

ASX & NEWS RELEASE

17 May 2017

CHUBB INSURANCE PARTNERS WITH UNITED NETWORKS FOR WIFI APP

Australian telecommunications company, United Networks Limited (United) (ASX: UNL), has signed an agreement with Chubb Insurance Australia Limited (Chubb) to distribute its Wi-Fi Data product to the insurer's selected travel insurance customers.

Chubb is the world's largest publicly traded property and casualty insurer, providing commercial and personal property and casualty insurance, personal accident and supplemental health insurance, reinsurance and life insurance.

According to United CEO, Mr Nicholas Ghattas, partnering with a leading global insurance provider like Chubb demonstrates the value of United's product and significantly increases the app's reach.

According to Chubb's Head of Travel for Asia Pacific, Jon Ford, offering the Wi-Fi app under Chubb's brand to customers is a value-add service for the highly connected and mobile consumers of today.

Since the product's launch in January 2017, selected existing "white label" partners and new partners have begun testing the App, which United sees as an indication of a wider commercial rollout of the App under client brand names.

The terms of the agreement are for an initial 12-month period.

ABOUT UNITED NETWORKS LIMITED (UNL)

Established in 2009, United Networks (United) is an Australian-owned global telecommunications provider providing telecommunications, data and value added services. With operations in Australia, Canada, New Zealand and Malaysia, United provides services in more than 190 countries. United "white labels" its global roaming and data products for large B2C businesses such as insurers, airlines, banks and travel agents. In providing global roaming as an add-on to their own customers, United's corporate partners are able to develop other revenue opportunities, assisted by the location based service, made possible from the underlying United network and platform.
