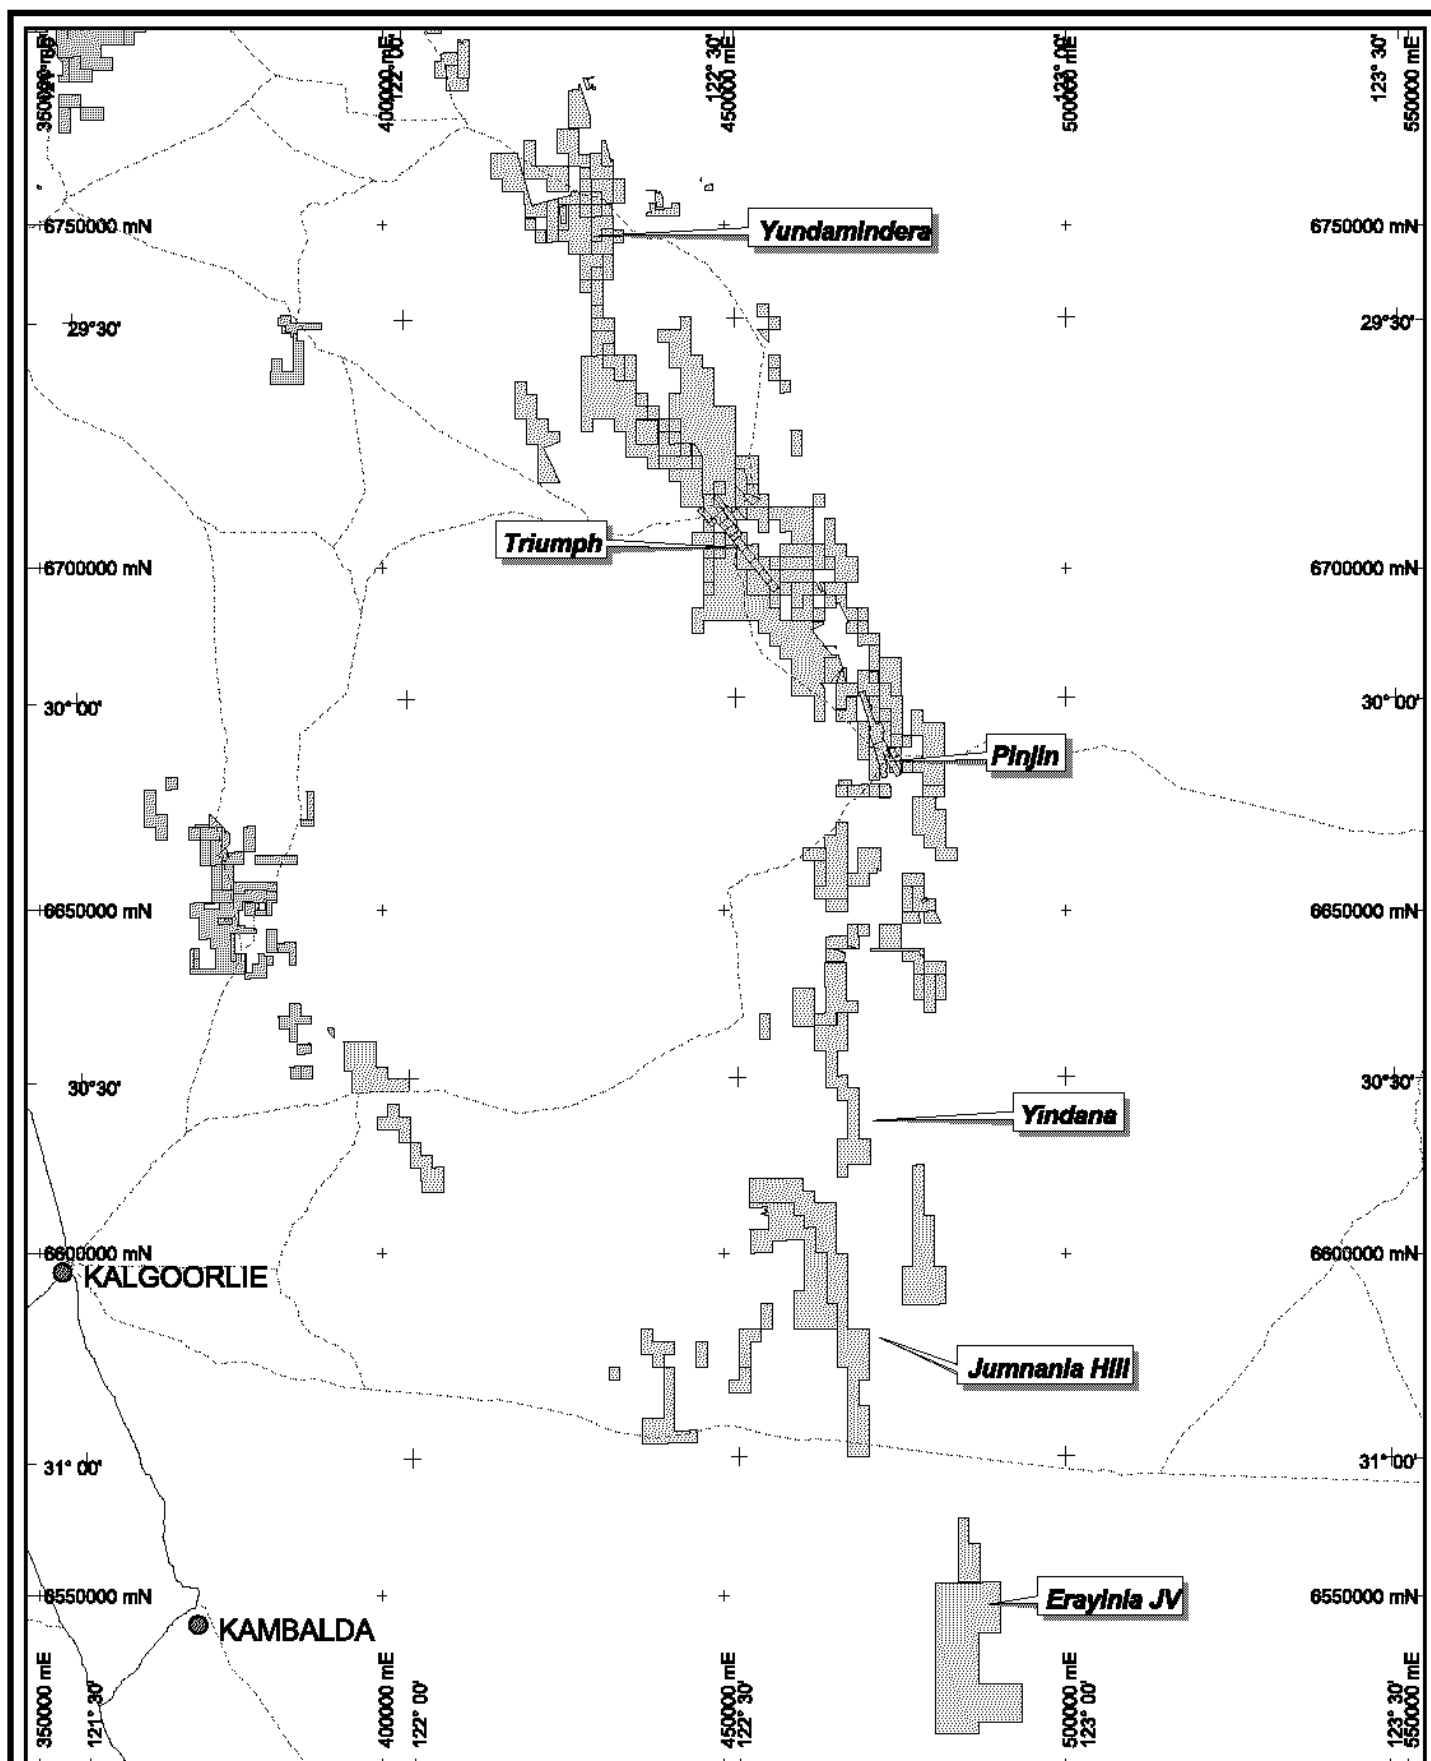

DETAILS OF ANNOUNCEMENT

The Company wishes to advise that significant areas within the SLTZ project area have recently been granted. A programme of field work and drilling is now being planned. The SLTZ project area covers approximately 3,000 square kilometres of mostly contiguous tenements over a distance of 100 kilometres. The SLTZ is known to be highly prospective for large gold deposits.

Furthermore, the Company's joint venture partner at Erayinia has announced recently the intersection of massive base metal sulphides from drilling, and that a number of additional targets are yet to be drilled. The Company has several 100% owned tenements along strike to the north at Jumnania Hill and an initial review of data suggests that similar host rock units extend into this area. The Company is currently acquiring aeromagnetic data over the 100% owned tenements in order to plan and conduct a base metal exploration program. Erayinia is located approximately 130 kilometres south east of Kalgoorlie in Western Australia.

Yours faithfully

PETER LEE
General Manager Corporate
& Company Secretary
